MITSKI'S LAND IS INHOSPITABLE AND SO ARE WE

The Land Is Inhospitable And So Are We – Mitski's latest addition to her discography is no less than an exceptional experience of breaking and mending. The chronological order of the album harnesses a sound which slowly weaves a pattern. "Bug Like An Angel" as the opening to the album deserves a lot of praise. It sets the stage for the sombre yet warm themes that are present throughout the record. The album's most noteworthy track for me is "I'm Your Man", a regretful and self-loathing musing of a past relationship. The ending of the album, "I Love Me After You" perfectly captures all the seeds Mitski has sown throughout this record, establishing a personal and realistic resolution showered with acceptance of oneself.

The Land Is Inhospitable And So Are We is far from a conventional studio album. It's an amalgamation of the delicacies Mitski has mastered over the years, addressing the art of painfully healing. And it might perhaps be the best album Mitski has released to date.

LETTER

Dear Campus,

It's safe to say the last three days were incredibly hard for me academically. With a project due soon, I was left with countless design problems to solve which led to many last-minute changes. I was running in circles and it came to a point where it felt like I wouldn't be able to pull it off. Even after the submission, I was not satisfied with the outcome. My consolation being that there's always a next time to make things right. On the other hand, seeing my classmates' works made me consider all the things that I could have done differently. Although it was very disheartening, these three days made me realise how important it is to trust the process and myself. After all, you can only rely on yourself to do better.

RESPONSE

Dear Lamia,
Working hard on something and seeing it bear fruits is one of the greatest feelings out there. Now, you may not be completely happy with how your project turned out, but I love that you have the mentality to learn from your peers and use the things you learn in your future work. Architecture is difficult, and it takes hard work to conquer difficult things. Good luck,
Campus
