

Help to Heal Fighting Breast Cancer together

BRAC University Natural Sciences Club (BUNSC) arranged their day-long fund-raising event, 'Help to Heal,' on 18 November, 2019 at their Mohakhali campus. The main objective behind this event was to create awareness on breast cancer and to help fight it at the same time.

Some of the country's most renowned and favourite brands were invited to take part in the fair as vendors. There were 23 stalls — The Brand Store, Lunettes, Parmeeda, Organikare, Styline cosmetics, and Azuria to name a few.

The stall registration fee collected from all the stalls were given as fund to Community Oncology Centre, a social organisation involved in cancer screening and counselling, research on various types of cancer, especially breast cancer, and providing top notch treatment to cancer victims.

This was not only BUNSC's small token of respect and gratitude towards Community Oncology Centre, but also encouragement

for this organisation in its continuing battle against cancer, and their contribution to society.

The event also included a session where the speakers were Dr Habibullah Talukder Ruskin, preventive oncologist, Community Oncology Centre; Hosneara Poly, a breast cancer survivor; Dr A F M Yusuf Haider, Chairperson, Department of Mathematics

and Natural Sciences, BRAC University; and Dr Mahboob Hossain, Head of Microbiology Programme, BRAC University.

The event ended with the fund being handed over to Dr Habibullah, followed by certificate distribution to the participating brands.

TIPS

Baby lotion for all

With winter almost here, it is time to not only make sure your baby is well protected and warm at all times, but ensure your child's overall well-being. This also includes maintaining the pH levels of your baby's skin as well, including keeping it soft and supple with the right baby lotion.

Why use baby lotion regularly? Here are a few reasons as to why it should be an everyday staple for not just your little one.

NOURISHING

Baby lotion provides the necessary nourishments that a baby's skin requires,

especially that of a new born infant, which tends to be very sensitive, delicate, and prone to infections.

HYDRATION

Keeping the skin hydrated is not just an adult problem, your child's skin also requires the same, maybe even more so. Keeping your child's skin moisturised at all times is the best way to prevent any kind of allergic reactions and skin irritations.

SOOTHING

It is not just about protecting the skin, as baby lotion also minimises the risk of any

kind of infections, and soothes the skin. Babies need extra attention, especially their skin, and baby lotion does exactly that!

NO CHEMICALS

Always remember that baby lotion formulas are paraben free. Meaning that they are free or have a mild smell, with no chemicals or parabens in them.

FOR ADULTS

Because the formula in baby lotions make it ultra-gentle, it is also a good product for adults who have sensitive skin and a great

substitute for body lotion.

MAKEUP REMOVER

It works superbly as an effective makeup remover, even against waterproof cosmetic products. Baby lotion easily wipes all traces of makeup from the skin without disrupting the natural moisture of it. Just dab some on small cotton ball and apply it on your face. Keep it for thirty seconds and then wash your face or wipe it off with a damp cloth.
