# Think bold defiant and COOL

Life in 2022 was a confluence of feelings. We felt joy at our achievements, broke down by our failures, and were shaken by the changes that took place around us. But the year has also been about resilience as we truly bounced back from the COVID-19 pandemic. It remains to be seen how the new year 2023 shall treat us, but we can surely hope for a brighter future. Happy new year!
