

Kids these days...

It's fun to scroll through your newsfeed and see thirty-somethings and forty-some things blame your generation for most societal problems. I guess it's easy to make assumptions when you don't have to deal with the thought that your degree costing over seven lakhs cannot guarantee a job in today's market. Not to mention the impending risk of climate change. We are almost overloaded with information all day and most of it is bad news. Rabid consumption in the past few decades has led us nearly to the point of no return.

This generation isn't soft or touchy, nor are they snowflakes who get offended easily. The millennials and the Gen-Zers are the generations who are taking charge and addressing and talking about real issues instead of thinking it's someone else's problem. Also, single-use plastic is bad.

Stealing someone else's meme and posting it as your own is also very bad. Please don't do that.
