

The rising stakes of **COOLING**

TAGABUN TAHARIM TITUN

The sweltering heat of the Bangladeshi summer has historically been a seasonal challenge, but in recent years, it has transformed into a primary driver for one of the country's most dynamic consumer electronics sectors. Once considered a luxury reserved for the elite,

the air conditioner (AC) has rapidly transitioned into an essential household appliance for the middle class. Driven by rising urban temperatures, increasing disposable income, and a robust local manufacturing ecosystem, the AC market in Bangladesh is currently undergoing a significant technological and structural shift.

The rising stakes of cooling

AC INDUSTRY OVERVIEW

- 2.28% of households now have AC, compared to 1.6% in 2021
- Yearly demand for ACs was generally between 600,000 and 700,000 units before 2025

"Current import policies allow importers to pay only 1% tariff while local manufacturers pay 15% tariff and 15% VAT on raw materials, harming industrialisation and employment."

-Md. Tanvir Rahman
Chief Business Officer, Walton

Locally manufactured ACs thrive in the market

FROM PAGE J1

A MARKET GAINING MOMENTUM

The trajectory of the AC market reflects the broader economic growth of Bangladesh. According to data from the Bangladesh Bureau of Statistics (BBS) highlighted in recent reports, the penetration of ACs in households has seen a remarkable jump. A 2022-2023 survey revealed that the proportion of households using refrigerators and ACs has grown significantly as incomes rise. Specifically, AC usage, which stood at a mere 0.4% in 2013, has expanded to nearly 4.5% in 2023.

In terms of production, the "Made in Bangladesh" tag has become a dominant force. In 2023, local manufacturers and assemblers met nearly 80-90% of the domestic demand, a stark contrast

to a decade ago when the market was almost entirely import-dependent. However, the journey hasn't been without its cooling-off periods. But, last year saw a temporary dip in demand. Unprecedented rainfall and relatively mild temperatures during the peak summer months led to a "cooling off" of sales, with many retailers reporting stocks remaining on shelves longer than anticipated. However, 1-tonne unit now costs Tk 60,000 to Tk 65,000, up from Tk 50,000-Tk 55,000 a year ago, while in order to get premium brands one needs to count Tk 1.2 lakh. Despite this weather-induced fluctuation, the long-term outlook remains transparent, with annual demand estimated between 500,000 to 600,000 units in a standard year.

THE INVERTER EFFICIENCY EDGE

As electricity prices undergo periodic adjustments, the Bangladeshi consumer has become increasingly "energy-conscious." This shift has pushed inverter technology from being a premium feature to a market standard. The primary appeal of inverter ACs lies in their ability to regulate compressor speed based on the room's cooling requirements, rather than the "all-or-nothing" approach of non-inverter models.

According to technical insights from industry leaders like Haier, inverter technology can lead to substantial cost savings. By avoiding the high energy spikes associated with frequently starting and stopping the compressor, these units can reduce electricity

consumption by up to 60% to 70% compared to traditional fixed speed units. Over a three-to-five-year period, the savings on utility bills often exceed the initial price difference between an inverter and a non-inverter model.

Md Tanvir Rahman, Chief Business Officer at Walton, emphasises that while the future is undoubtedly inverter-driven, the market still maintains a niche for traditional models. "Inverter technology has quickly become the preferred choice due to its superior energy efficiency and long-term cost savings," says Rahman. "However, non-inverter air conditioners still have a place in the Bangladeshi market, particularly in specific commercial or temporary use scenarios. Small retail shops, temporary workspaces, and certain institutional environments often prioritise lower upfront investment rather than long-term electricity savings. That said, the overall market trend clearly indicates that inverter technology will dominate the market in the coming years."

AI-POWERED SMART COOLING

Beyond energy savings, the new frontier for the AC market in Bangladesh is Artificial Intelligence (AI) and health-centric features. As consumers spend more time indoors, the demand for "Smart ACs" that offer more than just cold air is rising.

Electromart, the marketer of the globally renowned Gree brand, has recently introduced features that take personalisation to a new level. The launch of the Gree 'Airy' inverter AC series marks a shift toward AI-driven climate control. Md. Nurul Afser, Deputy Managing Director of Electro Mart group explained that this series integrates AI-driven sensors that analyze room temperature, humidity levels, and occupancy patterns to optimise compressor performance automatically. This intelligence translates directly into the wallet; customers can expect an additional 10-15% energy savings compared to conventional inverter models by reducing unnecessary compressor loads.

Moreover, in a post-pandemic world, air quality has become a non-negotiable feature. The Airy series features a "Cold Plasma" sterilisation system. This technology helps neutralise airborne bacteria, viruses, and allergens by breaking down harmful particles at a molecular level. "In densely populated urban environments with dust and pollution concerns, this feature significantly improves indoor air quality," Afser noted. Laboratory testing

has shown that the system eliminates up to 93% of bacteria and viruses, making it a critical addition for households focused on health and hygiene.

POLICY HURDLES AND GROWTH

While the consumer side of the market is flourishing with smart tech, the manufacturing side faces structural challenges that could dictate the future of local industrialisation. Bangladeshi manufacturers have proven they can produce world-class appliances, but they are now calling for a more level playing field in terms of taxation and tariffs.

Walton, a pioneer in local AC manufacturing, has pointed out a significant discrepancy in the current policy framework. Md. Tanvir Rahman highlighted that while the government encourages local production, certain tariff structures favor importers of heavy industrial cooling systems over local makers.

"There are policy barriers for local manufacturers which need to be fixed urgently," he stated. "For example, importers can import VRF (Variable Refrigerant Flow) and Chiller paying only 1% customs tariff while manufacturers have to pay 15% customs tariff and additional 15% VAT on raw materials. This is heavily affecting local industrialization and employment along with raising the import cost."

Addressing these disparities is crucial for the next phase of the industry's growth. The transition from home cooling to large-scale industrial and commercial cooling solutions. If the tariff barriers are addressed, local manufacturers believe they can significantly reduce the country's reliance on imported heavy machinery, further boosting the economy and creating high-skill jobs.

The Bangladeshi AC market is at a crossroads of innovation and policy evolution. With the rise of AI-integrated and smart features, the massive energy savings offered by inverter technology, and a growing consumer base, the industry is poised for long-term expansion. However, the stability of this growth will depend on how well the industry navigates weather-related volatility and whether the government provides the necessary policy support to protect and promote local manufacturing. For the consumer, the message is clear: the modern AC is no longer just a box that blows cold air rather it is a smart, health-tracking, energy-saving investment for a more comfortable future.

MD. TANVIR RAHMAN
Chief Business Officer
WALTON AIR CONDITIONER

AC market trends and future of COOLING

Walton

The days of panic-buying an AC during a heatwave are fading as more Bangladeshis shift toward proactive, pre-season purchasing. Md. Tanvir Rahman, Chief Business Officer of Walton Air Conditioner, discusses how this change in consumer habits is reshaping production planning and the industry's 2026 growth outlook.

The Daily Star (TDS): With temperatures hitting record highs, how has the demand forecast for 2026 changed?

Md. Tanvir Rahman (MTR): Bangladesh has been experiencing increasingly intense and prolonged summers, and this shift is having a noticeable impact on the AC market. For 2026, the demand forecast has been revised upward compared to earlier projections. Air conditioning is gradually transitioning from a luxury product to an essential household appliance.

TDS: Almost all new models focus on inverter technology. Is there still a future for non-inverter ACs in the Bangladeshi market?

MTR: Inverter technology has quickly become the preferred choice due to its superior energy efficiency and long-term cost savings. However, non-inverter air conditioners still have a place in the Bangladeshi market, particularly in specific commercial or temporary use scenarios. They often prioritise lower upfront investment rather than long-term electricity savings. In such cases, non-inverter models remain a practical option.

TDS: How are "Smart ACs" performing in terms of sales? Do consumers actually use the mobile app features?

MTR: Smart air conditioners equipped with IoT and Wi-Fi connectivity are gradually

gaining popularity in Bangladesh. Initially, many consumers perceived these features as premium add-ons. However, as smart home technology becomes more familiar, users are increasingly appreciating the practical benefits.

Younger consumers and tech-savvy families are actively using mobile applications to control their AC remotely, schedule cooling times, and monitor energy usage. At Walton, we have noticed a steady increase in interest in smart-enabled models, especially among urban homeowners.

TDS: Are you seeing an increase in AC sales from outside Dhaka and Chattogram?

MTR: Expansion of AC sales beyond major metropolitan cities is one of the most encouraging trends in the market. However, rural and semi-urban markets present unique challenges like, voltage fluctuations and infrastructure limitations. To address these challenges, Walton is focusing on wider distribution coverage, accessible after-sales service, and continuous consumer education across the country.

TDS: How is the industry managing rising costs of imported raw materials amid dollar fluctuations?

MTR: To counter dollar fluctuations and rising costs, Walton prioritises localization. However, policy imbalances—1% tariffs on imports versus 15% customs tariff and 15% VAT on raw materials—stifle domestic industrialisation and employment.

Interview conducted by Adrin Sarwar

At Walton, we are seeing consumers becoming more proactive. Instead of waiting for peak heatwaves, many customers are now purchasing ACs ahead of the summer season. This shift in consumer behavior has encouraged manufacturers to strengthen production planning, improve distribution coverage, and ensure sufficient inventory before the peak demand period begins.

10 smart habits for a cheaper summer

TAGABUN TAHARIM TITUN

Find the sweet spot

Setting your AC between 24 and 26°C ensures the best balance between energy efficiency and a cool environment.

Opt for energy-smart units

Choosing an inverter AC can slash your power consumption up to 60% because the motor adjusts its speed intelligently while cooling the air.

Activate eco-mode

Use your remote's 'eco' or 'power saving' button to let the compressor work more efficiently once the room reaches the desired temperature.

Clear the heat path

Switch off heat-emitting appliances like lightbulbs or computers that force your AC to work overtime.

Utilise natural ventilation first

Open windows to let trapped hot air escape before turning on the AC to help the room cool down much faster.

Maintain your machine

Scheduling a professional tune-up ensures the internal coils and gas levels are optimised for peak performance and lower consumption.

Keep the outdoors clear

Make sure the external compressor unit is free of debris and has plenty of space for better heat exchange.

Sync with a ceiling fan

Running a fan on low speed helps disperse cold air evenly, allowing you to raise the AC temperature without feeling the heat.

Stop the cold escape

Ensure all windows and doors are tightly sealed so the cool air doesn't leak out and force the motor to run constantly.

Dim the lights and blinds

Keeping curtains closed during the peak afternoon hours blocks thermal energy from the sun, keeping your indoor space naturally cooler.

"Smart features are moving beyond 'gimmick' status and becoming part of mainstream expectations in premium segments"

CHANGING CLIMATE drives higher demand Singer Bangladesh

As rising temperatures and changing weather patterns continue to influence consumer behaviour in Bangladesh, demand for air conditioners is evolving rapidly. MHM Fairoz, MD and CEO of Singer Bangladesh Limited shares that manufacturers and distributors are closely monitoring both climate trends and shifting customer expectations as they prepare for the 2026 summer season.

The Daily Star (TDS): With temperatures hitting record highs, how has the demand forecast for 2026 changed?

MHM Fairoz (MHMF): our demand forecast for 2026 has increased compared to earlier projections. We anticipate double-digit growth in the residential AC segment. The market is also seeing earlier seasonal demand, with customers purchasing ACs before peak summer months to avoid supply shortages and price hikes. However, current 2026 weather projections suggest no major heatwave is expected. Though, changing lifestyle preferences continue to support steady growth in AC demand.

