

(ICC) and silver jubilee of its Bangladesh chapter. The greatest Bengalee of all time Father of the Nation Bangabandhu Sheikh Mujibur Rahman struggled

establishing a poverty free "Sonar Bangla". Following his footprint. able daughter Hon'ble Prime Minister Sheikh Hasina has been successfully steering the country on the "Pathway to Prosperity". Under her visionary leadership,"Economic Diplomacy" has been identified as the overarching goal of Bangladesh's foreign relations. Due to her pro-people policy interventions, we attained the key Millennium Development Goals way before the deadline and have been pursuing the Sustainable Development Goals (SDGs) with the same vigour.

Sustainable Development under the patronage of the Ministry of Finance; in Dhaka on 0-12 December 2019. My heartiest Congratulation to International Chamber of Commerce (ICC) for its 'Centenary merce (ICC) for its 'Centenary Celebration' globally and 'Silver Jubilee Celebration' of ICC Bangladesh.

In 2015 world leaders agreed upon a set of global goals for sustainable development. By committing to the Sustainable Development Goals (SDGs), the member states of the United Nations have agreed to an agenda which is a plan of action for people, planet and prosperity. It also seeks to strengthen universal peace in larger freedom. Eradicating poverty in all its forms, including extreme poverty, is the greatest global challenge and an essential requirement for sustainable development.

The major challenge to achieve the 2030 UN Agenda for Sustainable Development Goals (SDGs) is mobilizing sufficient financing. Although interests in inclusive and sustainable financing are growing from both public and private sectors, the most needed investment for SDGs related projects remain underfunded. Under this background, the United Nations has sounded the alarm that unless we revamped both national and international financial systems to be in line with inclusive and sustainable development, we will fail to accomplish the SDGs fully

I am hopeful that the Conference which is a public-private collaboration of the Asia-Pacific Region, will be able to come up with a "Road Map" for the partners to create policies that are consistent and gives a direction to the countries to realize their roles and responsibilities on financing of inclusive and sustainable development so that no one is left behind.

I wish the Conference all success

Lyn

A H M Mustafa Kamal, FCA, MP Finance Minister Ministry of Finand Government of the People's Republic of Bangladesh

blue bonds, infrastructure funds and blended finance instruments; Financing for micro, small and medium-sized enterprise; Supply chain financing to enable LDC's participation in There is also growing interest in sustainable international trade and investment; Financing and impact investing. Yet, financial markets schemes to spur the development on science, are volatile, the trade system is in crisis. technology and innovation; Proper policy and wage shares are declining which is linked regulatory approach for Fintech evolution to protect consumers and avoid financial stability risks of debt distress have increased Carbon risk and Scaling up effort for international emissions have also begun to rise again. At this development cooperation through official trajectory, Member States of the United Nations development assistance (ODA) and southsouth cooperation.

Introduction:

The global economy has suffered several costly financial crises over the last three decades. Plunging assets, major bouts of exchange, market volatility and crisis in emerging markets and collapse of several major financial

to have now peaked, with economic activity expected to continue expanding at about per cent per year. Global growth is projected to remain uneven across regions and countries. There are some good news: investment has gained strength in some countries and regions, particularly in East and South Asia, which also have large populations of poor people; inequality within many developing countries is declining; and prices on carbon markets are slowly recovering due to policy changes.

implications for Sustainable Development

Global growth remains steady, but is projected

to economic concentration increasing, and will not be able to meet the aspirations of the 2030 Agenda for Sustainable Development, with many being left behind.

Integrated national financing frameworks for sustainable development

The Sustainable Development Goals (SDGs) are comprehensive, complex and interrelated. See Page

It's good to know that International Chamber of Commerce (ICC), The world business organization is having its Centenary Celebration worldwide this year. ICC Bangladesh is also celebrating 25 years of its presence in Bangladesh

I happy to learn that, on this occasion, ICC Bangladesh has organized The Asia-Pacific Conference on ing inclusive and Sustainable Development in Dhaka on 10-12 December 2019.

Bangladesh stands to capitalize on smart improvements it has made to bolster e-commerce-friendly infrastructure. Our commercial activities are going to be digital and all current business laws, regulations and policies are being made compatible with the global wave of digital commerce revolution. Bangladesh is also being seen as next South Asian ICT destination.

Under the able leadership of Prime Minister Sheikh Hasina, MP, we, in the Ministry of Commerce are making integrated efforts in achieving Sustainable Development Goals and bringing an end to poverty and inequality.

