

Ignite Minds Through Learning

Bashundhara Public School and College

An institution that excels in education, sports

Daily Sun Report, Dhaka

There is an aesthetic campus with a vast, green field at the front. The large seven-storey building houses state-of-the-art classrooms, a library and a cafeteria, offering a wide range of facilities to foster creativity. Adjacent to the school, the Bashundhara Sports Complex boasts a crystal-clear swimming pool. Besides, there are over 20 popular sports facilities for students there.

Bashundhara Public School and College (BPSC) is set to start academic activities on 1 January next, offering world-class education and unlimited opportunities for sports. A seven-storey school campus, designed by renowned Bangladeshi architect Mohammad Foyez Ullah, has been built on 10 bighas of land in Block N of Bashundhara Residential Area in the capital. The campus features open spaces, lush greenery and various recreational facilities aimed at fostering students' mental and social development.

There are Bangla and English versions based on the national curriculum for Nursery to Eighth grade. The school's curriculum is designed to foster the development of students' talents. This will empower them to overcome the challenges of modern life and become skilled individuals, well-prepared for their future careers.

Regarding the modern academy, BPSC Principal Brigadier General (retd) Anisur Rahman said the school authorities aim to improve the quality of education through sports, values and ethics.

"There'll be world-class teaching methods, drawing on the experiences of top-performing schools of the developed world. The speciality of this school is having all kinds of sports activities alongside study. Children can't play in Dhaka city for lack of fields," he said.

All students of BPSC will access all kinds of sports opportunities in Bashundhara Sports Complex, which is close to the school. There are experienced instructors to teach them how to swim in the swimming pool. This institution is unique of its kind in the country.

The principal mentioned that the academic programme of the school is starting on 1 January next.

"We're giving priority to children's education as well as overall safety. All arrangements have been made to ensure security on the entire campus. Parents will be automatically notified when children get on and off the school bus," the seasoned academician added.

The BPSC will offer NFC (near-field communication) cards for all students to ensure tech-based surveillance inside and outside the campus to make guardians tension-free.

A modern and safe learning environment has been ensured for students. The building has three corridors on both sides and in the middle. Apart from this, there are open balconies and

lift facilities all around. For this, students and teachers can move safely and comfortably. There are adequate lighting and ventilation on the entire campus, including classrooms.

A wider campus has a positive impact on the learning process of students, especially in the early stage of life. When students enter the BPSC campus, they will experience a difference from other academic institutions.

The BPSC is arranged in such a way that it seems like a world. Through the drawing, the story of the young child who comes to the first school holding the hands of his/her parents, passing through the exuberant adolescence and reaching the desired goal with the enthusiasm of youth is depicted. By raising their hands here, students will be able to develop into enlightened people by seeking knowledge.

Students need to use digital ID cards to enter the school. They can use this card to pay bus service, cafeteria and even tuition fees. Students must leave the school premises using the card. This digital ID card will play a role in cashless transactions.

Various initiatives have been taken to familiarise students with modern technology. Students can stay connected with global information through interactive learning platforms, online resources and databases. This will broaden the scope of students' learning and make them more efficient.

The BPSC ensures 1,000 square feet of space for each classroom. The classrooms are built in two rows. Each of the four sections in every class has been assigned a distinct colour. These colours symbolise different values that will foster the students' mental development. For instance, blue represents ambition, green signifies peace, yellow denotes self-confidence and orange symbolises determination.

Each classroom is equipped with state-of-

the-art technology and is air-conditioned. Classrooms have smart boards and projectors.

Students can easily keep pace with the modern education system and acquire technical skills. According to the school authorities, sports and physical activities have a significant impact on students' overall development and preparations for higher education.

Various sports opportunities like cricket, football, volleyball, kabaddi, swimming etc are kept here for the students. Students will be trained by reputed trainers. Students will be able to compete in the world of sports at the national and international levels by crossing the boundaries of the school grounds.

Along with developing the talent of children, Bangladesh will be glorified in the international arena.

Regarding the curriculum, Principal Anisur Rahman said the BPSC academic curriculum is being developed in an organised and balanced way.

"It ensures diversity and depth of content for pre-primary, primary and secondary students. Apart from Bengali, English, Math, Science and other subjects, the institution also has opportunities for creative and practical education. Subjects like dance, singing, drama and drawing are included to enhance students' creativity," he said.

There are various subject-wise clubs where students can participate and develop their talents while each club has a separate studio. The school has a language lab. Experienced doctors and psychiatrists will ensure the physical and mental health of the students.

