

Nirab Hossain

STYLE CHECK

Nirab Hossain is a popular name in the entertainment industry and is well known for both his acting and modelling skills. Nirab made his debut with the Bollywood film, 'Sheitaan' in 2017. Since then, he has been a part of many films, and has even played the role of the protagonist in a Malaysian movie. In a recent interview with Star Showbiz, Nirab shared his views on fashion.

What is your style mantra?

I wear all kinds of clothes except half-sleeved shirts. I generally prefer wearing shirts paired with jeans and complete the outfit with a pair of converse.

Who is your favourite style icon?

I can't name one person as my style icon since fashion is constantly changing. So, it is difficult to find someone whose sense of style I can always follow.

Who is your favourite fashion designer?

I wear a lot of clothes from Armani. I also like going to Zara, mostly when it comes to buying clothes like blazers. For shoes, I prefer going to Levi's and Adidas. In terms of pants or trousers, Gap is my go to brand.

What is your regular everyday wear and party wear like?

My party wear is not very different from my regular wear. However, when I attend a party, I usually opt for formal shirts and shoes, and I might trade my regular

hairstyle with a different one which is suitable for the event.

What are your favourite accessories?

I really like wearing sunglasses.

What is a must have in your wardrobe?

Jeans are definitely a must have in my wardrobe.

If you had to choose an accessory that you would never need to wear again, what would you choose?

I would have to say belt.

What fashion message would you like to give to the readers?

I would like to ask the readers to wear clothes that are suitable for our country's humid weather, rather than following trends that might make them uncomfortable. I would also advise them to wear shirts of one solid colour, as they tend to look more fashionable than patterned ones.
