INFO	RMATION FOR APPLI		
15.	Brief description of the assignment	The spirit of formation of Investment Corporation of Bangladesh (ICB) was to assist capital market of Bangladesh. For the last several years (especially in FY 2018-2019 and 2019-2020) ICB has been facing continued losses and thereby losing equity. The situation has been worsened by failure to collect debt from manufacturing industries and non-banking financial organizations which are not directly related to stock market. In many cases where ICB has financed in stock eventually became 'Director' of the company and while holding this position ICB could not sell their portion of stocks (when portfolio was in profitable stage) due to locking status of the stocks. This has significantly reduced ICB portfolio value. Even though government subsidy package has been given several times to capitalize ICB, yet the situation has not been improved. At this moment government needs to assess whether subsidizing ICB will be appropriate or not. The need assessment can be found by analyzing overall operation of ICB, list of tasks ICB has accomplished so far according to the mandate, role of ICB in the field of current securities market of Bangladesh, condition of ICB's financial and non-financial resources, ICB's governance, organizational and legal structure, manpower capacity and finally by analyzing applicability of similar type of organization in other parts of the world.
