Iran executions amount to 'state sanctioned killing'

Says UN rights chief; Tehran hands ex-president's daughter jail time for 'propaganda'

AFP, Geneva

Iran is weaponising the death penalty to frighten the public and crush dissent, and its execution of protesters without due process amounts to state-sanctioned killing, the UN said yesterday.

Tehran has executed four people in connection with nearly four months of demonstrations in the country, with two more executions scheduled imminently and at least 17 other individuals reportedly sentenced to death, the United Nations Human Rights Office in Geneva said.

"Criminal proceedings and the death penalty are being weaponised by the Iranian government to punish individuals participating in protests and to strike fear into the population so as to stamp out dissent, in violation of international human rights law," UN rights chief Volker

The Islamic republic has been rocked by a wave of protests since the death in custody on September 16 of Kurdish Iranian Amini, 22, following her arrest for allegedly violating Iran's strict dress code for women.

'The weaponisation of criminal procedures to punish people for exercising their basic rights -- such as those participating in or organising demonstrations -- amounts to state-sanctioned killing," Turk said.

"The government of Iran would better serve its interests and those of its people by listening to their grievances, and by undertaking the legal and policy reforms necessary to ensure respect for diversity of opinion... and the full respect and protection of the rights of women in all areas

Meanwhile, Faezeh Hashemi, the daughter of late president Akbar Hashemi Rafsanjani, has been sentenced to five years in prison, her lawyer told AFP on Monday Women's rights activist Hashemi was arrested on Septem ber 27 accused of "propaganda" and actions against public order and national security, said lawyer Neda Shams.

SINKING HIMALAYAN TOWN India to demolish some buildings

REUTERS, Lucknow

India will demolish some buildings in a northern Himalayan town near its border with China after evacuating families in the past few days, an official said yesterday, as hundreds of homes have developed cracks in an area thronged by pilgrims. Experts and residents have long warned that large-scale construction in and around the town of Joshimath, including work for power projects by companies such as state-run NTPC NTPC.NS, could lead to land subsidence. Nearly 700 houses in the town in the state of Uttarakhand have developed cracks and some 400 people have been moved to safer locations, authorities say.

RETALIATION FOR COVID CURBS

China blocks Japan, **South Korea visas**

REUTERS, Beijing

 $China\,suspended\,issuing\,short\text{-}term\,visas\,in\,South$ Korea and Japan yesterday, after announcing it would retaliate against countries that required negative Covid-19 tests from Chinese travellers. China has ditched mandatory quarantines for arrivals and allowed travel to resume across its border with Hong Kong since Sunday, removing the last major restrictions under the "zero-Covid" regime which it abruptly began dismantling in early December after historic protests against the curbs. But the virus is spreading unchecked among its 1.4 billion people and worries over the scale and impact of its outbreak have prompted Japan, South Korea, the United States and other countries to require negative Covid tests from travellers from China.

Ozone layer slowly healing: UN

The ozone layer that shields life on Earth from deadly solar radiation is on track to recover within decades, but controversial geoengineering schemes to blunt global warming could reverse that progress, scientific assessment warned Monday

Since the mid-1970s, certain industrial aerosols have led to the depletion of ozone in the stratosphere, 11 to 40 kilometres (7 to 25 miles) above Earth's surface.

In 1987, nearly 200 nations agreed on the Montreal Protocol to reverse damage to the ozone layer by banning chemicals that

destroy this naturally occurring stratum of molecules in the atmosphere.

That agreement is working as hoped, and is in line with previous projections, more than 200 scientists found.

"Ozone is recovering, this is a good story," John Pyle, a professor at the University of Cambridge and co-chair of Scientific Assessment of Ozone Depletion, told AFP.

The ozone layer should be restored both in area and depth -- by around 2066 over the Antarctic region, where ozone depletion has been most pronounced, according to the report, jointly released by WMO, UN Environment Programme, and

New US Speaker scores first win

House passes rules package

AFP, Washington

Divisive new Speaker Kevin McCarthy passed the first test of his ability to lead the chaotic US House of Representatives Monday as lawmakers approved a rules package determining how his Republicans will govern.

The vote on the blueprint described by top Democrat Jim McGovern as a "ransom note to America from the extreme right" -- came on the heels of one of the most turbulent weeks ever in the

Republican-controlled House as McCarthy was forced to go through 15 rounds of voting over four days to overcome a far right blockade to his candidacy.

"At the heart of all of this discussion last week it was very clear, surely from our side, that Washington is broken," McCarthy's deputy, Majority Leader Steve Scalise, said as the debate opened.

"And not just is Washington broken, but the way that this House has been running for the last few years has not been designed to address the problems of the people from across this country."

Democrats complain, however, that the deals McCarthy cut to win the speaker vote have severely curtailed the role of Washington's top legislator and have ceded power to the most extreme Republicans.

the brink of famine.

The US Navy said yesterday it had seized more than 2,000 assault rifles smuggled on a fishing boat along a maritime route from Iran to Yemen.

The cargo was discovered on Friday off the coast of Oman "on a route historically used to traffic illicit cargo to the Huthis in Yemen," the Bahrain-based US Fifth Fleet said in a statement, noting the vessel "was crewed by six Yemeni nationals."

"This shipment is part of a continued pattern of destabilising activity from Iran," Vice Admiral Brad Cooper was quoted as saying.
The Iran-backed Huthi rebels took control of the

Yemeni capital Sanaa in 2014, prompting a Saudiled coalition to intervene the following year. Since then, a grinding war has killed hundreds of thousands and pushed the impoverished nation to

A UN-brokered ceasefire that took effect in April brought a sharp reduction in hostilities. The truce expired in October, though fighting largely remains

The fishing vessel intercepted last week had been carrying 2,116 AK-47 assault rifles.

"The transfer of the vessel and its crew for repatriation is in progress," the Fifth Fleet said, adding that "the direct or indirect supply, sale or transfer of weapons to the Huthis violates" international law.

Last month, the US Navy said it had seized one million rounds of ammunition along with rocket fuses and propellant being smuggled on a fishing trawler from Iran to Yemen.
