Japan exports fall as China, US demand weakens

REUTERS, Tokyo

Japanese exports fell much faster than expected in February as US and China-bound shipments weakened, a source of concern for the world's third-largest economy as it tries to prop up growth.

The prospects for a US recovery may ease concerns about the outlook for Japan's economy, however, which is seen slowing in the current quarter due to new COVID curbs that have hit service-sector activity.

Ministry of Finance data out on Wednesday showed Japanese exports fell 4.5 per cent year-on-year in February, hurt by decline in US-bound shipments of automobiles.

"Japan's export growth has probably weakened this quarter, but uptrend remains intact," said Masaki Kuwahara, senior economist at Nomura Securities.

"The Chinese economy will resume recovery once a renewed rise in infections fades, and the vaccine rollouts and huge stimulus will give a boost to the US economy, all of which should help accelerate Japan's exports and broader economy in April-June."

It was the first decline in three months, following a 6.4 per cent gain in January. It was also much bigger than a 0.8 per cent drop expected by economists in a Reuters poll.

By region, exports to China rose 3.4 per cent in the year to February, led by chip-making equipment, nonferrous metals and plastic, slowing sharply from a 37.5 per cent gain in the prior month due partly to the Lunar New Year holidays that fell in February.

US-bound shipments, another key export market for Japanese goods, declined 14.0 per cent year-on-year in February, dragged down by automobiles, airplane parts and motors, after a 4.8 per cent drop in the prior month and posting a fourth straight month of declines.

Some businesses thrive, others ache during pandemic

AFP, Paris

The coronavirus pandemic initially brought the global economy to a halt but business adjusted, with the more nimble taking advantage of the move online while others struggle to find a way forward. Here are some of the economic winners and losers of the Covid era so far:

Lockdowns, curfews and travel restrictions all seemed to play to the strengths of Amazon, which pioneered the transition to online retail. The company headed by Jeff Bezos, who started out selling books and losing massive amounts of money, seemed perfectly suited to the changed times as bored and anxious consumers confined to their homes stocked up. The results were stunning -- a 40 per cent increase in sales to \$387 billion dollars last year.

The home food delivery business also came of age as people dined-in instead of out, with restaurants and bars either restricted or closed completely. Anglo-Dutch group Just Eat Takeaway saw its revenues soar 54 per cent to 2.4 billion euros while British competitor Deliveroo jumped 64 per cent to 4.1 billion pounds.

What else is there to do if one cannot go out except slump on the sofa to watch television and play video games while munching on your latest dine-in delight? With the cinema out of bounds, the home-based version took off big time, with Netflix building an audience of 200 million on an offer of high-class films and series typified by "The Crown," the story of Britain's Queen Elizabeth II. Disney, not to be left behind, launched its Disney+ service late 2019 and had

95 million subscribers by early 2021. Among the game makers, Sony and Microsoft launched new consoles and ramped up sales.

Families also played more classic games, with Danish toy brick maker Lego enjoying a new lease of life in

helping keep children -- and adults -- amused and busy for long periods of time. The family-owned business chalked up a 19 per cent rise in net profit to a record 1.3 billion euros last year.

Air transport was probably the

worst hit sector, with thousands of aircraft mothballed worldwide. Predictions for a return to a semblance of normality have progressively been put back, with industry groups now looking to 2023 or even 2024. Legacy flag carriers such as Air France and Lufthansa chalked up huge losses -- of 7.1 billion euros and 6.7 billion euros respectively -- and required huge state bailouts to keep them going.

The low-cost operators such as EasyJet and Ryanair adapted faster than their older peers but could not escape the impact of the near total collapse of air travel. Ryanair's Michael O'Leary lambasted governments for bailing out the older carriers he believes do not deserve to be in business and he insisted the crisis was also an opportunity to finally restructure the industry.

European new car sales drop 20pc

REUTERS, Berlin

European car registrations fell in February, industry data showed on Wednesday, as coronavirus lockdowns and accompanying uncertainty across Europe took a toll on sales.

New car registrations dropped by 20.3 per cent year-on-year to 850,170 vehicles in the European Union, Britain and the countries of the European Free Trade Association (EFTA), figures from the European Automobile Manufacturers' Association (ACEA) showed.

Most European markets posted declines. Registrations in Spain registered a drop of 38 per cent. Sales in France and Germany, fell by 21 per cent and 19 per cent respectively, while Italy reported a smaller drop of 12 per cent in the month. Sales at Volkswagen and Stellantis dropped by 19 per cent and 22 per cent respectively, while Renault reported a fall of 29 per cent.

Luxury automakers also posted losses in February with sales at BMW falling 13 per cent and rival Daimler reporting a 20 per cent decline.

Europe's carmakers are counting on sales in China, which hasn't reintroduced a coronavirus lockdown, to boost 2021 sales, after a rebound in the world's largest market helped the industry recovered faster last year.
