CNN to shut down streaming service a month after launch

CNN has announced that it will shut down its brand new streaming service, CNN+, just after a month since its launch.

Launched on March 29 and deemed an important milestone for the international news channel, the much-awaited CNN+ will officially shut down on April 30.

The decision was made by new management after CNN's former parent company, WarnerMedia, merged with Discovery to form Warner

Bros Discovery earlier this month, CNN Business said.

"While today's decision is incredibly difficult, it is the right one for the long-term success of CNN," Chris Licht, the incoming president of CNN, wrote in a memo to staff, according to the New York Times.

"It allows us to refocus resources on the core products that drive our singular focus: further enhancing CNN's journalism and its reputation as a global news leader."

CNN+ was launched with the network investing tens of millions of dollars in the venture and running an aggressive marketing campaign as it tried to break into America's competitive streaming marketplace.

It had also lured talent from other networks including former Fox News anchor Chris Wallace.

Hundreds of CNN+ staff, many of whom had only just been hired, were told of the decision to close on Thursday.

Over 800 eco-friendly Bangladeshi businesses operating on Instagram: Meta

Meta, the parent company of Facebook and Instagram, recently revealed that there are more than 800 eco-friendly Bangladeshi companies which are operating on Instagram.

Meta recently announced impactful ways through which people can learn more about sustainable living and take action on Earth Day. This announcement comes at a time when people in Bangladesh are taking a keen interest in climate change and finding ways to show up for the environment.

More than 2 million Bangladeshis are part of at least one Facebook group dedicated to the discovery, protection, and appreciation of the earth and the

environment, according to Meta's statistics.

As Facebook Marketplace is available in Bangladesh, people can buy and sell second-hand items in their local community and beyond - from bicycles and plants to clothes and home decor.

"Every day, thousands across our platforms rally together to connect and take action on climate change, whether it is engaging in a Facebook Group or practising sustainable tips from a creator. I'm heartened to see that this is no exception in Bangladesh. Earth Day is a vital reminder that all actions, both big and small, can make a difference in protecting our planet," said

Siddharta Swarup, Social Impact and Communities Lead for APAC at Meta.

Meta has partnered with renowned illustrators to release specially designed Earth Day stickers and features on Messenger and Instagram starting this week so people can express their commitment to the environment. They can also create their own word effects and 3D avatar stickers to show their support for climate action.

Meta's global operations are now 100% supported by renewable energy. The company has set an ambitious goal of achieving net-zero emissions across its value chain and being water positive by 2030.

EDITOR'S NOTE

Pivot! Pivot! Pivot!

When we start our university lives, chances are that we might be jumping into something on a whim or compelled to study certain subjects against our will. As a result, we might end up reshaping our careers completely. Today's cover story features how you can fit into a career path that your degree did not prepare you for. We also look at how job-hopping can make or break your career.

The hardcore collectors of diecast model cars recently came under the same roof. We cover their vast collection in today's Shift.

We also prepared listicles of daycare centres for working parents in Dhaka and the top gadgets you can buy with your Eid bonus/Eidi in today's Spotlight and Bytes, respectively. Also, take a quick look at our GoPro guide, if you plan to get something extra fancy during the Eid vacation.

That's about it.

WALTON launches new gaming laptop

Walton has launched a new model of a high configured gaming laptop, the Karonda GX712H. The device is equipped with Intel's 12th generation processor, NVIDIA GeForce RTX 4GB graphics, 16 GB DDR4 RAM, 512GB solid-state drive and many more advanced features.

Priced at Tk. 129,990, the new gaming laptop can be purchased with only depositing money equivalent to one month's instalment as Walton is providing a 12-month instalment facility with zero interest and no down payment

for laptops, desktops, All-in-One PC and Tab under 'Eid Ullash' offer which is available until the moonlit night of Ramadan.

Customers will get genuine Windows 10 Home with the laptop. The new Walton gaming laptop features a 15.6-inch full HD Matte IPS LED Backlit Display with a 144Hz refresh rate while the screen resolution is 1920x1080 pixels.

The laptop is powered by Intel's 12th generation 3.50 GHz Core i7 12700H processor. It has a 3200MHz 16 GB DDR4 RAM which can be

expanded up to 64 GB. There is a 512GB solid-state drive with NVMe PCIe Gen 3X4 interface.

