Positivity rate drops for 10 days straight

'Nation losing patience'

India's SC to govt on urgent need to weed

out criminals from electoral politics

criminal

STAFF CORRESPONDENT

The positivity rate has declined for the 10th consecutive day yesterday.

The country recorded 10,420 new Covid cases yesterday but over the last 10 days Bangladesh has been recording over 12,000 new daily cases on average.

Yesterday, the positivity rate was 23.45 percent while it was around 30 percent on August 2.

Experts said this decline was an impact of the countrywide lockdown that was lifted yesterday. They warned the infection may rise again as more people would go outside now.

Yesterday, the country logged 237 Covid-19 deaths, which matched a previous daily record on August 5, taking the death toll to 23,398.

The number of deaths on the first 11 days of this month was high -- more than 246 a day on average -- because of higher infection rates, according to the Directorate General of Health Services (DGHS)

In the preceding 11 days, more than 214 Covid deaths were logged a day

has been living in the neighbourhood for the past 26 years.

And yet, neither the BSCIC

Dhaka division has the highest number of offending units (22), followed by Chattogram at 16, according to a report prepared by the Industrial Estate Division of BSCIC.

The Industrial Estate Division classified the 48 industrial units as red and orange.

factories while the remaining four are in Khulna, said the report.

waste, it is mandatory to set up ETPs, according to BSCIC guidelines. But the BSCIC do not have the

ETPs, and so the owners have been shelving their plans to set up the facility, according to sources. One such offending factory is Compliance Fashion and Design,

which produces 100 litres of waste that is dumped in the drain every day. "We are not financially solvent. We need some time to build the ETP," Nazmus Shakib, one of the owners of Compliance Fashion and Design, told

The Daily Star. But Union Industries, a carton

setting up the waste treatment facility following pressure from the BSCIC and the DoE.

decimals of land. At least 14 decimals of land are required to set up an ETP. Where do we get the land?" said Farhan Hossain, manager of the company.

Two years ago, the BSCIC had a plan to set up a central ETP in the industrial city, but the plan has not been implemented yet.

"This could have been a great help for many of the industries," Hossain said, adding that the factory's ETP will take another three to four months to come through.

deputy director of DoE of Gazipur, said he was not aware of the BSCIC report.

"The Tongi Industrial City in BSCIC requires ETPs. There is no scope to run such a factory without an ETP," he

(environmental clearance) of DoE, also said he was not aware of the BSCIC report. "It is not in our knowledge that so

without ETPs. We will talk to BSCIC shortly and take appropriate action," he added.

"The BSCIC has not been successful anywhere because it did not take the required measures," said Sharif Jamil, general secretary of the Bangladesh Poribesh Andolón.

On the other hand, the DoE has long been saying that it does not have the sufficient budget and manpower to monitor the industries properly.

"Both institutions are not exercising their authority to ensure that factories do not flout the rules. The law has to be changed. The punishment has to be increased," Jamil added.

BSCIC Chairman Md Mostaque Hassan said they sent letters to the DoE many times asking them to identify the factories with no ETPs.

"We cannot mete out punishment to the violators. But the DoE has the legal right to punish them. We are giving the owners some time for setting up the ETP and if they cannot comply with it, the DoE can fine or shut them down," he added.

Regardless, for the sake of the longsuffering neighbours like Rubiya and the environment, one has to keep one's fingers crossed that the DoE steps up sooner than later.

"We, the residents of the area, sent a letter to the BSCIC and the Department of Environment for a permanent solution to our misery. We even talked to the local commissioner, who advised us to go to the mayor. We got assurances, but the problem persists. Had we not owned the property, we would have been long gone," said a

Furkan planned

He was lured into extremism by contents on a social media account in 2016, and then joined the Neo JMB under the guidance of the outfit's then

As a chemistry student of Jahangirnagar University (JU), Furkan quickly became an expert in making IEDs after joining the outfit.

A number of top Neo JMB leaders have been killed in law enforcement's continued anti-militancy drives since 2016, which had caused Furkan to go into hiding to avoid arrest.

But recently, under the leadership of the outfit's current chief Mahadi Hasan Jon, Furkan has started providing training to make remotecontrolled IEDs and grenades.

The CTTC have also arrested two other Neo JMB members and associates of Furkan on Sunday Saiful Islam Maruf alias Basira and Rumman Hasan Fahad alias Abdullah.

Explosive materials, three cell phones, a tab and remote-controlled devices were also recovered from the arrestees' possession.

Md Asaduzzaman, CTTC chief, disclosed the arrest while addressing a briefing at the media centre of Dhaka Metropolitan Police yesterday.

He said in the last few years, Neo MB tried to conduct IED attacks on

10 to 12 police outposts. "The IEDs were of the same pattern.

Those who make the bombs have been arrested in various raids, but new ones have been found," he said. Furkan used to provide the training

to make IEDs, according to CTTC officials.

"When any member of Neo JMB contacted Furkan about making IEDs, he [Furkan] would open a new social media account to make video calls and train the member. Once the training was complete, Furkan closed the account and changed locations to remain traceless," said a senior official of the counterterrorism unit, equesting anonymity.

CTTC chief Asaduzzaman said Furkan was a meritorious student but he was not able to complete his Masters as he left home to join Neo Asaduzzaman said another arrestee,

Saiful Islam, was a skilled IED maker and received online training from Furkan. In primary interrogation, Saiful

admitted that he had been involved in several IED attacks, he said. As per the outfit's decision, both

Saiful and Rumman migrated to Bandarban to receive military training. They rented a house in Tongi

recently and committed robbery there o generate funds for the outfit, said the CTTC chief. A case was filed with Kafrul Police

Station in this regard. MEETING WITH SOME ROHINGYAS According to CTTC sources, Furkan

tried to go to Rakhine state in Myanmar five times since 2017, but failed. "Furkan even managed to invite

some Rohingyas to join Neo JMB and asked them to open a branch of the outfit in Rakhine," said a senior CTTC official, requesting anonymity.

CTTC chief Asaduzzaman said Furkan had held multiple meetings in Rohingya camps with the aim of expanding the organisation's activities. 4 ANSAR AL ISLAM MEMBERS

ARRESTED Members of police's Anti-Terrorism Unit (ATU) said they arrested four members of the banned militant

group Ansarullah Bangla Team, also known as Ansar al Islam, from Dhaka's Rayerbagh area early yesterday. The arrestees are: Raihan Hossain,

Tanvir Hossain, Aminul Islam and Sagar Islam.

A team of ATU arrested them during a drive around 4:00am along with four mobile phones, two knives and some extremist literature, said Aslam Khan, special superintendent (media and awareness) of ATU.

They were active on social media disseminating extremist contents and trying to recruit new operatives for the militant group. They used to communicate with each other through end-to-end encrypted apps, he said.

A case was filed with Kadamtali Police Station in this regard.

immediate action. According to Forest Department data, the country lost 90 elephants by direct killing between 1995 and 2016.

Despite the frequent killings, the Forest Department could not bring any offenders to book since the government formulated the Wildlife Conservation Act-2012.

As per the law, elephant killing is a non-bailable offence and offenders are jailed for a minimum of one year and up to a maximum of seven years. Besides, a fine of Tk 1 lakh at the lowest and Tk 10 lakh maximum is imposed for the offence.

CORRIDORS THREATENED

In the last three years, three out of the 12 recognised corridors in Cox's Bazar were blocked due to large structures and the Rohingya camps.