TDS: Almost all new models focus on Inverter tech. Is there still a future for non-inverter ACs in the Bangladeshi market?

MHMF: While inverter ACs now dominate new model launches due to their superior energy efficiency and lower electricity bills, non-inverter ACs still maintain a limited presence in the market. In price-sensitive segments and certain commercial applications—such as small retail shops, temporary installations, or spaces with short operational hours—non-inverter models remain relevant due to their lower upfront cost. However, the overall market share of non-inverter ACs

is gradually declining because the price gap between inverter and non-inverter models has significantly reduced in recent years.

TDS: How are "Smart ACs" (IoT/Wi-Fi enabled) performing in terms of sales? Do consumers actually use the mobile app features or is it still seen as a "gimmick"?

MHMF: Smart ACs with Wi-Fi and IoT capabilities are gradually gaining traction. Sales of smart-enabled models have increased steadily, particularly among urban middle- and upper-income consumers. Initially, many customers perceived app control as a novelty feature. However, usage data and feedback suggest growing adoption of practical functionalities such as remote on/off control, temperature scheduling, and energy monitoring. The ability to switch on the AC before reaching home or track electricity consumption via mobile apps is proving especially appealing.

TDS: Is there a viable roadmap for affordable Solar-Hybrid ACs in Bangladesh to reduce the pressure on the national power grid?

MHMF: Given the increasing pressure on the national power grid, solar-hybrid ACs represent a promising future direction. However, affordability remains the key constraint. While technically feasible, the initial setup cost—including panels, inverters, and battery systems—can be prohibitive for mass adoption. Over time, as solar equipment costs decline and policy support strengthens, solar-hybrid ACs could become a meaningful solution for Bangladesh.

Interview conducted by Farhan Musfique.

Strategic maintenance can save AC (and your wallet)

ADRIN SARWAR

When summer heat arrives, a working air conditioner is essential. However, many people forget about their AC until it stops working or the energy bill skyrockets. Regular maintenance is the secret to a cool home and low costs. Here is a simple guide on what you can do yourself and when you need to call an expert.

WHAT YOU CAN DO

Maintenance doesn't always require a toolbox of specialised sensors. Much of what keeps an air conditioner "breathing" properly is simple hygiene and vigilance.

CHANGE THE FILTERS

If you do nothing else, change your filters. It is the single most effective way to ensure efficiency. A clean filter restores airflow and can lower cooling costs by 5% to 15%. Check them every 30 to 60 days—more often if you have pets.

KEEP THE COILS CLEAN

Your AC has two main sets of coils: the evaporator (inside) and the condenser (outside). These get dirty over time. Dirty coils act as insulation, blocking heat transfer and reducing efficiency. To keep them working, change indoor filters regularly and clear any debris within two feet of the outdoor unit so it has enough "breathing room" to release heat.

STRAIGHTEN THE FINS

The aluminium fins on your coils are delicate. They bend easily, blocking airflow and reducing efficiency. Use an inexpensive "fin comb" to straighten them yourself—no professional needed.

WHEN TO CALL THE EXPERTS

While homeowners can handle basic cleaning, an AC is a complex machine. Once a year, usually in the spring, it is vital to hire a licensed professional for a full service.

THE REFRIGERANT REALITY

It is a myth that AC units need to

be "topped off" like a car needs gas. An AC system is sealed; if refrigerant is low, you have a leak. A professional won't just add more; they will find and repair the leak using specialized equipment to safely capture the gas instead of venting it into the air.

AC maintenance is a partnership. By changing filters and clearing debris, you provide the daily care the system needs. An annual professional tune-up provides the deeper check-up that prevents total breakdowns. Don't wait for a heatwave to find out your system is struggling. A little maintenance today ensures your home remains a cool, cost-effective sanctuary all summer.

MECHANICAL AND ELECTRICAL PRECISION

A pro looks where you can't. They check for burned electrical contacts, tighten loose connections, and measure motor voltage. They also verify your thermostat's accuracy. If it is miscalibrated, your system may run longer than necessary, wearing out the compressor prematurely.

DO THE DUCTWORK

Even the most efficient AC is wasted if your ducts leak into the attic or walls. A professional can perform a leakage test and seal those gaps, ensuring that all the air you pay to cool actually reaches your living space.

How air conditioning protects from air pollution

ADRIN SARWAR

As of 2024, more than 55% of the world's population lives in urban areas, which is expected to rise to nearly 70% by 2050. While cities are hubs of innovation and economy, they are also epicentres of concentrated air pollution. Between vehicle emissions, industrial runoff, and the "Urban Heat Island" effect, city dwellers are constantly exposed to a "toxic soup" of atmospheric pollutants. In this context, air conditioning (AC) has evolved. No longer merely a tool for thermal comfort, modern HVAC (Heating, Ventilation, and Air Conditioning) systems have become the primary line of defence in maintaining public health.

FILTRATION OF PARTICULATE MATTER

AC improves urban air quality by filtering harmful particles like PM2.5 and PM10. Standard residential filters (MERV 8-11) catch dust and pollen, while high-grade versions (MERV 13-16) trap bacteria and smog. Constant air circulation through these filters ensures indoor air stays significantly cleaner than the polluted street air.

The next generation of urban AC is intelligent. We are seeing the integration of: HEPA and UV-C Light: Systems that use ultraviolet light to kill airborne viruses and bacteria, a technology that gained massive traction post-COVID-19.

A SEALED ENVELOPE

One of the greatest risks to urban health is infiltration. In high-traffic cities, outdoor air often contains high levels of nitrogen dioxide and ground-level ozone. When a building utilises air conditioning, it creates a "sealed envelope." AC seals your home by keeping windows closed, blocking exhaust and soot. Advanced systems also use positive pressure to push air

out of cracks, preventing unfiltered outdoor pollutants from leaking in.

CONTROLLING HUMIDITY AND MOULD

High humidity in cities breeds mould and dust mites. According to the World Health Organization (WHO), indoor dampness and mould are major triggers for asthma and chronic

ILLUSTRATION: ADRIN SARWAR

obstructive pulmonary disease (COPD). Air conditioners act as large-scale dehumidifiers. By stripping excess moisture from the air, they keep indoor humidity levels between the "healthy zone" of 30% to 50%, effectively neutralising biological pollutants before they can colonise.

MITIGATION OF VOC

Off-Gassing Cities are full of synthetic materials—paints, treated woods, plastics, and carpets. These materials release Volatile Organic Compounds (VOCs). Heat speeds up the release of toxic VOCs from synthetic materials. By maintaining cool, stable temperatures, AC slows this "off-gassing." Advanced units also use activated carbon filters to chemically remove these toxins and odors from the air.

URBAN HEAT ISLAND PARADOX

The relationship between AC and air quality is complex. The Urban Heat

Island (UHI) effect makes cities 5–15°C warmer than rural areas as concrete absorbs heat. AC units worsen this by dumping indoor heat onto streets, creating a feedback loop where rising heat increases smog, making cooling even more essential for survival. To combat this, urban planners are adopting District Cooling Systems—

centralised plants that cool entire neighborhoods more efficiently than individual units.

SMART SENSING AND PURIFICATION

The next generation of urban AC is intelligent. We are seeing the integration of: HEPA and UV-C Light: Systems that use ultraviolet light to kill airborne viruses and bacteria, a technology that gained massive traction post-COVID-19. Modern units can now detect high levels of CO2 or PM2.5 and automatically increase ventilation or filtration rates.

In modern cities, the AC has evolved from a luxury into vital health infrastructure. Despite energy challenges, its ability to filter particles, control humidity, and block urban toxins is indispensable. For the urban dweller, the AC isn't just cooling the room; it is cleaning the very air they breathe.

MD. NURUL AFSER
Deputy Managing Director
ELECTRO MART GROUP

Nearly 45% of our sales come from district and semi-urban areas. To overcome rural challenges like voltage instability and low awareness, we are leveraging government power initiatives and our extensive network—5,000+ technicians, 2,000+ dealers, 70+ showrooms, and digital media—to drive growth.

HEATWAVES, RURAL DEMAND boost AC sales

Electro Mart Group

Record-breaking heatwaves over the past two years have fundamentally altered the consumer landscape in Bangladesh. Air conditioners have turned from high-end luxuries into essential household appliances. In this interview, Md. Nurul Afser, Deputy Managing Director of Electro Mart Group, discusses the projected 20% demand surge for 2026 and how the industry is evolving through AI-driven efficiency and a massive expansion into district towns.

The Daily Star(TDS): With temperatures hitting record highs, how has the demand forecast for 2026 changed?

Md. Nurul Afser(MNA): The prolonged heatwaves over the past two years have structurally shifted the AC market in Bangladesh. For 2026, we are projecting a 15–20% increase in overall demand compared to earlier forecasts. Air conditioners are no longer viewed as luxury items but as essential home appliances, particularly among middle-income households, along with rural and semi-urban areas.

TDS: Almost all new models focus on inverter technology. Is there still a future for non-inverter ACs in Bangladesh?

MNA: Inverter technology now accounts for over 80% of new AC sales. However, non-inverter units will not disappear entirely. There remains a niche market in small retail shops, offices,

first-time buyer and certain commercial applications where usage hours are limited and upfront cost sensitivity is high.

TDS: What challenges do local manufacturers face in transitioning to R32 refrigerant?

MNA: R32 is more environmentally friendly with a lower Global Warming Potential (GWP). Additionally, dependence on imported components and fluctuations in the US dollar increase cost pressures. However, from a sustainability perspective, the transition is both necessary and inevitable.

TDS: As you launch the Gree 'Airy' inverter AC series, how does AI personalise cooling?

MNA: The new Gree 'Airy' inverter series integrates AI-driven sensors that analyse room temperature, humidity levels, and occupancy patterns to optimise compressor performance automatically. Compared to conventional inverter models, customers can expect an additional 10–15% energy savings. The system reduces unnecessary compressor load while maintaining stable and comfortable cooling. It features WiFi & Bluetooth connectivity, voice control and an advanced Cold Plasma sterilisation system that eliminates 93% of bacteria and viruses, keeping your home environment clean and healthy.

Iran, US snub negotiation to end war

Trump's Hormuz plan meets with cautious response from allies as Iran warns against 'wider war'

AGENCIES

The United States and Iran yesterday rejected talks to end the war, as Tehran warned other countries against getting involved after President Donald Trump urged world powers to send warships to escort oil tankers through the Strait of Hormuz.

On the ground, the war continued with warring parties launching waves of strikes against each other, killing and wounding dozens.

In an interview with CBS's "Face the Nation", Foreign Minister Abbas Araghchi said Iran was not interested in talks with the US, pushing back on Trump's stance that Tehran wants a deal to end the war.

"We have never asked for a ceasefire, and we have never asked even for negotiations," Araghchi said. "We are ready to defend ourselves for as long as it takes."

"We are stable and strong enough. We are only defending our people," said Araghchi. "We don't see any reason why we should talk with Americans, because we were talking with them when they decided to attack us."

Trump on Saturday said Iran wanted a deal, but that he was not prepared to make one on current terms, without giving further details.

Bangladesh pacer Taskin Ahmed celebrates with teammates after dismissing Salman Agha, left, who hit a brilliant 106 off 98 balls but could not take Pakistan over the line, as the hosts won the third and final ODI by 11 runs to seal the three-match series 2-1 at the Sher-e-Bangla National Cricket Stadium in Mirpur yesterday. Earlier, Bangladesh opener Tanzid Tamim laid the platform for the win with a run-a-ball 107.