This device sports an NVIDIA GeForce RTX 3050 model with 4GB GDDR6 video RAM as graphics to run powerful and heavy games effortlessly. There is also an integrated Intel Iris Xe Graphics.

The laptop weighs 1.9 kg with 359.5mm width, 238mm depth and 22.7mm height. Customers will get two years after-sales service for the laptop from the Walton service centre.

IMPORTANT FACTORS TO CONSIDER Job hopping

AHMAD TOUSIF JAMI

Starting a new job is almost always a challenging experience. A proper decision can be significantly rewarding, while a wrong decision may be fatal for your future career. Therefore, it is essential to think critically before making a final decision. If you are considering hopping on a new job, this is for you.

What will you learn?

Each job comes with a new learning opportunity. New responsibilities enable you to learn skills tailored for those specific duties, and a new workplace requires you to learn to adjust to the workplace norm. Some jobs help you improve a particular technical skill, some help improve interpersonal skills, while others allow you to develop people skills. You should prioritise the learning opportunity that interests you and aligns with your future career plans. "In different stages of job life, your key considerations of joining may vary. But the core objective is to catch

the growth trajectory and shape the learning curve," says Zafir Shafiee, entrepreneur and Director at a leading IT company. "There is no end to learning new skills and getting better. However, your long-term vision should be clear, and future planning needs to be in place before joining anywhere," he adds.

Does it offer enough financial stability?

A job without financial stability will restrict your learning in that position. A financial concern will remain at the back of your head and will trickle down as stress blocks your workflow. Furthermore, if your employer is paying you less than your deserved salary, you will constantly feel that the remuneration is unfair. A job that pays well will allow you to be more content and productive with both work and life. If you cannot find a job that offers total financial stability, you may prioritise the position that provides the most security among all your options.

Is the experience worth it?

Every job is a new experience. Job experiences are always subjective and vary among individuals. Enjoying the workplace or getting along with your employer are key factors contributing to the overall professional experience. You may also consider whether the job presents enough challenges to stimulate you. Furthermore, it is essential to note whether the depth of the experience adds to your professional profile. If the position does not elevate your profile, you may not put it on your priority list in case you have better alternatives available.

Are there opportunities to develop your skills?

In most instances, the more challenging a workplace is, the more you can develop your skills there. Demanding tasks require you to keep composure, stay patient and strategically deal with the work while learning to do it yourself. Moreover, it allows you to explore and enhance your interpersonal skills. If your workplace has a training program modality that will enable you to learn from experts, that is also helpful since you will learn directly from their experiences. On the other hand, if the position does not offer scopes to enhance your skills, you may not prioritise the job because it will not make you a more competent individual. "Always keep a positive mindset at all stages of your career," says Kazi Md. Asif, co-founder and CEO of a reputed marketing agency. "Before stepping into a job, you should critically think if you will enhance your skills from the position," he adds.

Are there any scopes for networking?

Networking in a professional career is one of the most crucial tools. Networking allows you to foster a relationship that enables long-term mutual benefits. Whether through collaboration on a work project or calling in favour in a time of need, networking is required in every step. Networking also opens up new opportunities for you if you put in the effort to create a positive impression and be noticeable. You may prioritise a workplace that will allow you to network more to make your professional life easier, boost your confidence and open new doors. According to Md. Asif, the scope of networking with a long-term vision should be a key factor of consideration before starting a job. At all levels of your career, networking will enable you to enhance communication with your colleagues, and superiors, he says.

Building a stronger and safer nation for 70 years

Our victories are for the people

DIEHARD DIECAST CLUBHOUSE

AHBAAR MILKY

Members of Club Diecast held its very first meet last month, on March 26, as diecast collectors, aficionados and friends and families all came under one roof in Thai Emerald, Gulshan.

Twenty plus tables displayed and showcased the scaled pride and joys of diehard model car collectors, from 1:64 scales to 1:12 and everything in between, while newbies had the chance to dip their feet into the world of diecast collecting, thanks to some sellers setting up shop.

Naturally, one would find themselves in serious trouble here if they were to mistakenly refer to the model cars on display as toys. Formed by the

ex-members and admins of Diecast Car Club Bangladesh, the Facebook group has now garnered over 300 like-minded members and collectors alike.

The display section was chock full of expensive model cars, some costing as much as, if not more than a 1:1 car, such as a pair of 1:12 scale McLaren F1 and SLR on display, or the pair of 1:18 CMC Mercedes.

