

Sometimes, when we have missing elements, our partners can help balance out those parts of ourselves. And in some cases, we will see that water will literally put out fire and air and earth signs will be in different directions.

Next, we can look at the qualities of the signs to understand how well they may get along. There are three qualities that a sign can hold. In all cases, the signs opposing each other are also highly compatible as they are considered mirrors of each other — Aries and Libra, Taurus and Scorpio, Gemini and Sagittarius etc.

The cardinal signs are Aries, Cancer, Libra, and Capricorn. They are the initiators and natural leaders of the zodiac. They may tend to take charge in their relationships. Fixed signs are Taurus, Leo, Scorpio and Aquarius. These are the builders of the zodiac, they are known to fixate on and dislike change, and they can be rigid sometimes. Mutable signs are more adaptable, versatile and likely to go with the flow.

Our moon signs describe our inner worlds and emotions and this is highly important for relationship compatibility because this symbolises our inner core and what makes us feel comfortable. Our Venus and Mars signs also have a lot to say about compatibility. The Venus sign describes our love language, attitude towards love and the type of person we fall in love with.

## Starcrossed lovers - The worst Zodiac lovers

Aries and Pisces - Aries's combative nature will scare Pisces, and Pisces' sensitivity will baffle Aries. This is a no-go.

Taurus and Sagittarius - Taurus generally hates change and wants things to be stable. Sagittarius always wants to be off on a new adventure and tends to get bored of stability.

Gemini and Scorpio - Gemini will be put off by Scorpio's intensity and Scorpio will get annoyed by Gemini's flakiness.

Cancer and Aquarius - Cancer will get hurt by Aquarius's lack of emotion and Aquarius will not understand Cancer's emotional nature.

Leo and Capricorn - Both these signs like to be the boss and usually do not like when someone else thinks they are the boss.

Virgo and Aries - Virgo's planning will dampen Aries's impulsivity. They will not have anything in common with each other.

Libra and Taurus - This couple might bond on the superficial together and not have any substance together.

Scorpio and Aries - As both signs are ruled by Mars, they can be very combative and bring out the worst in each other.

Sagittarius and Cancer - Cancer's

desire to stay home will drive Sagittarius mad, and Cancer will not relate to Sagittarius's wanderlust.

Capricorn and Gemini - These two signs are considered "inconjunct" so in a lot of ways, they just do not see eye to eye at all.

Aquarius and Virgo - Aquarius might feel stifled by Virgo's organised and conventional ways of thinking, whereas Aquarius will be too rebellious for Virgo.

Pisces and Libra - This is a couple that will have their head in the clouds and never get anything done. Could be a very dreamy romance that can end up as an illusion.

Mars describes what we are attracted to in a partner, it's our sexual energy and our anger.

Finally, Saturn in the chart, which symbolises restrictions, karma, lessons

as well as commitment, can be a good indicator of whether someone will remain in your life long-term. And other points such as the North Node and the Vertex can show us where we have karmic relationships with other people, which were

destined to happen.

After all this, you may still be wondering - who are the most compatible zodiac pairings? And perhaps, which would be the worst pairings? Here is a list of some of my personal favourite zodiac power couples and some that I would not touch with a ten-foot pole. However, take these with a grain of salt because as I mentioned, other factors also determine compatibility as well as your own free will. So, fret not, if you find your boyfriend in the star-crossed lovers section, other factors in his chart may make him a compatible match for you!
