PLASTIC WASTE MANAGEMENT NEED ATTENTION

We have pioneered to act, set example and help cities find the right approach to solve the problem

Along with our partners, we are facilitating and experimenting multiple plastic waste collection models throughout Bangladesh to establish sustainable waste plastic value chain. Our approach include partner capability development, behavior change communication, livelihood improvement and skill development of the waste collectors.

We all need to act and join hands to ensure

Plastic Waste Free Sustainable Bangladesh

It's time to transform the way we use resources across society. As a part of our Compass mission to improve the health of the planet and our commitment to help attain Sustainable Development Goals (SDG), we want to help shape a better waste-free future for all.