Even though I left empty-handed for the very first time from a diecast convention, the display of a certain Mercedes collector's 1:18 collection of just Benzes in all scales left me in awe.

PHOTOS: AHBAAR MILKY

Fitting in a job your degree didn't prepare you for

RAHNUMA AZIZ NISA

Most of us need to choose our college degree pretty early in life. It is anything but easy for an eighteen-year-old to decide what career path to pursue. Jobs on top of the pay scale, subjects in demand, necessary skill-building opportunities - they can all die out in just a few years due to the dynamic shifts in the job market. What's worse, many of us feel the absence of a mentor to help us choose our career paths.

Importance of a degree

If you are reading this, chances are you are looking for a job that is unrelated to your degree. Or maybe you are in a tough spot where your degree doesn't quite match the career route you're planning to take. Let us tell you why that is okay.

Your degree doesn't define you, but your skills do. As a matter of fact, only 27% of university graduates work on a job that is related to their major, according to a recent study. While a university degree is supposed to be a useful tool to work your way into a job sector you'd prefer, statistics clearly disagree.

It's not uncommon for many of us to lose interest in our major after experiencing the learning process. A lot of us have degrees that don't even have a definite career path in the traditional sense. The only solution in such a situation is a change in career, or at least start considering one.

Formal education vs skill

Your degree is a milestone in your life. For most competitive job positions, your degree will work as a prerequisite. But the field does not have to be as strictly relevant as you think.

In fact, most entry-level jobs these days require people with a bachelor's degree, good communication skills and apt knowledge of the

work criterion. It is important to get a headstart and build a skillset suited for a variety of jobs, such as basic typing and editing skills and adequate tech-savviness. Building your skills is what will ultimately prepare you for a job you weren't ready for.

Know your strengths and weaknesses

While it will be hard for you to fit in a job sector that is unrelated to your degree, you need to keep an open mind.

"Read a lot of books and articles related to the career you are willing to pursue. Observe the professionals of that particular field, their success and failure and the tasks and challenges they faced. Last but not the least, study the way they overcame their hurdles," advises Taslima Mozumder, a CSE major currently working at a startup firm.

Take career assessments. Make a list of all the available options. It is important to have a career that is fulfilling. So don't make hasty decisions. Take your time. Ask a mentor if possible. And remember to network with professional people of all age groups.

Does your desired career path suit your needs?

Pursuing your passion and chasing your dreams are undoubtedly important. But looking out for the downsides of your chosen path is important as well. Money is a key factor in everyone's life. But it's not all you should be concerned about. You can use your talents properly if you're getting enough creative freedom. If you can make a difference through your work, then why not pursue your goals? But you have to remember that it's important to work hard, no matter what goals you chase.

The 'deal makers' and the 'deal breakers' Different people have different priorities. But

most people value trust, integrity and mutual understanding. "Being in a different industry, I got myself the opportunity to learn and explore new things. After graduation, I didn't do any job related to my finance degree, but I don't regret it because I love what I do now," says Rafia Noor, finance major working at an AI-based HR technology firm.

Having a like-minded group of coworkers help a lot. "I have an incredible team that constantly encourages me to learn and appreciate every small achievement of mine. The finance degree has given me the power to evaluate things like where we should invest and what's the most profitable investment," she adds.

There are also certain deal breakers in the workplace. If your working environment gets toxic, you should think carefully and consider switching jobs.

Patience is the key

You can't start at the finish line. You will face certain challenges no matter what career you choose. Maybe you didn't learn much about your current job field from your degree. But you cannot be that way forever.

"The human brain can be easily contoured with proper learning. If anybody finds passion in things they didn't learn earlier then it's never too late to start," says K. M. Kayes Ibne Zakir, EEE major working at a leading pharmaceutical company.

While it may be challenging to have to start from the bottom line, it is vital to gradually learn all the relevant skills. Have patience and take your time. Divide your learning goals into short steps. You will find it amusing just how fast human beings can adjust to new environments.

Top gadgets you can buy with your Eid bonus and salamis

From Tk. 10k to 30k

NAVID HOSSAIN

With Eid comes extra cash in the form of Eidi and Eid bonus. To solve the ever-present dilemma of putting Eidi and Eid bonus to good use, here is our list of products and gadgets to help make your post-Eid shopping decisions easier.