The BPSC has a modern computer lab for students. The academy focuses on information technology where students can prepare themselves to excel in future careers.

It lays special emphasis on technology innovation and coding education apart from state-of-the-art laboratories for science and math education.

These two laboratories will play an important role in the learning process of the students. A state-of-the-art library has been developed to enhance the learning habits of the students. There is a modern library rich with local and international resources for the little ones to inspire them to read books. Apart from this, an e-library has also been attached. There are also a multipurpose hall, a gallery and a modern cafeteria.

Ahmed Akbar Sobhan
Chairman, Bashundhara Group

Welcome to the world of education at Bashundhara

Educational institutions are the primary environments for nurturing the personalities of students. The responsibility of an ideal educational institution is to enhance students' capabilities by instilling values and ethics, while fostering an insatiable thirst for knowledge through the stimulation of inquisitive minds. Equally, it is the duty of a quality institution to contribute to the emotional, mental, and physical development of students.

"Dream, develop yourself, achieve" - Bashundhara Public School and College is designed to ensure that students not only learn from textbooks but also benefit from various resources that provide a clear understanding of the world around them. Here, they can keep pace with the ever-changing world through modern technology and acquire knowledge of current affairs. They will also gain the language of global connectivity.

Additionally, there are multi-dimensional platforms where students can develop social and moral values, emotional intelligence, empathy, and self-awareness by participating in various community-based initiatives and clubs. Our modern curriculum is crafted to ensure that children grow up to be responsible global citizens, ready to embrace the future.

For their physical development, we offer a range of sports, including swimming, football, cricket, and basketball. Our state-of-the-art sports complex, equipped with modern facilities, is located near the campus.

We have a dedicated faculty who are highly sensitive to the emotional and psychological needs of students. They ensure that learning is engaging and enjoyable for students. These highly skilled and experienced teachers inspire creativity and encourage children to think differently.

We warmly welcome you to Bashundhara Public School and College, where your children will have access to a holistic education that fosters intellectual, physical, emotional, and mental development. We are committed to creating an environment that nurtures students' overall well-being, preparing them to be future leaders.

This institution will thrive with its creative, unique speciality

Brig Gen (retd)
Md Anisur Rahman
Principal, Bashundhara Public School
and College

All activities of Bashundhara Public School and College will be overseen by skilled, experienced and qualified teachers dedicated to imparting quality education to future generations through their personal talent, wisdom, and thoughtfulness.

Bashundhara Group, a prominent industrial conglomerate, has played a pivotal role in creating employment opportunities and driving the country's economic development since its inception.

Beyond its business ventures, the organisation has made remarkable contributions to social development, particularly in education and sports.

In continuation of the contributions, the initiative to establish Bashundhara Public School and College has been taken with the personal interest of the Bashundhara Group chairman.

All sorts of measures have been undertaken to establish the Bashundhara Public School and College as a world-class educational institution. I am expressing my gratitude for allowing me to be a part of this noble initiative.

In the era of the fourth industrial revolution, it is

imperative to create time-worthy educational opportunities to take the nation forward to the competitive technology-driven world.

Bashundhara Public School and College has devised a comprehensive curriculum and developed supporting facilities keeping the objective in mind.

In addition to academic success, the ongoing efforts will focus on shaping the students into world-class citizens with strong morals and technological skills while fostering creativity, innovative thinking and leadership development.

Aesthetic academic buildings with adequate facilities, including fully air-conditioned and technology-enabled classrooms, modern laboratories, libraries (e-libraries) and separate studio facilities for co-curricular activities, have already been constructed to achieve these goals.

The students will have the opportunities to foster their creativity through taking part in music, drama, debates, lecture sessions and a variety of club activities.

They will also have adequate sports opportunities

for their physical, mental and leadership development. Every student will have the opportunity to participate in different kinds of sports based on their choice and to compete in various national and international competitions.

In addition to academic lessons, various extracurricular activities are planned to turn all students into honest, ethical and responsible citizens.

The teachers are dedicated to delivering relevant and future-focused education to the next generation, applying their personal talent, knowledge and thoughtfulness.

To ensure students' safety, the school authorities have implemented physical and technological security measures and arranged their vehicles for secure transportation.

Modern facilities including a first aid centre and healthy cafeteria have also been arranged for the greater interest of the students. I seek your best wishes and invite you to visit our beautiful school campus, equipped with modern and sophisticated facilities.
