

Hairstyles to LOOK OUT *for*

If the lockdown has been taking a serious toll on you, our suggestion would be to shift focus somehow and concentrate less on the surroundings and more on yourself instead. The best way to beat the stress might be through getting a fresh haircut, or even a relaxing facial with new ingredients available in the kitchen. Additionally, its summer plus monsoon, a unique season, blended together like a sandwich. The rising humidity in such a confusing season encourages shorter hairstyles that have also been trending for some time now.

With a fresh haircut, completely different from what you are used to, it is expected that the stay-at-home glum will eventually be forced to exit.

A quick Google search gives us many new hyped-up hairstyles. And it becomes really confusing as to which one to exactly pick. Here's where we come to help by suggesting what's trending for the moment and what's definitely out of style.

THE DIANA BOB

The ever-famous hairstyle by the princess of hearts had been trending in the early '90s and thanks to the popular Netflix show, *The Crown*, the style has somewhat fallen back on track. If you are a big fan of the monarchy, then this is definitely one style that you should try out.

BANG! POW! BANG

Who doesn't admire a fluff of straight-cut bangs? It surely transforms a girl directly to the '70s era of hippie fashion. Yes! You are correct, the bangs are in again but with a catch, they must be paired with the super-versatile collar length bob. Go on. Try this one out and feel as pretty as your favourite actresses of the past.

BLUNT BOBS BLOOM

You are worried that a blunt cut will make your hair look and feel stiff? Nothing can be farther from the truth. Ask your stylist to add a bit of layering at the bottom for the perfect retro vibe. These sort of blunts go with any hair texture and type. Just make

sure that if you have really dense hair, you need to request the hairstylist to slightly thin your tresses to make the fall show up perfectly.

NOTHING BEATS A CLASSIC: THE PIXIE

You want a look that is both classic and sophisticated, and yet super trendy and cool. The pixie cut may be your best bet. If you have the face for it, we say go for it.

GOING OVERBOARD: THE BUZZ CUT

You have had enough of hair already and want a complete change in your looks. Buzz cut maybe the ultimate solution. But let us remind you once again, this cut is certainly not meant for the faint-hearted. If you think you can't pull this off easily, we say go for its close cousin, the pixie cut instead.

Here, we have discussed many interesting cuts for the new season. Our main interest: being able to make people in general feel a little bit better about themselves. And what can be better than a 360-degree transformation with those beautiful tresses? So, stop feeling miserable about the many lockdowns and start experimenting to feel the excitement once again!

Just like always.
