Decorate your home with Eskay

When we think of home furniture, we think of shades of brown; hickory, umber, cedar, or brunette. Yet, contemporary furniture is redefining the concept with bold colours and unique contrasts, and Eskay toes the innovative line, bringing you an exclusive array of home furniture, featuring modern design and futuristic colours. Serving this industry for over a decade, this creative venture was initiated by Saimul Karim, the owner and designer.

Driven by creative passion and fuelled by imagination, Eskay strives to bring unique, suitable furniture to liven up your homes. They provide perfect solutions for your furniture, background, foreground, colour, and contrast, so that they all fit harmoniously and look aesthetically pleasing.

Designing and decorating your home is a worthy investment, as its impact will remain for generations to come, and Eskay is an expert in this area. They provide complete interior solutions and household products. This includes everything from majestic furniture pieces to silk bed-runners.

Eskay contains furniture that have a royal

and vintage look. These are intended to serve the upper and upper middleclass tier of the society, and will add a regal touch to your homes. As for price, it varies for various products. For instance, mirrors are available from Tk 3,500 and can go up to Tk 2,00,000. It is the exemplary situation of affordable luxury.

Along with a modern aura, they also

have a few traditional pieces that are hard to find elsewhere. The “jamdani mirror” is one such piece that features an elegant mirror along with a sideboard. An important heritage element of Bangladesh, jamdani design is carved onto the wood to visualise a wooden jamdani surface.

Another one of their best-selling products is their set of “kalka mirros.” Two mirrors are placed side by side. These mirrors have a sense of antiquity about them, and are bordered with a magnificent baroque design.

Each piece is crafted with utmost care and delicacy. The sole element of the furniture, wood, is locally sourced, while some fabric and colours are imported. Every product goes through an elaborate manufacturing process, and is prudently cut, carved, polished, and coloured. They prioritise quality over everything.

To draw an illustration, they have tuft sofas with embroidery, centre table sporting a mirror top, French chairs with floral prints, ottomans with a velvet finish, and plush fur divans. The baroque patterns, along with vintage designs, will give you a taste of royalty.

Eskay works to bring a new concept every year, mostly presenting a new colour or style. Likewise, they have furniture of vintage, crackle, and antique colours in their collection. Cobalt blue, parrot green, or cherry red, they have something to suit everyone’s taste. Furthermore, they also take customised orders.