PHOTO: FEROZ AHMED

Tigers clinch series with nail-biting victory

STAFF CORRESPONDENT

The game swung to and fro, but Bangladesh prevailed in the thriller, winning the third and final ODI against Pakistan by 11 runs to clinch the series 2-1 at the Sher-e-Bangla National Cricket Stadium in Mirpur yesterday.

Opener Tanzid Tamim smashed his maiden ODI hundred to set up Bangladesh for a competitive 290 for five. Pacers Taskin Ahmed and Nahid Rana then left Pakistan tottering at 82 for five, but the visitors fought back as the match turned into an edge-of-the-seat contest due to Salman Ali Agha's battling 106 off 98 deliveries and captain Shaheen Shah Afridi's 37 off 38 balls.

Needing 45 from the end, Bangladesh won by 11 runs.

Govt, opposition MPs spar over reform council

STAFF CORRESPONDENT

The opposition in parliament yesterday raised concerns over the delay in convening the Constitution Reform Council, while the treasury bench maintained that the president cannot summon a council session as the body has no constitutional existence.

The debate unfolded during an unscheduled discussion in the House on the final day of the deadline for President Mohammed Shahabuddin to convene the session, as stipulated in the July charter implementation order.

As the second sitting of the first parliamentary session begun at 11:00am, Leader of the Opposition and Jamaat-e-Islami Ameer Shafiqur Rahman stood up to raise the issue. Speaker Hafiz Uddin Ahmad said the opposition leader would be given the floor after the question-and-answer session.

Following the Q&A session, the speaker gave the floor to Shafiqur.

The opposition leader said this parliament, formed in the backdrop of the July uprising, did not come through a normal electoral process but through a presidential order issued on November 13, 2025.

Reading out a portion of the July National Charter (Constitution Reform) Implementation Order, 2025, he noted that under the order, a session of the Constitution Reform Council was to be convened within 30 days of the election results being published, following the same procedure used to convene the first session of parliament.

Caretaker govt system restored automatically

Will take effect only after tenure of current parliament, says SC

ASHUTOSH SARKAR

The Supreme Court has observed that the system of a non-party caretaker government (NPCG), led by the most recently retired chief justice, has automatically been restored in the constitution.

However, the system will come into effect only after the tenure of the current 13th parliament, according to the full text of the verdict uploaded to the Supreme Court's website yesterday.

The observation was made in the 74-page full verdict by a seven-member Appellate Division bench headed by the then chief justice, Syed Refaat Ahmed. The bench unanimously delivered the ruling after allowing two separate appeals and four review

SEE PAGE 2 COL 1

Why new US trade weapon a threat to Bangladesh

STAFF CORRESPONDENT

A new trade storm is gathering in Washington, and Bangladesh is directly in its path.

On March 11, the United States launched a sweeping investigation into 16 countries, from industrial giants like China and the European Union to developing exporters such as Bangladesh and Cambodia.

The official accusation? These countries are artificially propping up their industries, creating a "structural overcapacity" (essentially, making way too many products) that hurts American factories.

NEWS ANALYSIS

To understand why the US is suddenly targeting Bangladeshi export subsidies and even cement factories, we need to look at the calendar. Recently, the US Supreme Court struck down the legal tool the White House had been using to impose punitive tariffs on other countries. Then the Trump administration turned to a temporary measure to impose those tariffs, currently set at 10 percent globally. That measure will expire on July 27, which is why the US government revived an old legal tool known as Section 301 of the Trade Act of 1974. This

JU student found dead in her home Husband detained

JU CORRESPONDENT

The body of a female student of Jahangirnagar University was recovered yesterday from her home in Savar's Islamnagar area, adjacent to the campus.

Deceased Sharmin Jahan was a student of the 51st batch of the Public Administration Department, said JU Proctor AKM Rashidul Alam.

Sharmin's husband Fahim Al Hasan told neighbours that he returned home in the afternoon and found the door locked from the outside. He said he later entered the house and found his wife lying on the floor in a bloodied state.

Later, with the help of his landlord, Sharmin was taken to Enam Medical College Hospital in Savar, where doctors declared her dead, added Fahim.

The body was later taken to Shaheed Suhrawardy Medical College in Dhaka for an autopsy, said Rubel Howlader, officer-in-charge of Ashulia Police Station.

Two die minutes after pre-surgery injection

Families accuse nurses of negligence; SBMCH suspends 2 nurses

OUR CORRESPONDENT, Barisal

Two patients died following alleged negligence by on-duty nurses at Sher-e-Bangla Medical College Hospital in Barisal yesterday.

The deceased are Helena Begum, 45, wife of the late Babul Hawlader of Sarsi village in Barisal, and Shefali Begum, 60, wife of Mannan Talukder from Dalbuganj village in Kalapara, Patuakhali.

The incident occurred around 8:30am at the female ward of ENT department, on the third floor of the hospital.

Relatives of the deceased said they would seek legal action over the deaths.

Hospital administration sources and family members said Helena was admitted on February 23 for thyroid complications, while Shefali was admitted on March 8 for a surgery to remove a tumour in her mouth.

Speaking to reporters, Helena's relative Monir alleged that the patient was scheduled to undergo surgery at around 8:30am yesterday.

However, around 7:00am, a nurse administered

Iran, US snub negotiation

FROM PAGE 1

As Washington has brushed aside attempts by Middle Eastern allies to open talks, three sources told Reuters, and Iran's Revolutionary Guards said on Sunday they had fired more missiles at Israel and three US bases in the region, including Saudi Arabia's Al-Kharrj.

"This war will end when we are certain that it will not be repeated and that reparations will be paid," Araghchi yesterday told Arabic language news platform Al-Araby Al-Jadeed.

Trump responded by urging "China, France, Japan, South Korea, the UK and others" to send warships to escort tankers, while the US military continues to pound drone, boat and missile launch sites in Iran on the north shore.

But the countries he listed have given only guarded responses, and Araghchi, in a call with French

counterpart Jean-Noel Barrot, warned them to "refrain from any action that could lead to escalation and expansion of the conflict".

The UK defence ministry was non-committal, saying "we are currently discussing with our allies and partners a range of options to ensure the security of shipping in the region".

Britain's minister for energy security, Ed Miliband, told the BBC the "plan now has to be to de-escalate the conflict... We are talking to our allies. There are different ways in which we can make maritime shipping possible."

South Korea said it was monitoring Trump's remarks on social media, while the policy chief of Japan's ruling party, Takayuki Kobayashi, said the bar for sending Japanese navy ships to the region under existing laws was "extremely high".

Global oil prices have surged by

40 percent as Iran has choked off the vital sea passage and attacked energy and shipping industry targets in its Gulf neighbours.

The strikes were in retaliation for the US and Israeli air campaign that killed its supreme leader, triggering a war across the Middle East.

Meanwhile, Iran's Revolutionary Guards yesterday vowed to target Israeli Prime Minister Benjamin Netanyahu.

"If this child-killing criminal is alive, we will continue to pursue and kill him with full force," said the Guards on their website Sepah News.

Ukrainian President Volodymyr Zelensky on Saturday claimed that Russia was supplying Iran with Shahed drones to use against the US and Israel.

Zelenskiy told CNN's Fareed Zakaria that it is "100% facts" that Iran has used Russian-made Shaheds to attack US bases.

As the war drags on, Israel

yesterday approved an \$827-million emergency budget allocation for military purchases, Israeli media reported.

Despite the hardline talk from all sides, residents of Tehran were able to go about their work week in the most normal atmosphere since the start of the war on February 28.

Traffic was busier than last week, and some cafes and restaurants had reopened. Some shoppers queued at ATMs to withdraw cash. It was a similar story outside the capital.

More than 1,200 people have been killed by US and Israeli strikes, according to Iranian health ministry figures that could not be independently verified.

The UN refugee agency says up to 3.2 million people have been displaced in Iran. The Pentagon says more than 15,000 targets in Iran have been hit by US and Israeli forces.

Why new US trade weapon

FROM PAGE 1

powerful law gives the US president massive leeway to punish other countries for "unfair" trade practices, and it doesn't require approval from Congress or the courts.

Dr Deborah Elms, head of trade policy at the Hinrich Foundation, explains that the US is keeping this investigation on a very short leash.

"The USTR's goal is to replace these [expiring] tariffs with new measures by July," she wrote in an article on her organisation's website on March 12. Because they are in such a rush, the US government is throwing everything at the wall to see what sticks, accusing these 16 countries of a wild variety of offences just to justify new taxes.

Washington's use of Section 301 has mutated over the years. For decades after the World Trade Organization (WTO) was formed in 1995, Section 301 was mostly a bureaucratic stepping stone. The US government primarily used it to gather evidence before politely taking a formal trade dispute to the international WTO courts.

That polite era ended during the first Trump administration. Washington stopped asking the WTO for permission and turned Section 301 into a unilateral sledgehammer. The most famous example was the 2018 trade war, when the US bypassed global courts and slapped punishing tariffs -- ranging from 7.5 percent to 25 percent -- on \$370 billion worth of Chinese goods over intellectual property theft, according to the US Congress website. They also briefly used it to tax European goods in 2020 over a dispute involving airplane subsidies. When the Biden administration took over, it didn't put the weapon away. In May 2024, after a formal review, Biden not only kept those Trump-era China tariffs but actively spiked some of them (like jacking up taxes on Chinese electric vehicles).

Now, by scooping up 16 incredibly diverse economies -- lumping a vulnerable, developing garment hub like Bangladesh into the same regulatory basket as China, Germany, and India -- the US is breaking all historical precedents. Washington is no longer using Section 301 to fix specific, targeted trade violations; it is using it as a frantic, sweeping dragnet to replace the universal tariff revenue it just lost in the Supreme Court.

Stephen Lamar, the president of the American Apparel & Footwear Association, said that his group was discouraged by the proposed tariffs and that the administration should slow down and work with various stakeholders, including Congress, according to a New York Times report. He likened the process to the administration trying to "glue together shattered glass in a messy fix."

"We understand the administration is hurriedly trying to recreate the tariff rates it had sought to establish under a scheme now deemed illegal by the Supreme Court," he said. "In this effort, the process increasingly feels like answers in search of an investigation rather than an investigation in search of answers."

However, in recent days, some commentators in Bangladesh have gone on social media to downplay the threat as a non-event. Their logic is: Because we are on a list with 15 other countries like China and India, we are safely hidden in the crowd. Don't panic and don't go into a frenzy.

This is a dangerous mindset.

Simply put, Section 301 is not a group punishment. The US can use this law to slap high taxes directly on Bangladeshi exports. As Dr Elms warns, the current US administration "appears keen to retaliate first and discuss mostly later," and any penalties they apply "are likely to be long-lasting."

If the US slaps new taxes on Bangladeshi clothes just as the country loses its special LDC trade privileges, it could be a fatal blow to factory margins and millions of jobs.

Because this is a rushed political scramble, the US government's arguments for targeting Bangladesh are economically unreasonable. They accuse Bangladesh of overproducing goods and using government cash incentives to dump cheap products on the world.

So why don't accusations against Bangladesh make no sense?

1. You can't "overproduce" made-to-order shirts

The US treats Bangladesh's ready-made garment (RMG) sector as if it were a Chinese steel mill churning out metal to oversupply the market. But the garment industry doesn't work that way. It is entirely made-to-order. A factory in Dhaka doesn't sew a thousand shirts unless an American brand like Target or Walmart explicitly places an order for them. You cannot accuse Bangladesh of "overproducing" goods that American companies specifically asked for.

2. The arbitrary cement logic

In its official complaint, the US literally pointed to unused capacity in Bangladesh's cement industry as proof of unfair trade. This shows how little homework Washington did. Cement is heavy and expensive to ship. Bangladesh makes cement strictly to build its own local bridges and roads; it doesn't ship it to California. Suggesting that cement mills in Dhaka are a threat to American workers is arbitrary.

