

WITCHING HOUR

Hairstyles to slay the night!

Leather jackets to sequined dresses, are there any unique look for New Year's Eve? Anything goes... at least when it suits you well! You can find something wild at Bongo Bazar, or give your go-to couturier a visit and jazz yourself up in an expensive cocktail dress. But everyone just talks about the

clothes — what of the hairstyle? We

are here to help you on that note as well, with few unconventional, head turning formulas that should inspire you to dance on the floor all night long.

LAYERING UP RIGHT

To pick up on this electrifying look, make one massive braid, above your ears and sweep it back into a knotted bun. Pull out the layers for that next level touch and feel!

AUDREY HEPBURN IS BACK

Old school glamour never goes out of style. And the same goes for Audrey Hepburn, Brigitte Bardot, or Elizabeth Taylor looks — simply timeless. Give yourself an epic start to 2019 by blow-drying your hair

straight and curling it up slightly in the ends. Do the same for your bangs for that breezy flipped effect. This was just one style from the past. You can copy many more by your favourite heroine as you wish.