FOR MUSIC LOVERS

JBL Tune 230 NC TWS

The JBL Tune 230 NC TWS is the perfect daily driver focusing on the warm side of music. Its proper sound staging and bass hit the spot. The music is more focused on the mid-range frequencies, meaning a balanced amount of instruments and vocals. With the box charger, this lasts 30 hours without Active Noise Cancelling, ANC, and solid 10 hours of playback. With ANC it goes 24 hours and 8 hours of playback.

Available at: Gadget and Gear, Gadget & Gift.

Price: Tk. 7,990/-

Skullcandy Push Active and Push Ultra True Wireless

A True Wireless with a proper dynamic driver is a hard find. The Skullcandy Push Active and Push Ultra are almost identical in performance with the main focus on bass. This also focuses on midrange frequencies. They both have the same voice command features too. The difference lies in the design. The Push Active is more of a daily use device and the Push Ultra can be used roughly. The Active has an in-ear design while the Ultra has an over-ear. The Active with the case can go up to 34 hours and playback of 10 hours, which is 4 hours more than Pus Ultra. But the Push Ultra is water-resistant, making it perfect for rough use.

Available at: Gadget and Gear, Apple Gadgets Bangladesh

Price: Tk. 8,999/- and Tk. 9500/-

Edifier Hecate GX07

If you are a gamer looking for something comfortable, cool-looking, and convenient? Then Edifier Hecate GX07 is for you. This true wireless earphone

focuses on the high range, meaning vocal and clarity oriented. All thanks to the 8 mm complex diaphragm. With the box charger, this earphone will give a total of 24 hours of use and every 15-minute rest can add 2 more hours of usage. This also comes with ANC.

Available at: Gadget Monkey BD, Gadstyle BD, Techland BD

Price: From Tk. 9,000/- to Tk. 8,300/-

FOR THOSE SEEKING A NEW PHONE:

Samsung Galaxy M32

Samsung Galaxy M32 comes with a 6.4 inch super AMOLED display, 64GB internal memory with 4GB RAM, 128GB internal with 4GB RAM and 128GB internal with 6GB RAM. It has 4 main cameras - 64 MP, 8 MP, 2 MP and 2 MP, with a 20 MP selfie camera.

Price: From Tk. 23,999/-

Available at: Samsung Official Retail Shops, RIO International, Al-Islam Gadget Zone

Realme 8 5G

Realme 8 5G has In-Plane Switching Liquid Crystal Display, IPS LCD screen and a 6.4-inch display. This phone has a triple camera set-up with 48 MP, 2 MP and 2 MP, and a 16 MP selfie camera. It can shoot good quality videos as well.

Price: From Tk. 19,200/-

Available at: Vivo Official Brand

Shops, RIO International

FOR THOSE INTO MAKING PODCASTS/VLOGS:

Rode NT USB Mini

Be it streaming video games or recording a podcast from home, the Rode NT USB Mini got you covered. It is a simple USB microphone with a volume knob upfront. The knob helps control the amount of noise

it captures. The audio quality of this is impeccable. All you have to do is plug it in. It also has a headphone jack built-in, so both headphones and mic can operate via USB.

Available at: Gears4EDM

Price: Tk 12,000/-

Zhiyun Smooth-X2

With phones having great cameras and 4k video shooting capabilities, the Zhiyun Smooth-X2 is perfect for stabilised cinematography. This double-axis gimbal works as the perfect gib. It can be used as a tripod and the internal lighting system offers a nice lighting setup.

Available at: Gadget and Gear

Price: Tk. 9,999/-

DJI Osmo Pocket

The DJI Pocket is a mini-monster of an action camera. The effective 12MP can

record videos at 4K resolution. Plus the built-in 3-axis stabilisation makes this a perfect vlogging action camera for beginners. It also fits in your pocket.

Available at: Startech, New Camera World

Price: From Tk 21,000/-

FOR THOSE INTO GETTING A NEW SMARTWATCH:

Amazfit GTR 2 AMOLED Curved

The 1.39-inch rounded display Amazfit GTR 2 by Xiaomi comes with an Active Matrix Organic Light-Emitting Diodes and an AMOLED screen. This extremely sturdy smartwatch has 50-metre water resistance. It has a 14-day battery, 24-hour heart rate monitoring system and 3GB of storage for music and playback.

Available at: Gadget and Gear, Startech, PC House BD

Price: From Tk 12,590/-

Huawei Watch GT 3

Huawei GT 3

3 is not just a mere smartwatch, but rather a helping hand. It can help set daily goals and reminders. It keeps a track of blood flow and heart rate. It keeps a record of past runs and exercises all alongside the basic smartwatch functions.