3. Bangladesh is following the rules

The US is seemingly unhappy about the cash incentives the Bangladeshi government gives to its exporters. But under global trade rules, poor countries (Least Developed Countries, or LDCs) are legally allowed to use these incentives to grow their economies. Furthermore, because Bangladesh is graduating from LDC status in 2026, it is already in the process of cutting these subsidies anyway. The US is basically trying to penalise Bangladesh for a completely legal programme that Dhaka is already shutting down.

With public hearings starting on May 5 in Washington, and a tight mid-April deadline for written defences, Dhaka has to move fast. Relying on friendly diplomatic chats or just complaining that the US is being unfair will not work. To survive this trade trap, Bangladesh needs to show up with hard data and a clear strategy: Bangladeshi diplomats should confer with American CEOs and immediately team up with major US clothing brands, if possible. Those executives need to say: If you tax Bangladesh, you aren't bringing factory jobs back to America. You are just forcing American families to pay more for their kids' school clothes.

Bangladesh must focus on the "made-to-order" reality. Show the US the paper trail proving that every garment leaving the port was explicitly requested by a US buyer. Instead of hiding the export cash incentives, Bangladesh should proudly show the data proving they are perfectly legal under international law, and highlight the exact timeline of how the country is already phasing them out.

The US's main target right now is China. Bangladesh needs to politely remind Washington that it is a friendly, developing nation helping American companies diversify their supply chains. Punishing Bangladesh only pushes global trade back into Beijing's hands.

Bangladesh's representatives shouldn't get emotional or play the victim. They need to show up with a factual takedown of the US government's flawed math.

Govt, opposition MPs spar over reform council

FROM PAGE 1

"Today [yesterday] is the 30th calendar day since the publication of the results, but the session has not been convened. That is my concern."

He argued that the session of the Constitution Reform Council should also be convened on the prime minister's advice to the president, similar to a parliamentary session.

Under the July Charter Order, members of the 13th parliament are expected to perform dual roles -- as lawmakers and as members of a Constitution Reform Council tasked with addressing 48 constitutional provisions outlined in the July charter within 180 working days.

For this, MPs were required to take two separate oaths -- one as members of parliament and another as members of the council.

After Shafiqur's remarks, Speaker Hafiz Uddin said he expected a response from the ruling party.

Home Minister Salahuddin Ahmed then took the floor and explained that while the president can issue ordinances when parliament is not in session, constitutional amendments or changes cannot be made through such ordinances.

He further argued that the July National Charter Implementation

Order is neither an ordinance nor a law, but something in between, raising legal concerns over what he described as an imposed order.

"I am not denying anything. The people's verdict must be respected, but it has to be done constitutionally -- it has to be done legally. There is no place for emotion here. A state does not run on emotion. A state runs on the constitution, on law, on rules."

The home minister added that the president cannot convene a session of the Constitution Reform Council, as such a body does not exist under the constitution.

"Since the Constitution Reform Council does not exist, the prime minister cannot advise the president on it, and the president also cannot summon that session of the council; therefore, he did not convene it."

Salahuddin said opposition lawmakers had taken oaths as members of the Constitution Reform Council in an unconstitutional manner and were now demanding that the president convene its session.

He emphasised that while the people's mandates should be respected, reforms must be implemented through constitutionally recognised processes, and any constitutional change must be introduced and

passed through the proper legislative procedure.

Salahuddin said the current parliamentary session was required to settle 133 pending ordinances, making it difficult to immediately introduce a constitutional amendment bill.

However, he indicated that the issue could be taken up during the upcoming budget session, when the Business Advisory Committee may decide on forming a committee and placing a constitutional amendment bill before parliament.

The home minister said the government wants the full implementation of the July charter. "But whether the constitution can be amended through any imposed order outside the July National Charter, through any unlawful order, is a major legal and constitutional question. That too we should debate and discuss. We should discuss it in the Business Advisory Committee and bring forward a bill for constitutional amendment."

He said the bill will be adopted in this great house on the basis of consensus.

"We have followed the constitution till now and we will continue to do so."

Later, addressing Opposition Leader Shafiqur, Speaker Hafiz Uddin

said, "You have presented a matter of great public importance. Such important issues cannot be resolved on the spot. For this, you will need to submit a formal notice. Once I receive the notice, I will give my decision."

Speaking to reporters after the sitting, Shafiqur said, "We will now submit a notice."

He said the opposition wants to resolve the issue within parliament itself. "But if, for any reason, the expectations or aspirations of the people are not realised inside parliament, then naturally we will have to take to the streets."

Meanwhile, all 133 ordinances issued during the interim government have been sent to a special committee of the National Parliament for review, tasked with examining them and submitting a report by April 2.

The ordinances were referred to the committee following a proposal by Law Minister Asaduzzaman in parliament.

Earlier, on March 12, during the first sitting, he placed the ordinances, and on the same day, a special committee was formed to scrutinise them.

The 50-hour-long discussion on the thanksgiving motion on the president's speech also began yesterday.

Caretaker govt system

FROM PAGE 1

petitions filed against the 2011 verdict.

The appellants and petitioners are BNP and Jamaat-e-Islami; rights organisations Shushashoner Jonno Nagorik, and Human Rights Support Society; and freedom fighter Mofazzal Islam from Naogaon.

On November 20 last year, the apex court delivered a short verdict overturning its judgment that had scrapped the caretaker government system in May 2011. Then chief justice ABM Khairul Haque led the seven-member bench that declared the 13th Amendment to the constitution null and void by a majority view.

After the verdict was announced, the 15th amendment to the constitution was passed by the National Parliament on June 30, 2011, bringing several changes, including the abolition of the caretaker government system. A gazette notification was published to this effect on July 3, 2011.

The caretaker government system was introduced in 1996 through the 13th amendment, which aimed to safeguard democracy by ensuring free and fair elections under an NPCG that would remain in power for only 90 days.

The full text of the verdict said the caretaker government system cannot be applied while a parliament is still in place, nor can it be

applied retroactively to an interim government that began without it -- such as the one led by Prof Muhammad Yunus.

In the verdict, Chief Justice Syed Rezaat Ahmed, the author of the judgment, observed that although the NPCG mechanism stands automatically restored, such provisions cannot be activated immediately.

"Therefore, the restored provisions shall lie dormant until enabling circumstances as specified in the restored provisions themselves come into play," the verdict read.

Justice Md Ashfaqul Islam, a senior judge of the Appellate Division, agreed with the verdict.

He noted that the 13th amendment was passed in good faith under article 7 of the constitution. He added that the doctrine of necessity justified the caretaker government as a temporary safeguard for democracy, and that it preserved, rather than destroyed, the constitution's basic structure.

About the judgment of the then Chief Justice Khairul Haque, who signed the verdict 16 months after his retirement, Justice Ashfaqul said, "In the full text of the verdict, Chief Justice ABM Khairul Haque, the author of the majority decision, sought to anchor his reasoning upon an expanded and somewhat personalised interpretation of the 'basic structure', confining it to

a narrow vision of democracy and the rule of law.

"But this exposition, instead of preserving the constitution's spirit, distorted the framers' original intent. It unsettled the delicate constitutional balance that was meant to harmonise democratic governance with people's supremacy. The judgment, in essence, subverted the inbuilt dictum of the constitution that democracy derives legitimacy not merely from form, but from the people's effective participation in government through a transparent electoral process."

Contacted, SC lawyer and constitutional expert Barrister Imran Siddiqi told this correspondent that there is no need to amend the constitution or enact a new law to give effect to the caretaker government, as the SC judgment states that the relevant provisions will be automatically restored.

"The restored provisions will remain dormant until the dissolution of the 13th parliament, since only a dissolution can trigger the NPCG provisions as stipulated under Articles 58B [1] and 58C [2]."

"However, the apex court judgment does not bar parliament from amending the form of the caretaker government system without undermining or dismantling the mechanism."

Visitors from different generations browse books at a stall on the last day of the Amar Ekushey Book Fair yesterday at Dhaka's Suhrawardy Udyan. Although publishers reported disappointing turnout and sales this year, ardent bookworms still turned up in droves. The fair continues to draw readers of all ages, offering something for everyone.

'Largely ceremonial' book fair ends

Publishers lament low turnout, poor sales

DIPAN NANDY

The Amar Ekushey Book Fair — one of the most cherished cultural gatherings in the country — ended yesterday, leaving many publishers disappointed as they felt the event was more symbolic than successful this year.

Despite initial uncertainty over its organisation, the fair was eventually held. However, many in the publishing industry said it fell short of expectations.

Farid Ahmed of Somoy Prokashon said, "This year's fair felt largely ceremonial. We took part, and readers also came, but neither participation nor sales met our expectations. We hope lessons from this year will guide the planning of future fairs."

Mahbubur Rahman, CEO of Adarsha Prokashoni, said the industry must begin preparing early for the next edition.

"This year's fair has ended, but discussions about the future

should start now. We need to rethink how the fair can be organised more effectively when it coincides with Ramadan again," he said.

However, Mohammad Azam, director general of Bangla Academy, said the shape and timing of future fairs largely depend on publishers.

"We are only the organisers. The main stakeholders are the publishers. They will decide what the next fair should look like and when it should be held. Of course, the government's goodwill also plays an important role," he said.

Even on the final day, sales remained slow. During the daytime, most stalls saw few visitors as many avoided going out in the afternoon heat while fasting during Ramadan.

Dhaka University student Sadia Rahman said she felt compelled to attend despite her busy schedule.

"I came late this year, so I

Police to probe constable hiring from 2014-24

MOHAMMAD JAMIL KHAN

At least 70,000 police constables recruited between 2014 and 2024 are set to come under scrutiny as Bangladesh Police has ordered an investigation into alleged irregularities in recruitment during that period.

The decision was issued in an office order yesterday by Inspector General of Police Md Ali Hossain Fakir, directing district-level committees to probe allegations of corruption, rule violations, and other irregularities.

At least three senior officials at Police Headquarters confirmed the development to The Daily Star last night.

"At least eight to ten thousand constables are recruited in the force yearly. In that way, the number of recruited constables during the period is not less than 70,000," said a PHQ official, requesting anonymity.

According to the order, district-level committees headed by superintendents of police (SPs) will conduct the inquiry and submit their findings, along with opinions, to Police Headquarters by April 15, 2026.

Each committee will also include the additional superintendent of police (administration), DIO-1 (district intelligence officer), and ROI/RO-1

ASHULIA KILLINGS

'Coordinated campaign' against unarmed civilians

Says full verdict of ICT-2

STAFF CORRESPONDENT

The full verdict of International Crimes Tribunal-2 has described a coordinated collapse of police command during the July uprising, accusing law enforcers of systematic killings, destruction of evidence and obstruction of justice.

The 591-page judgment, received by the prosecution yesterday, detailed how five people were killed and their bodies burned, while another victim was set on fire while still alive.

The three-member tribunal led by Md Nozrul Islam Chowdhury concluded that the atrocities were part of a "coordinated

and organised campaign" against unarmed civilians rather than isolated incidents.

On February 5, the tribunal convicted 16 political and law enforcement officials of crimes against humanity, saying the offences fell within the "rarest category of cases warranting the severest punishment".

Six convicts — including Muhammad Saiful Islam and AFM Sayed Roni — were sentenced to death. Others given capital punishment are former SI Abdul Malek, former ASI Biswajit Saha, and Constables Mukul Chokder and Roni Bhuiyan.

