## SPONGY TIMES

Who lives in a pineapple under the sea? Not you of course! Who lives in a single bedroom apartment under crippling depression and student loans is more accurate. Taking our childhood of watching hours of *Spongebob Squarepants* on the TV and not having to worry about the economy going into doom for granted was not the best decision. At least we have a new movie, *Sponge on the Run*, to forget about present times for a few hours. This movie won't be all smiles though; Gary is missing! Don't worry just yet. We have the trusty duo of Spongebob and Patrick to go on a quest to find him. Luckily, they will be aided by the one and only Keanu Reeves...who is a tumbleweed (a sage one though). Fans are speculating that this movie may be a secret extended version of the episode, 'Gary Come Home'. How likely that is, we don't know. But, the thing that peaked everyone's interest was the lack of a rating on the movie. Let's hope Spongebob can mind his sponge-mouth and keep this kid-friendly. Till May 22, 2020, folks!
