‘Technical errors’ cited as reason

STAFF CORRESPONDENT

The Directorate of Primary Education yesterday suspended the results of Primary Scholarship Examinations 2022, citing “technical errors”.

The results were published around 12:30pm yesterday.

The results will be published today after a review, said a notification signed by DPE Director General Shah Rezwana Hayat.

In the published results, 82,383 students were selected for the scholarships in two categories – talent pool and general. Of them, 33,000 students got scholarships in talent pool category and 49,383 students got in general category.

STAFF CORRESPONDENT

Premature births and babies born with low birth weight is on the rise in Dhaka city due to poor air quality, found a recent study.

Between 2014 and 2017, the incidents of low birth weight increased from 20.6 percent to 36 percent while pre-term births jumped from 9 percent to 15.2 percent due to the mothers' exposure to air pollution.

The International Centre for Diarrhoeal Disease Research, Bangladesh (ICDDR,B) and the Maternal and Child Health Training Institute of the Directorate General of Family Planning conducted the study on 3,206 samples.

“Our study was done in a

very data scarce setting, but it presents comparatively clear evidence of the strong association between these negative birth outcomes and air pollution,” said Mahin Al

The study, which is based on normal birth samples, found female foetuses are at higher risk of low birth weight while males are more prone to premature birth due to poor air quality.

Nahian, research investigator of ICDDR,B, while sharing the findings of the study yesterday. Dhaka topped the list of cities around the world

with the worst air quality. “Air pollution in Dhaka has become a critical public health concern,” said the report titled ‘Air pollution and pregnancy outcomes in Dhaka’.

The overall situation is likely to worsen as the government has initiated several large construction projects within and around the city without any pollution control measures.

The study, which is based on normal birth samples, found female foetuses are at higher risk of low birth weight while males are more prone to premature birth due to poor air quality.

And exposure to air pollution during the second trimester causes the most harm to the babies as it hampers the

AL leader beaten up by ‘MP Nixon’s supporters’

OUR CORRESPONDENT, Faridpur

A local Awami League leader was beaten with a hammer and iron rods allegedly by supporters of independent lawmaker (Faridpur-4) Mujibur Rahman Chowdhury Nixon in Shorifabad Bazar area of Faridpur's Bhanga upazila on Monday evening.

Kibria Matubbar, 36, joint general secretary of Gharua Union Awami League and also a former member of Gharua Union Parishad, was injured in the incident.

Kibria is known to be a supporter of Kazi Zafarullah, presidium member of the AL and also a former MP from Faridpur-4.

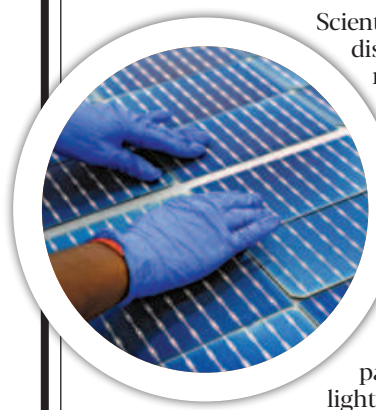

The injured was admitted to Bhanga Upazila Health Complex. He was later shifted to the National Institute of Traumatology and Orthopaedic Rehabilitation (NITOR) in the capital as his condition deteriorated.

Golam Mostafa, general secretary of Gharua Union AL, said Kibria on Monday afternoon attended a preparatory meeting for a March 4 rally, which would be joined by Kazi Zafarullah as chief guest. The local AL leader came under attack when he was on his way home with a few

Solar breakthrough paves way for ‘miracle material’ panels

INDEPENDENT.CO.UK

Scientists have made a discovery that could finally realise the practical potential of the so-called miracle material perovskite for solar cells.

A team from North Carolina State University said the findings pave the way for a new generation of ultra-efficient solar panels that are also lighter and more flexible than current technologies.

Perovskite has been hailed for its promise to transform everything from high-speed communications to renewable energy technologies. Its unusual properties could vastly improve the efficiency of solar energy harvesting compared to traditional silicon-based cells, however until now researchers have been unable