The tribunal said anything less than the death penalty could undermine public

SEE PAGE 10 COL 5

Dust pollution worsens air quality in Khulna

DIPANKAR ROY, Khulna

Khulna has been witnessing a steady deterioration in air quality due to dust pollution, raising concerns among residents, environmentalists and public health experts.

While Dhaka has long been labelled one of the most polluted cities, recent data suggest that Khulna at times even surpasses the capital in hazardous air conditions.

Experts said the worsening air pollution is the result of a combination of factors, including nearby brick kilns, unpaved or damaged roads, unchecked construction activities and emissions from ageing vehicles.

According to Switzerland-based air quality monitoring organisation IQAir, Khulna recorded an Air Quality Index (AQI) of 279 at 10:00am on December 20, much higher than Dhaka's 202 at the same time. An AQI reading above 200 is considered very unhealthy, while levels exceeding 300 fall into the hazardous category.

Despite a plan supported by the World Health Organization to transform Khulna into a healthier urban environment by 2027, air quality remains alarmingly poor.

Development works under the Khulna City Corporation, Khulna Water Supply and Sewerage Authority and Khulna Development Authority have left large sections of city roads dug up for months, creating widespread dust pollution.

Major projects include a Tk 823-crore drainage initiative, a

have intensified the dust problem across the city.

Abdul Karim Hawlader, a shopkeeper near Sonadanga Women's Sports Complex, said large pits dug by ongoing sewerage works have left the road surface broken in the area, worsening the situation in recent months. "Hundreds of

Mahfuzur Rahman Mukul, divisional coordinator of Bangladesh Environmental Lawyers Association, said institutional failures are turning Khulna into another pollution hotspot.

Dr Sujat Ahmed, deputy director of Khulna Medical University, said air pollution can trigger cough, asthma and respiratory infections, particularly among children and the elderly.

Executive Magistrate and Chief Waste Management Officer Kohinur Jahan of KCC said cleanliness drives are being carried out across the city. "Contractors have also been instructed to promptly remove soil and construction waste generated from public works," she said.

She urged residents and developers to avoid dumping construction materials on roads.

Khandaker Md Fazlul Hoque, director of the Department of Environment in Khulna, said they have already discussed the matter with all relevant stakeholders.

"It is not possible for our department alone to control the situation. Although we are conducting regular drives and fining polluting institutions, fines alone cannot solve the problem."

Tk 607 crore road development programme, a Tk 2,300-crore sewerage system project, a Tk 259-crore road widening project and additional development activities worth about Tk 650 crore by other agencies. Poor coordination and prolonged implementation, particularly during the dry season,

vehicles use the route daily, causing dust to engulf the area. Customers avoid staying long, and I often suffer from coughing and eye irritation."

Shamima Begum, a resident of Bastuhara area, said her children frequently have breathing difficulties, especially during the dry season.

Queues still snake

FROM PAGE 12

"They have instructed us to ensure that no one misuses the new decision and that fuel is not wasted," he said, adding that if people take fuel only as needed, the situation should improve within the next two to three days.

Earlier in the morning, the government announced the withdrawal of restrictions on fuel distribution after several imported shipments reached Chattogram Port.

Restrictions had been lifted to facilitate smooth travel during the upcoming Eid-ul-Fitr holidays and to support farmers' fuel needs during the ongoing Boro cultivation season, the power, energy, and mineral resources ministry said in a statement.

With improved supply, fuel will now be available at all distribution points according to demand, effective immediately and until further notice.

The government earlier introduced fuel rationing and other controls as a precautionary measure amid concerns over possible supply disruptions in the international fuel market due to the ongoing conflict in the Middle East.

At yesterday's meeting, Amit sought cooperation from district administrations to address current global challenges related to electricity and energy supply.

He instructed them to bring discipline to the supply and distribution management of fuel oil.

Key instructions included verifying opening and closing stocks at fuel depots every day, ensuring the supply of fuel allocated from depots to petrol pumps, monitoring distribution to all customers, and investigating specific reasons if any petrol pump remains closed.

The other directives included preventing illegal hoarding of fuel, ensuring the security of oil depots, stopping fuel smuggling, and keeping a strict watch to prevent sales at higher prices.

"The current elected government is sincerely trying to ensure that public suffering does not increase. The administration is expected to remain vigilant and perform its duties with greater firmness," Amit said.

He also called for several electricity-saving measures to be implemented through district administrations.

Earlier, at a meeting with business leaders, Amit instructed them to avoid decorative

lighting in shopping malls and commercial establishments, keep air conditioner temperatures at 25 degrees Celsius or higher and turn off signboard lights after shops are closed.

Representatives from the Federation of Bangladesh Chambers of Commerce and Industry, the Dhaka Chamber of Commerce and Industry, the Bangladesh Shop Owners' Association, Bangladesh Dokan Byabosayi Malik Samity, and the Dhaka Metropolitan Shop Owners Association attended the meeting.

In another meeting with leaders of the Petrol Pump Owners' Association, Amit sought their cooperation to keep the fuel supply normal. Association leaders assured that discipline would return quickly through discussion and coordinated decisions. They also expressed relief over the ministry's swift action and said the situation would soon return to normal.

Meanwhile, reports from Gazipur said most filling stations in Kapasia and Sreepur upazilas remained closed after the withdrawal of rationing, causing shortages and putting vehicles in trouble.

Motorcyclist Saiful Islam was seen pushing his bike into the AK Filling Station after running out of fuel. Another biker, Noman Mia from Pelaid village of Kapasia, was with him.

Noman told The Daily Star that there is no petrol, octane or diesel at this filling station. However, fuel is available in the open market outside.

"It seems like the work of a syndicate. The filling stations are not selling fuel but are instead selling it outside at higher prices," he said.

A vendor was seen selling loose oil from a table on the north side of Bormi intersection at Tk 150 per litre, much higher than the government-fixed rate. When asked, the seller refused to say his name.

"There is no shortage of fuel in my shop," he said.

In Chattogram city, snaking queues were seen outside many filling stations yesterday afternoon.

Octane was unavailable in the Sena Filling and CNG Station on Bayezid Road and at the Tigerpass Agency. Another nearby filling station Badshah Miah and Sons was closed.

[Our correspondents in Gazipur and Chattogram contributed to this report.]

US-ISRAELI ATTACKS ON IRAN Trump aides debate exit vs escalation

REUTERS, Washington

A complex tug-of-war inside the White House is driving US President Donald Trump's shifting public statements on the course of the Iran war, as aides debate when and how to declare victory even as the conflict spreads across the Middle East.

SHIFTING MESSAGES

Economic advisers and officials, including from the Treasury Department and the National Economic Council, have warned Trump that an oil shock and rising gasoline prices could quickly erode domestic support for the war, said the adviser and two others close to the deliberations, speaking on the condition of anonymity to disclose internal discussions.

Political advisers, including Chief of Staff Susie Wiles and deputy chief James Blair, are making similar arguments, focusing on the political fallout from higher gas prices and urging Trump to define victory narrowly and signal the

A firefighter extinguishes a blaze in a vehicle following a projectile impact from an Iranian strike in southern Tel Aviv, Israel yesterday. PHOTO: AFP

operation is limited and nearly finished, the sources said.

Pushing in the other direction are hawkish voices urging Trump to sustain military pressure on Iran, including Republican lawmakers such as US Senators Lindsey Graham and Tom Cotton, and media commentators such as Mark Levin, according to people familiar with the matter.

LOOKING FOR AN EXIT

On Saturday, Trump has called on countries to send warships to the Strait of Hormuz to keep shipping traffic open amid soaring oil prices. Trump said he hoped China, France, Japan, South Korea, the United Kingdom and others would join the United States in sending ships to the strait between Iran and Oman.

The shifting reasons for launching the conflict, which has spilled over into more than half a dozen other countries, have only made it more difficult to predict what comes next.

For their part, Iran's rulers will claim victory, analysts say, for simply surviving the US Israeli onslaught, especially after demonstrating their ability to fight back and inflict damage on Israel, the US and its allies.

Israel running critically low on interceptors Report says, citing US officials

AGENCIES

Israel has warned the United States that its supply of ballistic missile interceptors is running dangerously low as its war on Iran enters its third week, according to US officials who spoke to Semafor.

Israeli defence systems entered the current conflict already depleted after last year's fighting with Iran, when large numbers of interceptors were used to block incoming missiles. Iran's sustained barrage has placed further strain on Israel's long range air defence network.

Reports indicate that Iran has also equipped some of its missiles with cluster munitions, complicating interception efforts and accelerating the depletion of Israel's stockpile, reports Middle East Eye.

Washington has been aware of the problem for months. One US official told Semafor, "It's something we expected and anticipated". The same official stressed that the United States is not facing similar shortages and retains significant interceptor reserves. The comment comes amid growing concern that a prolonged war with Iran could rapidly drain missile defence supplies.

It remains unclear whether Washington will transfer additional interceptors to Israel. Previous US military aid packages have included missile defence systems, and any further transfers could place pressure on American inventories.

"We have all that we need to protect our bases and our personnel in the region and our interests," the US official said.

US MILITARY Swiss reject two flyover requests

REUTERS, Frankfurt

The Swiss government said on Saturday that it discussed requests by US military and official aircraft to fly over the country, and based on its law of neutrality, rejected two Iran-related war flights but permitted three others.

The three approved requests were applicable to two transportation and one maintenance aircraft.

Russia supplies Iran with Shahed drones

Says Ukraine's Zelensky

REUTERS

Russia is supplying Iran with Shahed drones to use against the US and Israel, Ukrainian President Volodymyr Zelensky told CNN in an interview excerpt aired on Saturday.

Zelensky told CNN's Fareed Zakaria that it is "100% facts" that Iran has used Russian-made Shaheds to attack US bases. Shahed drones have been linked to other attacks on countries in the region, although their manufacturers are not always clear.

Ukraine wants money and technology in return for helping Middle Eastern nations defend against Iranian kamikaze drones, Zelensky said, after Kyiv sent specialists to four countries in the region.

He told reporters in comments cleared for release yesterday that each of the three teams sent to the Middle East consisted of dozens of people, who will conduct expert assessments and demonstrate how drone defences should operate.

NEGATIVE WAR COVERAGE US regulator warns broadcasters

AFP, Washington

The top US broadcast regulator on Saturday threatened media outlets over negative coverage of Middle East war, after President Trump slammed critical headlines from the "Fake News Media."

The president since his first term has derided mainstream media as "fake news" and has sued major outlets over what he sees as unfair coverage.

Brendan Carr, chairman of the Federal Communications Commission -- which oversees US radio, television and internet media -- said broadcasters risked losing their licenses over news coverage. "The law is clear. Broadcasters must operate in the public interest, and they will lose their licenses if they do not," Carr said in a post on X.

Two die

FROM PAGE 2
an injection that was meant to be used during anaesthesia. "Soon after receiving the injection, there was a sudden reaction in the patient and she died," he said.

The family of the deceased took the body home and would pursue legal action after the burial, he said.

Meanwhile, Sherali's daughter Khadija Begum said her mother was stable but fell seriously ill shortly after nurses administered several injections in the morning for surgery.

"We immediately informed the nurses, but they paid no heed and took no steps to

revive her. My mother died right in front of our eyes. Only after her death did the nurses respond," she said, demanding exemplary punishment for those responsible.

The allegations were brought against nurses Helen Adhikari and Molina Halder. Helen Adhikari said she did not break open the injection vial, claiming it had been opened by nurse Molina Halder. "I only administered the injections to two patients. What happened to them is very unfortunate. In my 26-year career, such an incident has never occurred. A mistake has happened," she said.