Available at: Gadget and Gear, Huawei official stores

Price: Tk. 23,999/-

Realme Smartwatch 2 Pro

The Realme Smartwatch 2 Pro is the bang for the buck if you want a basic smartwatch with a heart rate monitor. The rectangular display on this measures 1.75 inches, a bit bigger than usual. It also has a sports mode which monitors and helps with exercising, as well as basic features of phone connectivity like messages, notifications and music control.

Available at: Realme Shops

Price: Tk. 5,000/-

A NOOB'S GUIDE TO WEARABLE CAMERAS & GOPROS

NAYEEMA BUSHRA

GoPro is one of the most famous brands of wearable cameras. Their products are small and easy to mount on various body parts. GoPro cameras can take regular photos and burst photos, and are perfect for making regular and time-lapse videos as well. Below are some essential know-hows if you're considering a GoPro for yourself.

Benefits of an action camera

Capturing moments being present in the moment is now made possible using wearable cameras. They allow you to go hands-free while recording and capture great points of view. Most importantly, these cameras are flexible and portable. You can carry them anywhere.

If you love outdoor adventures and recording them, an action camera is the right choice. It is also fun for many other purposes since they come with a wide variety of mounting and housing options to let you capture unique perspectives.

Why consider a GoPro

Aside from mobility and quick shots, GoPro is also useful for underwater recording, as they are waterproof. You can also mount them on different props or vehicles and parts of your body. It comes with available mounts and straps.

The mounting options of GoPro cameras make them unique. You can mount one on your head, chest, arms or legs and just start filming. You can also strap it to your bike, surfing board or other vehicles and record your motion.

Choose from the variety of housing options of your GoPro by altering the

backdoors. There are floating backdoors for GoPro as well, which help the camera float in water. There are options to mount them on backpacks and vehicles. You will also get floating hand grip options that work as a handle and buoy.

Specifications

GoPro cameras are sturdy, smooth, and waterproof. They can capture videos that are smoother and clearer than HD cameras. Their models have the availability of 4K video capture and are easily connectable to any device to share and import files.

Since it is a small-sized camera, there is only one screen to operate it. Owing to the small frame, GoPro cameras tend to be quite lightweight. Different models have different weight ranges, from 2.6 ounces to as much as 7.8 ounces depending on the function and shape.

GoPro cameras also have non-removable batteries. You can charge the battery using the USB cable which comes with the camera kit. You can easily transfer files from the GoPro to your computer or other devices using the same cable or an adapter.

The older models of GoPro cameras used to come with small built-in memory. The modern ones need an SD card for

storage. SD cards of more than 64GB are suitable for these cameras.

The image quality of the new models of GoPro is getting better. Previously, it saved only JPEG images. But the recent versions can now capture photos in JPG format. Some models can take RAW images as well.

Possible downsides

The handling of a GoPro camera is pretty basic. But you have to be patient enough to figure it out first. Unlike regular

cameras, captures cannot be zoomed in or out. It has a fixed focal length.

Thus, it takes some extra effort to handle this camera. As it is small in size, the buttons are small as well.

Although it does not compromise the quality of videography, the quality of photography is expectedly not to the level of bigger cameras.

The controls are slow in responsiveness. The battery also drains a lot faster than regular cameras. However, these downsides can be worked around with a bit of prior preparation and patience.

Product names and price range

There are quite a few models of wearable cameras available in the local market.

If you are new to exploring wearable cameras, you can start with a basic model. Even the basic model comes with a variety of capture options.

Starting from as low as Tk. 4,000 to more than Tk. 50,000, different kinds of wearable cameras can suit your needs and usability. Different brands like Xiaomi, Dji and EKEN also sell wearable cameras. These come at low price ranges, with some options you can potentially find are EKEN H9R V2 4K WiFi Waterproof Action Camera, Dji Osmo Pocket OT-110 12MP 4K Action Camera and Xiaomi Mijia 4K Action Camera.

GoPro models are expensive compared to these brands. The lowest range of GoPro cameras available in the local market is around Tk. 25,000. For example, GoPro Hero 7 costs Tk. 23,900. The price rises as we go up the series. GoPro Hero 8 costs Tk. 29,500, GoPro Hero 9 costs Tk. 35,500, and the latest model GoPro Hero 10 costs Tk. 45,500.

