

Spring fling

Spring is here! You know what that means, right? It's time to head out and have fun! And while you explore the colourful world around you, make sure to have the right fling always by your side. We mean your perfect pair of shoes, of course! Fun, flirty and super cute- let's dive into all the spring flings awaiting you this season!

When we think of spring, two words come to our mind- colours and florals. And our spring shoes can have no exception! Pops of colours, combined with cute floral designs are quintessential! But as always, you can play around with the types, materials, patterns, and more to find the one that reflects your vibrant mood the best.

Flats are a necessity this time of the year. The weather calls for frequent hangouts and memorable trips, making flats your 24/7 stand-by! The simplest you can go for are some colourful flip-flops! You can also choose between ballerinas or peep-toes with floral patterns on them. Embroidered designs look gorgeous and are quite available in the market! Mules can be a great option too if you want to pair them with some classic western outfits. You can even hunt down some quirky pairs that have cute props such as tassels, bows, pom-poms etc. attached to them. With flats, eccentricity is the trendy!

As for heels, there are loads of options to choose from. Blocks, platforms, wedges, stilettos- go for the kind that gives you comfort, along with confidence. Beautiful, bright colours such as yellow, pink, blue and so on will complement the flamboyance around you! Needless to say, you can pick a pair from a variety of style choices. Strapped designs are trending; if you're into this type, get a pair as these go well with most outfits! Because it's spring, definitely look out for cute patterns. Florals are

always an option, but there are tons of other designs too; all you need to do is make the perfect concoction of the season, and your personal style. Lastly, be wise when choosing the height of your heels. Get a pair that'll be the most wearable for you in your day-to-day life!

A spring outfit lacks life to it without the company of a sublime pair of shoes. Whether you just want a new pair for practical wear or to style with your spring looks- it's never a bad idea to incorporate some fun shoes to your closet! So pick a pair that's meant for you and make this season brighter and happier with your exuberant charm!