Tigers clinch series

FROM PAGE 1
last five overs, Pakistan appeared in control before Bangladesh roared back. Mustafizur Rahman conceded just six in the 46th over, and Rana followed with another tight over, giving away six in the 47th. The pressure told when Taskin produced a slower delivery to remove Agha in the 48th over.

Pakistan still needed 28 from the last two overs, but Shaheen struck Mustafizur Rahman for two sixes to turn it into a nail-biter. Mustafizur was then struck on the knee roll when Shaheen smashed one straight at the bowler, and there was brief uncertainty over whether he could deliver the final ball of the over. He eventually did, bowling another slower delivery as Haris Rauf holed out at wide long on.

That left Rishad Hossain to defend 14 in the final over. The leg spinner found the right angles with his googlies to keep Shaheen out of his hitting arc. With Pakistan needing 12 off the last two balls, a wide was initially signalled before Bangladesh reviewed a leg before appeal. Snicko showed the ball had brushed Shaheen's bat on its way to the wicketkeeper, overturning the wide decision. Shaheen charged down the wicket to the final delivery needing an impossible 12, but was stumped as Bangladesh celebrated a dramatic series win.

Earlier, Taskin had struck in the first over with a gem of a delivery to dismiss Sahibzada Farhan. Rana then removed the dangerous Maaz Sadaqat, who gloved a pull shot to Litton Das in the second over. Taskin soon rattled Saud Shakeel's stumps with an in-

dupper before Rana dismissed debutant Ghazi Ghori for 29 after a fourth-wicket fifty stand with Abdul Samad. When Samad nicked one to the keeper off Mustafizur, Pakistan appeared to be heading for a collapse.

But Bangladesh's urgency dipped and Pakistan clawed back through a 79-run sixth-wicket stand between Agha and Salman Masood, with Agha picking his moments to swing momentum. Taskin kept the pressure on by bowling Faheem Ashraf, leaving Pakistan needing 117 from 15 overs with four wickets in hand, yet Agha and Shaheen kept Bangladesh on edge.

Missed fielding chances and streaky singles followed as the tension rose, while Agha brought up his century with a top edged six.

Earlier in the day, Tanzid's maiden ODI ton laid the foundation for Bangladesh's innings. He and Saif Hassan shared a 105-run opening stand before Saif fell to Shaheen for a 55-ball 36. While Tanzid remained fluent, scoring became harder for others.

A Haris Rauf delivery seamed back and kept low to trap Najmul Hossain Shanto lbw for 27, breaking a 53-run partnership with Tanzid. Tanzid reached his hundred during a 36-run stand with Litton before Bangladesh's middle order again flattered to deceive.

Contributions of 41 from Litton and 48 not out from Tawhid Hridoy lifted the tempo as Bangladesh scored 77 in the final 10 overs to reach a total that ultimately proved just enough in a contest that swung until the very last ball.

Strictly monitor edible oil prices and supply

Exploitative practices by suppliers must be checked

The apparent shortage of soyabean and palm edible oils in kitchen markets and retail shops across the country, which has pushed edible oil prices above maximum retail prices, appears opportunistic in light of the Middle East war and Ramadan-Eid festival period. According to media reports, the commerce ministry claims that the country has sufficient stock of edible oil, while domestic refiners say they are regularly supplying the usual quantities. Therefore, there should be neither a shortage nor a shortage-induced price hike.

Yet, chain super shops and large retail stores are limiting the number of five-litre bottled soyabean and palm oil an individual consumer can buy, while in many other places customers are having to pay Tk 5-Tk 10 more per litre for loose edible oil. Reports quote retail shop owners' claims that wholesalers are charging higher prices. On the other hand, some wholesalers are blaming the refiners. Others are even blaming the US-Israel war on Iran for the shortage. What's baffling is that Bangladesh imports crude soyabean oil from places such as Argentina, Brazil and Paraguay and palm oil from Malaysia and Indonesia—countries that are not directly affected by the war.

The war, nevertheless, has driven up freight costs, making almost all shipments costly, irrespective of the route used. Also, the global prices of both soyabean and palm oil have been on the rise. The World Bank's commodity price data shows that in December 2025 the monthly average prices for palm and soyabean oil were \$980 and \$1,116 per metric tonne, respectively, while in February 2026 the prices were \$1,042 and \$1,270 per metric tonne. However, the current official prices in the Bangladeshi market do not reflect this rise in global prices, as per a report in *Bonik Barta*. As a standard procedure, the government approves adjustments to edible oil prices monthly to reflect global booking and import costs, but the interim government did not do so this year as a new government was set to take over soon. So, while refiners could not increase the official price of bottled oil, which is monitored more stringently, the prices of loose soyabean and palm oil have been increased.

The government must identify those responsible for the current situation in the edible oil market and take appropriate action against them. At the same time, it must revive the price review process, even if the outcome is not politically popular. In a free market, where the government cannot efficiently monitor every part of the supply chain, suppliers exploit gaps in oversight by raising prices or restricting supply to "correct" the market themselves. Such practices often harm consumers more than if official prices were set closer to actual market levels. Authorities should therefore establish an effective mechanism to prevent supply-chain syndicates from manipulating prices showing artificial shortages.

Continued neglect of potato farmers

Govt must protect them from further losses

There seems to be no end to the struggles of potato farmers. Since the beginning of the year, farmers in the north have been incurring losses due to low market prices. Now, sudden waterlogging in the fields following recent rains has doubled their burden. On the ground across Gaibandha, Joypurhat, and Bogura, this daily found hundreds of acres of potato fields waterlogged—many fully submerged—over the weekend. Many of the crops were ready to be harvested before the rains struck.

Reportedly, some farmers had delayed harvesting because they could not find enough farmhands in time, while others were unable to secure space in cold storages. Some were also waiting for prices to rise before harvesting in order to avoid losses like last year. But with even quality potatoes failing to fetch good prices, the rains have put more farmers' crops at risk of underpricing, rot, or even waste. What stands out in the multifaceted plight of potato farmers, however, is the systemic neglect they have been facing for long.

In the 2024-25 season, Bangladesh produced a record 1.15 crore tonnes of potatoes, far surpassing the annual demand of 90 lakh tonnes. Without any export expansion initiatives from the government, most farmers had to bear heavy losses caused by the price collapse. In August 2025, when much of the damage had already been done, the agriculture ministry announced plans to purchase 50,000 tonnes of potatoes for cold storage and later sale, setting a minimum price of Tk 22 per kg at storage gates. However, the plan saw no action and was eventually withdrawn in November.

Meanwhile, a Tk 110 crore cash incentive plan announced by the ministry in early December is also sitting idle. These incentives were meant to compensate potato farmers for the losses they have absorbed, yet the prices they receive for the crop continue to fall, with potatoes selling for only Tk 9-10 per kilogramme at the field level. While industrialists are able to access huge loans at meagre interest rates, potato farmers struggle to access credit. Even within the agricultural sector, there appears to be a hierarchy in which potato farmers find themselves at a lower position—one that is not proportional to the importance of their crop to the country's collective diet.

We urge the authorities to take notice not only of the crops affected by the recent untimely rains, but also of the continued systemic neglect facing potato farmers. The 2024-25 season was disastrous for these people, and many have yet to recover from those losses. The government must act proactively to prevent further damage and work with the farmers to ensure timely harvesting, storage, and fair prices this year.

THIS DAY IN HISTORY

Mujib-Yahya talks begin in Dhaka

On March 16, 1971, talks began in Dhaka between Sheikh Mujibur Rahman and Pakistani President Yahya Khan to resolve the political crisis after the 1970 general election. The negotiations aimed at transferring power to the Awami League but failed, as tensions continued to rise ahead of the Liberation War.

A risky moment to liberalise capital exit

Dr Sharif Mazumder
is associate professor of international finance at Northern Kentucky University in the US.

SHARIF MAZUMDER

The Bangladesh Bank's recent decision to raise the threshold for approval-free repatriation of foreign investment—from Tk 10 crore to Tk 100 crore—marks a significant step towards liberalising capital flows. This initiative is intended to improve the country's investment climate by reducing bureaucratic delays and assuring foreign investors that they can exit the market more easily. Yet, the policy comes at a delicate moment. With the Bangladeshi taka depreciating sharply, foreign exchange reserves under pressure, and the global economic uncertainty rising, the decision raises an important question: is Bangladesh easing capital exit just when investor confidence is becoming fragile?

At first glance, the policy appears sensible. Foreign investors consistently cite difficulties in repatriating profits and disinvestment proceeds as a major concern when investing in emerging markets. Allowing banks to process larger repatriation transactions without prior central bank approval could reduce regulatory bottlenecks and send a positive signal that Bangladesh welcomes foreign capital. But the broader macroeconomic context makes the timing of this initiative particularly sensitive.

Over the past few years, the taka has weakened significantly against the US dollar. In 2021, the exchange rate hovered around Tk 84-86 per dollar. By 2024-2025, it depreciated to roughly Tk 110-120 per dollar in the formal market—a decline of nearly 35 percent within just a few years. While a weaker currency can sometimes enhance export competitiveness, it also creates uncertainty for foreign investors whose returns are ultimately measured in dollars or euros.

For foreign investors, exchange rate movements directly affect the real value of their investments. Consider a simple example. Suppose a foreign investor brings \$10 million into Bangladesh when the exchange rate is Tk85 per dollar. The investment is therefore worth Tk 850 million in local currency. If the project performs well and its value rises to Tk 1 billion, the investment appears profitable in taka terms. But if the exchange rate

depreciates to Tk120 per dollar by the time the investor exits, the repatriated value becomes approximately \$8.33 million. Despite the company's growth in local currency terms, the investor effectively loses about \$1.67 million once the funds are converted back into dollars.

This simple arithmetic explains why currency depreciation often creates anxiety among foreign investors. If investors expect the taka to weaken further, they may prefer to repatriate funds earlier rather

VISUAL: SALMAN SAKIB SHAHRYAR

than risk larger losses later. In such circumstances, policies that make capital repatriation easier could unintentionally accelerate capital outflows.

These concerns become more pronounced when considered in the context of Bangladesh's broader external position. The country's forex reserves have declined significantly from their peak during the Covid pandemic. In 2021, reserves exceeded \$44 billion, providing comfortable coverage for imports. Currently, reserves stand at around \$29 billion, covering approximately five months of imports (Bangladesh Bank, Monetary Policy Statement, January 2026). At the same time, Bangladesh's external debt has increased to more than \$12 billion, according to CEIC data. This increase largely reflects expanded borrowing to finance

major infrastructure projects and development initiatives. Although the overall debt remains manageable by international standards, the growing burden of debt servicing obligations is placing additional pressure on the country's balance of payments.

Bangladesh also continues to struggle in attracting large volumes of foreign direct investment (FDI). Annual FDI inflows typically range between \$1 billion and \$2 billion, far below the levels seen in regional competitors. Vietnam, for instance, attracts more than \$20 billion annually, while the Philippines receives around \$10 billion, according to World Bank data. Structural challenges, including regulatory complexity, infrastructure constraints, land acquisition difficulties, and governance concerns, continue to limit Bangladesh's appeal to global investors.

From this perspective, the Bangladesh Bank's decision to raise

the repatriation limit can be seen as an effort to improve the investment environment. Investors are more willing to enter a market when they know they can exit without excessive restrictions. Yet, the same policy designed to reassure investors could make it easier for them to leave if confidence weakens.

Recent developments in South Asia illustrate how quickly investor sentiment can shift when macroeconomic vulnerabilities emerge. Before Sri Lanka's economy collapsed in 2022, years of fiscal imbalances, rising external debt, and declining forex reserves had eroded investor confidence. As reserves fell below \$3 billion, capital began leaving the country and the Sri Lankan rupee depreciated sharply. Within months, the country faced severe shortages of foreign currency and

the repatriation limit can be seen as an effort to improve the investment environment. Investors are more willing to enter a market when they know they can exit without excessive restrictions. Yet, the same policy designed to reassure investors could make it easier for them to leave if confidence weakens.

