

Microwave to your rescue

Eid is almost knocking on the doors and here we are, still scrambling through recipe books to perfect the food spread for the special days. While traditional items might be expected to be served, there is no harm in experimenting with foreign cuisines. Friends and family will arrive in masses to greet and deliver qurbani meat gifts, and we are definitely expected to give them a treat that's worth their while. And why not? After all, it is the joyous Eid-ul-Azha!

But daily cooking can certainly be hectic and take its toll quickly on one's stamina, therefore, the ultimate suggestion would be to cook all the dishes earlier and refrigerate it for a few days and reheat it quickly with the help of a microwave when friends arrive. To be honest, microwaves have made our lives much easier, especially with built-in features like the Heat Wave Grill and the Quick Defrost Function. With the latter, we can now defrost anything from the deep fridge in mere minutes, whereas previously, it used to take hours. So prepara-

tion time for any sort of food has become much faster. Few microwaves, like Samsung's, use the Grill Technology and heat reflectors to create that perfectly grilled cuisine, without the cook suffering the accompanying exposure to flame, heat, exhaustion and difficulty. The new cutting-edge technology in Samsung microwaves also provides many other benefits like a Ceramic Interior for easy cleaning, Automated Deodorisation — helping to eliminate all kinds of bad smells and much more.

And how ecstatic would you feel when you come to know that these microwaves also come with a neat recipe book with over 200 microwaveable recipes that can make life easier? With other functions like the Sun-Dry Masala, we can now ensure the perfect browning of masala and the Slim-Fry technology helps us enjoy healthier and less fried food.

Life has certainly become much easier and comfortable!

Wash away the grit and grime

Nobody can deny that washing machines are an integral part of our lives today. Without these wonderful machines, we'd have to spend countless hours every day to wash the laundry. And that would certainly mean less time for our personal selves and sanity.

Without these machines, we'd have to spend countless hours every day to wash the laundry. And that would certainly mean less time for our personal selves and sanity.

AddWash technology, where we can now directly click-open the washing machine door anytime between washes and add the extra laundry, without putting a stop to the washing cycle. There are so many additional benefits that the modern day washing machine provides — energy efficiency, time-saving amenities, and minimal noise provisions. Samsung's washing machines provide all of these, plus its very own Diamond Drum technology, which incorporates the special soft curl drum, designed to keep clothes from getting tangled during a spin, being damaged or have fibres plucked out. Another major benefit of their washing machines is the durability, with a 21-year VDE certified motor life and a 10-year warranty. So, if you were worried about the investment and further costs regarding the upkeep, there is an excellent after-sales service team by Samsung that would cater to all your concerns. The 10-year warranty is certainly an indication to an uncomplicated tech future, and complete faith in the product's quality.

But these machines do have their flaws, like putting a halt to the entire washing cycle if we are to put some extra clothes in... items we had accidentally forgotten to put in earlier.

Samsung made sure that these kinds of misfortune does not occur, with the

With life made easier, and all these amazing technologies, we are now able to regain the luxury of spare time.

Welcome to the new world order!
