Samridhi got stranded at Olvia, the BMMOA leaders communicated with different departments of the government and different international organisations, including ITF, International Maritime Organisation (IMO), said Shakawat.  
BMMOA leaders helped Directorate General of the Department of Shipping communicate with a Bangladeshi businessman who expressed his interest for extending help for safe evacuation of the 28 crewmembers, he added.  
Shakawat said they earlier demanded investigation into BSC's negligence in management of the vessel and inclusion of two of their members in the probe body.

While walking home, two school-going children take refuge under banana leaves to escape from the sun's heat. This photo was taken on Thursday from Jhalakathi's Sholposena village. PHOTO: TITU DAS

No work, no play

FROM PAGE 3  
Planning and Development.  
During a recent visit to the park, this correspondent saw that construction work of the underground parking took up almost all of the park's area. There was no display or information regarding what the park and the parking will look like post-construction. Just a small cautionary board was seen hanging.  
Most of the previous rides have ceased to exist, and the two spinning wheels were surrounded by tin boundaries. The jet, a gift from Bangladesh Air Force, was seen lying on the bushes of the west side of the park, covered in dust.

This correspondent did not see any worker in action as well. There were mosquito larvae in a closed watery space inside the parking lot's construction site, increasing the risks for dengue transmission.  
Contacted, DSCC spokesperson Abu Naser told this correspondent, "We sent our project proposal to the LGED ministry, from where it went to the planning ministry. However, it was not submitted to Ecneec for approval."  
"Our plan includes 15 new modern rides for the children. If approved, it will be a modern park in all sense," he added.

Left unused even

FROM PAGE 5  
plants have been damaged, and upgrades are needed. "This is why we sent a DPP to the local government department about a year and a half ago. If the DPP is passed, the plant could easily be operated."  
Sohrab Hossain Panna, assistant superintendent of BCC's water department, said, "We produce and supply 61 lakh gallons of water every day. The rest of the demand is met by underground tube-wells."  
"We also supply water to slums through tankers. But we can only fulfil half of the peak demand for water -- over 1.2 crore gallons for six lakhs citizens.  
If the two plants at Beltala and Rupatoli were operational, the demand would be fulfilled. The storage capacity of each

of the plants is 1,006 crore gallons.  
Moinul Hossain, executive engineer at Department of Public Health Engineering, said construction work was completed in 2016. "I think technical problems were created because the corporation did not want to receive the plants in due time."  
Meanwhile, BCC sources acknowledged that more than 5,000 customers are drawing groundwater from deep tube-wells. According to Department of Public Health, the water level has dropped by at least 25 feet.  
Therefore, even some of the underground tube-wells cannot provide water in the dry season. As a result, demand for water always reaches its peak in summer.

United we fix

FROM PAGE 5  
to this problem for years, but Khulna Development Authority (KDA), Khulna City Corporation (KCC), Local Government Engineering Department (LGED) and district administration are yet to repair the road," said Mrs Reshma, a local resident and activist.  
During a recent visit to the area, this correspondent saw many parts of the road full of big potholes, loose bricks and scattered stones. The entire area is covered with dust, making it almost impossible to identify it as a city road.  
Sheikh Ashraf Uz Zaman, president of the Greater Khulna Development Samgram Coordinating Committee, demanded immediate repair of the road as well.  
Residents of Khalishpur, Daulatpur and Boyra areas are the worst sufferers of the condition as they have use the road for

commuting in and out of the town every day.  
Montasir Mamun, KDA executive engineer (maintenance), told this correspondent that KDA usually constructs roads but doesn't look after the maintenance due to lack of budgets for the projects.  
"One kilometre of the road falls under KCC's jurisdiction and the rest under LGED. We sent letters to both on March 28, 2010 and February 6 in 2014, but to no avail," he added.  
Md Nuruzzaman Talukder, KCC state officer, said KDA's letter has no indication regarding the road's length and width.  
"There are also no citable of illegal structures," he added.  
Meanwhile, Md Robiul Islam, LGED upazila engineer in Dumuria, said, "We are yet to decide on taking over as it [the road] doesn't match with LGED's project criteria."

Int'l confce on weed management to be held

STAFF CORRESPONDENT  
Weed Science Society of Bangladesh (WSSB) will organise its first international conference at the capital's Sher-e-Bangla Agricultural University today.  
The conference themed "Climate Resilient Weed Management in the Era of Climate Change" is expected to feature 200 participants, including scientists, teachers, government officials and herbicide traders, said a press release.  
Chaired by WSSB President Prof Hazrat Ali, the inaugural session of the conference is expected to be attended by State Minister for Planning Shamsul Alam as chief guest.