The burqa and the bomb: A disturbing war narrative

Dr M Obaidul Hamid
is associate professor in the School of Education at the University of Queensland in Australia.

OBAIDUL HAMID

It is the burqa again—the piece of cloth that many Muslim women choose to wear for religious reasons. Yet this garment has been burdened with some of the harshest and most dehumanising representations imaginable.

Recently, the burqa was invoked in a shocking claim suggesting that being bombed to death would be preferable to living while wearing one. Such a statement is completely detached from the lived experiences of the women who actually wear the garment. It reflects a projection shaped by Western power, cultural hegemony, and deep-seated prejudice.

This remark was made by Matt Schlapp, an American political lobbyist, prominent supporter of Donald Trump, and chair of the Conservative Political Action Committee (CPAC). During an appearance on Piers Morgan Uncensored, Schlapp was discussing the US-Israeli bombing of the Shajarah Tayyebah girls' school in southern Iran—a strike that killed 175 children, mostly girls, along with several school staff members. When journalist Peter Beinart argued that the victims would still be alive had the

United States and Israel not attacked Iran, Schlapp responded that the girls would otherwise have grown up wearing the burqa—a common practice in Iran—which he described as part of a "barbaric" society.

His remark drew widespread criticism for implying that death was preferable to life in a burqa. Even though he later denied making any such comparison, no amount of backtracking can conceal the logic embedded in his statement. Anyone with a basic understanding of language and communication can see that Schlapp's comment attempted to justify the US-Israeli attack and the killing of innocent children.

Schlapp's theory suggests that living in a burqa is not simply undesirable—it is worse than death. By extension, millions of Muslim women who wear the burqa in other parts of the world must, in this worldview, be living lives "worse than death." If killing girls is justified on the grounds that they might grow up wearing burqas in Iran, then the same logic could be applied elsewhere.

Wearing a burqa is neither new nor unique to Islam. Variants of veiling

have existed for centuries across multiple religions and cultures. What is new are the dangerous meanings projected onto it—meanings shaped by globalisation, migration, and the encounter between diverse cultural practices. As the burqa became more visible in Western societies, it was increasingly perceived as a threat. This perception fuelled efforts to ban it in several European nations.

Dominant discourses have framed the burqa as a symbol of oppression enforced by Muslim men or theocratic governments. Burqa-wearing women are portrayed as if they were living prisons—denied freedom, mobility, or the pleasures of life. Yet, even this prison metaphor seems mild compared to Schlapp's invocation of the burqa in the context of the US-Israeli aggression against Iran.

Invoking the burqa to justify mass murder reveals how effectively it can be weaponised.

This reference also underscores the religious framing of the war. Since the 1979 revolution, Iran has defined itself as an Islamic nation with strict religious laws. Whether all Iranians embrace these rules is a legitimate question, but what is clear is that Iran never concealed its religious identity. It also consistently stated that it did not seek war with the US or Israel, although it vowed to defend itself if attacked.

The US's motivations, by contrast, remain ambiguous. Some explanations cite regime change, control of Iranian oil (as in Venezuela), preventing nuclear capabilities, or being pressured by Netanyahu. Others frame the war in religious terms. At times, the US casts

itself as the arbiter of intra-Muslim conflicts, claiming a role in resolving the Sunni-Shia divide. This is striking given decades of portraying Islam—without distinction between sects—as a source of terrorism.

The conflict has also been framed as a "religious war" by certain circles within the US and Israel. Reports suggest American service members were told they were fighting a "holy war" against Islamic infidels. Images circulated of Christian clerics apparently praying over Trump, claiming divine anointment and suggesting the war would hasten the second coming. The "holy war" metaphor is not new—President Bush used similar language during the global war on terror. What is new is the invocation of Armageddon.

The burqa debate may now be overshadowed by official denials of responsibility for the bombing of the Iranian school. Both Trump and his defence secretary suggested the attack might have been carried out by Iran itself, although there has been mounting evidence that the US was responsible for the killings. This is also a denial of history by American leadership. Such denials fail to acknowledge the audience of their words and their actions.

As the war continues with no clear pause or resolution, one can expect the narratives to shift further—more references to the burqa or sharia, more denials, and more rhetorical manoeuvring, often with little connection to the realities on the ground.

Ultimately, the success of Bangladesh Bank's repatriation initiative will depend not only on the policy itself but also on the credibility of broader economic management. Foreign investors rarely panic simply because of regulation change. They panic when they lose confidence in a country's macroeconomic stability: when currencies weaken rapidly, reserves decline, and policy direction becomes uncertain. For Bangladesh's new government and central bank leadership, the task ahead is clear: stabilise the exchange rate, rebuild forex reserves, and maintain consistent economic policies. Only by restoring confidence in the stability of the taka can the country ensure that liberalising capital flows strengthens its investment climate rather than exposing new vulnerabilities.

July charter and constitutional reform: Will we waste a generational opportunity?

Justice M. A. Matin is a former judge of the Appellate Division of the Supreme Court.
Dr Mirza M. Hassan is a social scientist.
Dr Sharif Bhuiyan is a senior advocate of the Supreme Court.
Dr Asif M. Shahan is a professor at the Department of Development Studies, University of Dhaka.

M. A. MATIN, MIRZA M. HASSAN, SHARIF BHUIYAN, and ASIF M. SHAHAN

The oppression of citizens under the Sheikh Hasina regime resulted in the July uprising. Through repeated breaches of trust, the regime forfeited its moral authority to govern, while the democratic and republican character of the state was destroyed. The Constitution, having been manipulated and undermined, effectively became inoperative when the head of government fled to India. As sovereignty ultimately belongs to the people, political authority thus devolved to them.

The idea that citizens may alter or abolish a government that betrays their trust is a long-standing doctrine in political thought. One of the most famous expressions of this idea appears in the Declaration of Independence of the United States, which states that whenever a government becomes destructive of unalienable human rights, "it is the right of the people to alter or to abolish it, and to institute new government."

The interim government of 2024-26 was formed outside the framework of the written Constitution, on the basis of the people's sovereign authority. Hence, it possessed certain unique competences, including the authority to take tangible steps to reform the state machinery for the restoration of the republic and democracy and for the protection of citizens' rights. The July National Charter and the July National Charter (Constitution Reform) Implementation Order, 2025 were adopted pursuant to that competence.

BNP's reason for not taking the oath—that the Constitution does not provide for the assembly or the oath—is constitutionally unfounded. This is because the people are supreme, even above the Constitution itself. Article 7 of the Constitution recognises this principle, stating that all powers in the republic belong to the people. It is therefore not tenable to argue the absence of constitutional provisions for something that the people have overwhelmingly approved in a referendum.

While the interim government represented the people's sovereign authority, the extent and limits of that authority were difficult to define clearly. Therefore, for the implementation of the charter and the order, two further steps were put in place: first, a referendum involving the direct participation of the people; and second, the formation of a Constitution Reform Assembly (CRA) to be composed of their representatives elected through the election. Thus, in the design for implementing constitutional reforms, the people were placed at the centre of the process.

So on February 12, in addition to electing members of the new parliament, citizens cast a separate vote in a referendum. The referendum

posed several critically important questions: should the next parliament have a dual role—serving both as a national legislature and as a Constitution Reform Assembly for 180 working days—and should fundamental changes be made to the existing system of checks and balances as envisioned in the July charter? More than seven and a half crore voters participated in the referendum, of whom 61.63 percent voted "Yes."

However, as of today, it remains unclear whether BNP, the party that won the election with a two-thirds majority, will respect the outcome of the referendum. Concerns have

documents grounded in popular sovereignty.

Furthermore, if we are to speak of the absence of provisions in the existing Constitution, many actions taken since August 5, 2024—including the election—are not covered by the Constitution per se. BNP does not appear to have any objection to most of those. By refusing to take the oath, the ruling party has disregarded the people's verdict.

The political significance of a referendum lies in giving citizens a direct voice and agency in shaping democratic outcomes. It is widely accepted that decision making becomes more democratic when citizens are actively engaged.

popular consent. This is especially important in constitutional reform, where the exercise of popular sovereignty forms the foundation of the process and where the legislature cannot disregard people's will. Finally, as in this case, referendums often serve as a mechanism for dispute resolution: when political parties fail to reach agreement, the decision is made by citizens, who have the sovereign right to determine the outcome.

In light of the decisive result of the February 12 referendum, there can be no doubt about the expression of the people's collective will. Clearly, politicians, who are expected to

the governing party, and they also expected it to implement the key provisions of the July charter through the Constitution Reform Assembly. By approving the referendum, citizens conferred legitimacy on the key provisions of the charter, the implementation order, and the assembly. It is also noteworthy that, prior to the election, BNP had endorsed the referendum, urging citizens to vote in favour.

Despite its formal wording and legalistic narrative, the July charter's central message is clear: traditional liberal democratic checks and balances intended to constrain the executive have hardly worked in the country since its independence. Such accountability failures have also led to many tragic outcomes. The reasons for this are well known: historically contingent patterns of strong personalistic, overtly centralised, and dynastic rule have, over the decades, fostered perverse forms of political and social orders characterised by patron-clientelism, a weakened civil society, and a totalised form of party-archal governance in which dominant political parties have, *de facto*, monopolised and controlled nearly all institutions and actors of the state. This perversity has rendered existing checks and balances largely dysfunctional and, more critically, prevented the growth of effective citizens' countervailing power, which is essential for genuine democratic practice.

The July charter has crafted solutions intended to overcome the limitations and failures of these dysfunctional checks and balances by introducing multiple, complex accountability mechanisms aimed at constraining the executive (especially the prime minister) in a robust manner. One may hope that the implementation of these mechanisms will disperse power and neutralise the *de jure* and *de facto* dominance of the prime minister.

The few weeks of the new regime's tenure have already shown how critical it is to have robust checks and balances. Consider the following: the improper dismissal of the central bank governor, the deregulation of otherwise stringent loan rescheduling rules, the removal of the MD of Dhaka metro rail, and the "voluntary" resignation of the commissioners of the Anti-Corruption Commission. Could the government have accomplished these actions at such dizzying speed if robust checks and balances involving multiple stakeholders, as proposed in the charter, had been in place?

If the Constitution Reform Assembly is not formed, constitutional reforms would need to proceed through amendments under Article 142, which confers on parliament the power to amend the Constitution. However, parliament cannot alter the fundamental features of the Constitution under Article 142 due to the basic structure doctrine. According to this doctrine, legislative power is derived from—and constrained by—the Constitution, whereas constituent power, the authority to create or fundamentally change a constitution, resides with the people, who exercised it in the February 12 referendum. Past attempts to amend the Constitution through parliamentary amendments, such as the Eighth and Thirteenth Amendments, were later struck down for violating the basic structure. Therefore, implementing the charter's fundamental reforms through Article 142 may not be sustainable. A resolution remains possible if BNP takes the oath for the reform assembly.

'The political significance of a referendum lies in giving citizens a direct voice and agency in shaping democratic outcomes.'

VISUAL: ANWAR SOHEL

In an indirect democracy like ours, elections delegate decision-making authority solely to elected representatives, limiting citizens' opportunity to have their voices heard directly. This is particularly consequential for policies with fundamental implications for governance. As a tool of direct democracy, a referendum can complement representative institutions and is therefore one of the most important mechanisms for implementing constitutional reforms.

