

## IT'S WHAT WE'RE ALL THINKING ABOUT

The year after the FIFA World Cup and before the Olympics may not mean much to most of the world, but in this neck of the woods, it's party time (or hold your breath and don't move from the couch time, depending on how superstitious you are). The ICC Cricket World Cup is back, and I'm as excited as it's humanly possible.

Is Bangladesh going to win this one? I don't know. Probably not, but do I keep dreaming about it? Hell yeah! There has never been a better men's national cricket team in Bangladesh, and few teams in the world are as experienced. We've been beating teams left right and centre (mostly at home) and the talk has shifted from Bangladesh giving the bigger teams a challenge to whether or not we can make it to the semis. I have the answer to that by the way, we can.

Coming back to reality, this tournament will be tough. There are going to be 9 matches in a round robin format, with nowhere to hide if you fall into a string of bad results. An odd win won't lift you to the top of the table, but that also means an odd loss isn't the end of the world. It's The Tigers though, and you know they're going to put us through a gruelling emotional ride. But I'm ready for it, my lucky t-shirt is ready for it, and the lucky corner in my couch better be ready for it because I'm not gonna move for a long long time.

## 2D Tanks of Carnage and Fun

ARAF MOMEN AKA

Tank Stars is a turn-based 2D platform game by Playgendary where you make two 2D modelled tanks battle out in a satisfyingly destructible environment. Tanks can be moved horizontally only and you aim by setting the position, angle and power of the shot.

Up until the last update back in 2018, the game has 15 tanks to choose from, 3 of which are premium tanks, or by having a premium account. Each tank has its unique set of weaponry, and they can all be upgraded by unlocking chests to collect cards and upgrading the weapons and tanks once you have enough cards to up-

grade them.

The map type remains unchanging, but the terrain and its shapes are never the same. This randomness in the shape of the terrain adds an element that is fun to tackle. Plus, the terrain is destructible too. A drop box is dropped every 3 turns, which gives the collector a special weapon that deals massive damage. There are 4 game types: Vs Bots, vs Player, vs Online and Tournament.

My only gripe with this game is that that you have to go through a lot of grinding to have a decent tank. Other than that, the game hardly bugs out, it takes less than 5 seconds to find an online opponent and it's overall a great curb-stomper of idle time.