Final words

Initially designed to capture surfing moments in the sea, GoPro has advanced a lot in recent times. This wearable camera can do wonders, owing to its size, weight, mobility and fun features. They ease travelling and ensure adventures with maximum enjoyability.

You do not have to worry about holding your camera anymore. With GoPro, you can go hands-free on any surface you want without ever compromising the quality of your captures.

7 daycare centres in Dhaka for working parents

JINAT JAHAN KHAN

Every morning the hustle of going to work and thinking of their little munchkins all day long often urges working parents to find a suitable daycare nearby. Here is a list of some of the daycare centres in Dhaka that you may be interested in checking out, depending on your location.

DC Child Care and Education Centre (Monipuripara)

This childcare is for children aged from 1 and half to 6 years old. Located at Monipuripara, it has a full-day program from 7 am to 7 pm and a half-day program with two slots: 7 am - 1 pm and 1 pm - 7 pm. Parents can choose any of these options at their convenience. The monthly payment for a full-day program is Tk. 10,000 including three-time meals, and for a half-day, Tk. 6,000, including two-time meals. According to the age and understanding of a kid, it works on their communication, mental, emotional and motor skills development through preschooling and different activities.

Dhanmondi Daycare Center (Dhanmondi)

This government daycare is at Dhanmondi 8. The timing of the service is from 8 am to 6:30 pm. For children aged 6 months to 1 year, the monthly payment is Tk. 2,000. The cost becomes Tk. 1,500 if the child is from 1 year up to 2.5 years. For 2.5 to 4 years, it is Tk. 1,200 and for children aged 4 to 6 years, the fee is Tk. 1,000. Food is also included in this full-day program. If the kid is above 3.5 years, they also provide preschooling to them. They also have toys and other arrangements for children's entertainment and mental

development.

Le Petit Child Care Center (Gulshan)

Children between 6 months to 10 years can be dropped off at this facility at Gulshan. They have four types of programs. The monthly payment for a full-day program is Tk. 9,400 and around Tk. 8,000 is for a half-day program that consists of any five hours of the day. It will cost parents Tk. 1,200 in their daily basis program and Tk. 500 in their hourly basis program. Children of appropriate age get preschool where they learn about alphabets, numbers, and rhymes. They can also enjoy colouring and crafting time there.

Wee Learn Day Care (Mothijheel, Gulshan, Niketon and BAF Shaheen

College)

This daycare has four branches located at Motijheel, Gulshan, Niketon, and BAF Shaheen College. This facility is available for kids between 6 months to 7 years. The timing is generally 8:30 am to 6:30 pm but can differ a bit depending on the location. The monthly fee is Tk. 9,000 for a full-day program. For a half-day or a maximum of 4 hours per day, the fee is Tk. 6,000. A preschool option is also accessible, but a separate fee needs to be paid for that. There are indoor games, rhyme-time and age-appropriate activities for individuals in all four branches.

Mom Child Day Care (Uttara)

Located in sector 4 of Uttara, this facility

remains open from 8 am to 8 pm. It offers care to children aged from 1 year to around 12 years. The monthly payment is Tk. 8,000 including both breakfast and lunch. For the half-day program, the fee is Tk. 6,000 per month. There are indoor games for kids staying there. If any of them goes to any school in sector 4 or sector 6, they can also help parents by picking them up from school and dropping them to the daycare. Additional fees are required in that case.

Safe Day Care (Mirpur)

It is designed for children from 6 months to 6 years. This daycare is in section- 12, Pallabi, Mirpur. The time is from 7:30 am to 7 pm. For the full-day option, the monthly fee is Tk. 6,000 and for half-day, it is Tk. 5,000. Kids can get preschool and the cost is included in the monthly fee. In this case, children need to be in the morning shift if their parents choose a half-day program. They have story-time and indoor activities for children.

Little Honey Bunny Preschool and Childcare (Kalabagan)

The working hours are from 8 am to 6:30 pm. It is at Dolphin Goli, Kalabagan. Children between 6 months to 6 years can get admission here. Full-day program costs parents Tk. 10,000 monthly. The half-day program consists of 6 hours a day, with the fee being Tk. 7,000. Preschooling is available only in the morning shift. The fee remains included in the full-day or half-day program. They engage children in age-based activities for mental development such as dance, music, poetry, colouring and educational games.