I praise the initiative of ICC Bangladesh in organizing this Conference jointly with United Nations Economic and Social Commission for Asia and the Pacific (UN-ESCAP), Asian Development Bank (ADB), The London Institute of Banking and Finance (LIBF) under the patronage of the Ministry of Finance, Government of Bangladesh

I hope the deliberations during the 3-day Conference will help in imitating a road-map for achieving the SDGs by 2030

I wish the conference to be a splendid success.

Joy Bangla, Joy Bangabandhu.

Sty Jan 2

Tipu Munshi, MP Minister Ministry of Commerce Government of the People's Republic of Bangladesh

Bangladesh is on the right track to graduate into a developing country by the year 2021 and a developed country by 2041. Our annual GDP growth rate has increased from 4.5 percent in 2006 to 8.13% last year. Below poverty level decreased almost half with a reduction from 42 percent in 2006 to 21.3 in 2018. We have elevated ourselves from the status of an LDC to that of a lower middle-income country.

The investment regime in Bangladesh is one of most friendly among the competing nations. Thanks to the Government's revolutionary initiatives, the power sector capacity has been enhanced remarkably over the last one decade; the percentage of people having access to electricity has gone up to 94% in 2019 from 47% in 2010. The Payra deep-sea port started basic operation in August 2016. The country's road infrastructure has also been broadened and modernized in the last one decade. The Dhaka metro rail project is expected to kick off from next year. The government mulls to set up one of the most modern large-scale international airport for which site has already been designated.

Bangladesh has the advantage of youth bulge. The fresh university graduates are IT literate, proficient in English and fast learners. The IT sector has been enjoying the advantage of a thrust sector for a long period of time. Bangladesh has all the prospects to emerge as an IT hub in the region. We seek investment in the Special Economic Zones and hi-tech parks.

I hope that the ICC event would be a great success in terms of projecting Bangladesh as a trade and investment destination.

I wish the Conference a grand success.

Joy Bangla! Joy Bangabandhu!

Dr. A K Abdul Momen MP Minister Ministry of Foreign Affairs Government of the People's Republic of Bangladesh

I congratulate the International Chamber of Commerce in Bangladesh on the anniversaries you are observing on this occasion.

Message

Thank you for your commitment to the Sustainable Development Goals. Despite considerable advances, we are not on track to achieve them by 2030.

That is why I have called for a Decade of Action.

Financing is essential, and requires deep changes in both the public and private sectors. It is crucial to align global economic policies and financial systems with the 2030 Agenda for Sustainable Development and the Paris Agreement on Climate Change.

We need to scale up climate finance and invest in climate resilience.

We must also harness new technologies to provide equitable financial access for all, especially women and micro, small and medium-sized enterprises.

With adequate and innovative financing, we can build an inclusive and sustainable future for all.

Thank you

António Guterres

M.A. Mannan MP Minister Ministry of Plannin ment of the People's Republic of Bangladesh

Joy Bangla! Joy Bangabandhu!

Message

On the auspicious occasion of 100 years of International Chamber of Commerce, The world business organization in 2019, it is very welcome news that International Chamber of Commerce (ICC) - Bangladesh has organized The Asia-Pacific Conference on Financing inclusive and Sustainable Development in Dhaka on 10-12 December 2019 focusing on the theme of Exploring a New Financial Landscape for Asia and the Pacific

We know International Chamber of Commerce headquartered in Paris was established in 1919 in the backdrop of devastating post World War I. We have always appreciated the global role this unique organization has played since its very inception.

We are aware of the current global concerns of multilateral trade where fair international competition is hindered by continuing high barriers and lesser state support, and also of areas where trade rule-making has not kept pace with changes to the global economy. We also know that market distortions remain significant barrier in the key areas of global trade.

We appreciate the ICC identified intervening areas namely reliable and cost-effective sources of financing, effective regulations to allow business to contribute to economies and societies, increasing dependence on information and communication technologies (ICTs), economic and social benefits of diversity, role of business in global governance, innovation and intellectual property (IP) systems, counterfeiting and piracy, trade and investment and overall responsible business.

Under the historic and visionary leadership of Prime Minister Sheikh Hasina, MP, we, in the Ministry of Planning are working dedicatedly to translate her visions into reality and assist various ministries of the government in appropriate planning of their activities to reach the target of Sustainable Development Goals.

ICC Bangladesh, now in its journey for a quarter of century, has been playing a significant role since its inception in the development and the growth of external trade and investment of the country.

The conference on Financing inclusive and Sustainable Development organized by ICC Bangladesh will address many of the emerging issues and challenges.

I strongly believe that this conference of the prominent personalities of the business world will be of practical use in our collective efforts in achieving SDGs in the Asia Pacific Region I wish the conference a success.
