

Sirajganj economic zone opens tomorrow

OUR CORRESPONDENT, Pabna
Prime Minister Sheikh Hasina is scheduled to open Sirajganj Economic Zone through a video conference from her official residence at Gono Bhaban in Dhaka tomorrow.
This 1,035-acre zone established on the west bank of the Jamuna river in Sirajganj will house 400 factories of 11 big and small companies, said Sheikh Monwar Hossain, director of the economic zone. "We expect businesses will invest around Tk 3,200 crore in the zone and the investment will increase

rapidly," he said.
At the initial stage, the economic zone can employ some 10,000 people, which is expected to reach five lakh in the next five years, Hossain said. "This labour-intensive project will create the highest number of job opportunities in the country as an economic zone."
Investments will be made in the fields of textile and knitwear, agro products, food and beverage, pharmaceuticals, automobiles, liquefied natural gas, leather-based companies, electronics and ICT, furniture and power generation, he said.

Land development work of the economic zone started at the beginning of 2019 and plots will be ready for allotment within June next year, he said.
The zone is directly connected to the northern part of the country by road, river, rail and air. It is also connected with neighbouring India, Nepal and Bhutan through land ports in Burimari, Hili and Banglabandha.
The economic zone would also have access to Chattogram and Mongla seaports through the proposed inland container depot on the Western side of Bangabandhu bridge.

Japan's business confidence drops

AFP, Tokyo
Confidence among Japan's biggest manufacturers fell sharply this quarter, the Bank of Japan's quarterly business survey showed Monday, suggesting a stuttering recovery for the world's third-largest economy.
The central bank's April Tankan report -- a quarterly survey of about 10,000 companies -- showed a reading of 12 among major manufacturers, a steep fall from 19 in the previous quarter.
Economists say a slowdown in the Chinese economy was partly to blame, with worries that a rise in crude oil prices could eat into profits also weighing on business confidence.
The index for non-manufacturers slipped to 21 from 24 in the previous quarter.
The Tankan report, the broadest indicator of how Japan Inc. is faring, marks the difference between the percentage of firms that are upbeat and those that see conditions as unfavourable.
Japan's economy grew a modest 0.5 percent quarter-on-quarter at the end of last year.
However, the cabinet office has recently revised down its judgement on the economy as a separate business confidence index declined in January for the third straight month.
Analysts have also warned that US-led trade wars could be a major risk factor for the Japanese economy still struggling to win a long battle against deflation.
