# Payra rail link to cost Tk 40,000cr

BR feasibility study finds

TUHIN SHUBHRA ADHIKARY

The government has to spend more than 40,000 crore to bring Payra Sea Port in Patuakhali and Barishal under the rail network, a study says.

The construction of 214.91 kilometre rail line from Faridpur's Bhangta to Payra port, the country's third sea port, via Barishal would cost Tk 40,701.22 crore, according to a feasibility study conducted by Bangladesh Railway.

However, the project cost would be Tk 44,497.60 crore if the authority wants to build 25km elevated line on the route where the land lies very low. To construct the elevated line, the embankments would have to be built at a high height.

All the information came to light as the project officials and consultants made an elaborate presentation on the scheme at a meeting on Monday, with Railways Minister Nurul Islam Sujan in the chair.

With six districts, Barishal division is the country's lone division without having any railway connectivity.

**REPAIRING DAM THEMSELVES**

## Locals sling mud at MP, chase him away

STAR REPORT

Waterlogging, erosion and inundation caused by absence of sustainable embankments have made their lives miserable over the years.

Whenever any cyclone, storm or flood hit Khulna's Koyra upazila, the existing fragile dams got breached, resulting in inundation of the entire area.

Few days later, the authorities concerned repair the dam shakily. If any disaster occurs later, the dams get breached again.