Since the 1970s, referendums have become increasingly popular in democratic countries, as greater emphasis has been placed on ensuring direct citizen engagement in the political process. According to one estimate, over the past 50 years, approximately 1,800 to 2,000 referendums have been held globally, of which more than 600 were constitutional referendums conducted to amend or introduce new constitutions.

Referendums have gained popularity for several reasons. First, they enable citizens to participate directly in political and law-making processes. Second, they allow people to exercise their sovereign authority over political outcomes. Third, referendums provide a means for citizens to express their collective will, lending legitimacy to decisions through

uphold democratic norms and values, cannot prioritise their own version of reforms over those endorsed by the citizens. To do so would constitute a direct violation of democratic principles.

It is true that the referendum questions were not easy. However, studies show that this is far from the first time that complex questions have been posed in a referendum. While a lack of clarity in framing questions can sometimes affect the likelihood of their approval, that was clearly not the case here. The argument that citizens did not understand the questions, and therefore their opinions do not matter, is elitist. Over seven crore people voted—surely, they did so based on their understanding of the issues—and to question their judgment on the basis of some supposed superior knowledge is simply outrageous. One might even ask: could the ego and preferences of certain politicians and experts result in the loss of a generational opportunity?

Several surveys conducted before the election indicated that citizens generally held favourable opinions about the referendum questions and were interested in bringing changes to the structure of political governance. Clearly, the outcomes of the election and the referendum reflect their will: most of them wanted BNP as

Why Bangladesh needs a brand reset

RMG NOTES

Mostafiz Uddin is managing director of Denim Expert Limited. He is also the founder and CEO of Bangladesh Denim Expo and Bangladesh Apparel Exchange (BAE).

MOSTAFIZ UDDIN

For decades, the international image of Bangladesh has been shaped by a narrow and increasingly outdated narrative. Far too often, the country has been reduced to being a low-cost sourcing destination, associated mainly with labour exploitation, industrial accidents, and relentless price pressure. That was never the full picture, and it is even less so now. With a new government in place, we have a rare opportunity to rethink not just industrial policies but how the outside world perceives us. This is the right moment for a full branding reset.

Branding is more than a superficial side issue. The way a country is perceived affects investment decisions, buyer confidence, tourism, diplomatic influence, and the willingness of international companies to make long-term commitments. Countries that present a clear and credible story about who they are and where they are going tend to attract stronger partnerships. The good news is that we already have the substance to support a far stronger identity. What we have been lacking is a confident, coordinated and strategic effort to tell that story properly.

We should begin with the RMG sector, because it remains our industrial calling

card to the world. Our export growth over the last two decades has been remarkable. Bangladesh has become one of the most important RMG manufacturing countries in the world. But we need to stop presenting our success only in terms of low cost and scale. A much more powerful argument is that our industry is already evolving into something much more capable and forward-looking. Today, Bangladesh is home to one of the world's largest concentrations of green RMG factories. This is clear, undisputed evidence that our manufacturing base is upgrading. It shows we are investing in better buildings, stronger systems, more efficient operations, and a more credible industrial future—we are building modern industrial capacity.

The same is true for energy. More and more RMG factories are adopting rooftop solar power systems and looking seriously at renewables as a long-term strategy. Besides being important for cost and resilience, this also adds to our international brand. When buyers, investors and regulators are paying much closer attention to carbon, energy and supply chain performance, we should make it clear that our country wants to be seen as part of the solution, not the problem.

This is where our branding reset

should begin. We should position Bangladesh as the world's most serious platform for responsible, scalable apparel manufacturing. That message would be credible because it would be built on real strengths. We have a large workforce, a growing industrial base and a generation of young people who want jobs, skills and opportunity. We should present Bangladesh as a young, energetic manufacturing nation

The same is true for energy. More and more RMG factories are adopting rooftop solar power systems and looking seriously at renewables as a long-term strategy. Besides being important for cost and resilience, this also adds to our international brand. When buyers, investors and regulators are paying much closer attention to carbon, energy and supply chain performance, we should make it clear that our country wants to be seen as part of the solution, not the problem.

with the potential to move up the value chain not just in apparel but also in textiles, logistics, engineering, digital services, and green industry. We need that broader vision because if we define ourselves only through RMG manufacturing, we risk being trapped by it. If we have built one of the world's largest apparel industries, we can also build strength in technical textiles, man-made fibres, recycling, renewables, logistics, and higher-value manufacturing.

However, any branding reset must be backed by practical action. To make the world see Bangladesh differently, we must make it easier for the world to experience the unseen side of the country.

First, we should decide exactly what we

want Bangladesh to be known for over the next decade. In my view, our new identity should rest on five pillars: competitive manufacturing, verified sustainability, young talent, renewable energy transition, and reliability. Once that is decided, every ministry, agency, embassy, investment body and trade mission should use the same language.

Second, we need a much stronger

stronger compliance systems should be documented and promoted internationally.

Fourth, we must match branding with a better business environment. To project an image of modernity, investors and buyers must find—or build—an upgraded system. That means faster approvals, greater transparency, more efficient customs, better infrastructure planning, easier access to land, and fewer administrative bottlenecks. A branding reset cannot succeed if the experience of doing business does not improve alongside the message.

Fifth, we should align our national branding with green industrial strategy. The global sourcing model is changing. Decarbonisation, traceability, and environmental performance are becoming more important every year. The government should support rooftop solar, energy efficiency finance, wastewater treatment, grid reform and textile recycling infrastructure. To create a strong, resilient brand, we must make green industrialisation visible and measurable.

Finally, we need to tell our story more effectively across the world. Brand Bangladesh should not live only in official speeches or policy papers but be carried by ambassadors, trade commissioners, business leaders, universities and entrepreneurs. It should be visible at trade fairs, in global media, across digital channels, and in every major international forum where sourcing and investment decisions are shaped. This is about discipline, clarity, and consistency.

For too long, Bangladesh's image has been shaped by outsiders and by the worst chapters in our history. The next chapter should be written by us.

You haven't seen even 25% of 'Rakkhosh' yet: SIAM AHMED

SHAH ALAM SHAZU

As Eid-ul-Fitr approaches, actor Siam Ahmed finds himself once again at the centre of audience anticipation with his upcoming film *Rakkhosh*. After the trailer sparked strong reactions online, the actor expressed gratitude for the overwhelming response while hinting that the film still holds many undiscovered layers for viewers. The film is directed by Mehedi Hasan Hridoy.

Reacting to the response, Siam said he is overwhelmed by the love. "I'm seeing all the appreciation very positively. I'm grateful to everyone. But I can say this much — audiences haven't even seen twenty-five percent of *Rakkhosh* yet. There are many surprises waiting. They will discover them once they watch the film in theatres."

When asked about the film's genre, Siam revealed that *Rakkhosh* is essentially a romantic story. "That's another surprise of the film. People are making different assumptions — some think it's an action film, while others are interpreting it in various ways. All the reactions are positive, but I would say it is a romantic film," he said.

Addressing his fans, Siam reflected on the journey of his career. "When *Poramon 2* was made, I was not a recognised face. It was the audience who brought me forward, showered me with love, and stood beside me in every success. I've always received their support whenever my films were released. I hope I will receive the same love for *Rakkhosh* as well."

Siam also revealed that he shot action sequences consecutively for ten days for the film. The fight choreography was handled by renowned Mumbai-based action director Ejaz Master. "Missing even a single day of shooting abroad means huge financial loss for the producer and director. So we kept going. During those days I got cuts and bruises and felt a lot of pain, but I never skipped a shoot. Instead, I kept preparing for the next scene. After the shoot, the way Ejaz Master and his team appreciated the effort is something I will never forget."

Speaking about director Mehedi Hasan Hridoy, Siam described him as extremely passionate about his craft. "Among all the directors I have worked with, he is one of the craziest when it comes to work. He has big dreams and works incredibly hard. While making *Rakkhosh*, we developed a great chemistry."

Siam also expressed happiness about several films releasing this Eid. "It feels great that so many films are coming out. They are all

our films — there's no division. My first film's co-star Puja Chery also has a film releasing this Eid — *Domn*, directed by Redoan Rony, who also directed my first drama. So we are all connected in one way or another, which makes me very happy."

Mentioning all the films releasing this Eid, Siam wished everyone for great success. "We are all part of the same family. My love and best wishes for every film releasing this Eid, including *Rakkhosh*."

'Premer Golpo' featuring Roshan and Chamak to release on Eid day

A musical love story titled *Premer Golpo* is set to premiere this Eid-ul-Fitr evening on the official YouTube channel of Sun Production House. Sung as a duet by Dilshad Nahar Kona and Sheikh Limon, the song features lyrics, composition and music arrangement by Avraal Shair.

The video stars Ziaul Roshan and Rukaiya Jahan Chamak, whose on-screen chemistry drives the story.

The film was shot in the scenic locations of Niladri Lake and Tahirpur, adding visual beauty to the romantic storyline. Directed by Mahin Awlad, the musical film presents a romantic narrative where every moment reflects the emotions and longing of love.

WHAT'S THE HAPS?

Cox's Bazar Film Festival

The Cox's Bazar Film Club is hosting its first-ever festival for Independence Day. The two-day event will screen a documentary followed by feature films including *Chhayabrikkho*, *Jolrong*, *Dot*, *Behula Dorodi*, *Moynar Char*, and *Madhyobitto*. Organisers aim to revive communal film viewing in an era of mobile screens, with open-air screenings by the sea.

'Golmaal 5' announced with Akshay Kumar joining franchise

The makers of the popular comedy franchise *Golmaal* have officially announced a new instalment, revealing that Akshay Kumar will join the cast of *Golmaal 5*.

The announcement came on the birthday of director Rohit Shetty,

with a promotional video shared on social media. The clip features franchise regulars including Ajay Devgn, Arshad Warsi, Shreyas Talpade, Kunal Kemmu and Tusshar Kapoor, while also marking the return of Sharman Joshi to the series.

Akshay Kumar later appears in the clip, saying he is excited to join the "crazy family". Known for slapstick humour and eccentric characters, the franchise remains one of Bollywood's most successful comedy series.

NEWS

Local govt polls not BNP's priority yet

FROM PAGE 12
upazila unit leader from Manikganj.

Grassroots leaders have begun contacting senior party figures in Dhaka, urging them to set a clear timetable for the elections so that local units can begin their preparations.

Some local leaders are also lobbying within the party to push the issue forward.

Senior leaders acknowledged the concerns but say the matter will be discussed formally in the party's policymaking forum before any decision is taken.

In the meantime, the BNP appears to be running many local government institutions by appointing administrators from its rank and file.

The government has already appointed administrators in 11 city corporations and 42 district zila

parishads across the country.

Until elections take place, most local government bodies — except union parishads — will be operated by administrators.

This arrangement will allow the government time to prepare properly for the elections, party leaders said.

Meanwhile, three standing committee members said that the party has been reviewing its performance after the national election. Some organisational weaknesses became visible during that process.

"Those will be corrected before the local elections — we do not want to repeat mistakes," said one of the standing committee members.

For that reason, the party leadership wants time to reorganise local committees and strengthen coordination between the

government and the party.

Meanwhile, the BNP-led government has not yet decided whether the upcoming local government elections will be held with party symbols or without party symbols.

On March 1, Election Commissioner Abdur Rahmnel Masud said the Election Commission will begin preparations for local government elections after Eid-ul-Fitr.

The ordinance removed the provision for party nomination for mayoral posts, he told reporters.

"If the parliament approves it, elections will follow that system. If the law changes again, then the election system will also change," he added.

Currently, there are 12 city corporations, 330 municipalities, 64 district councils, 495 upazila parishads and around 4,570 union parishads across the country.

Jamaat gears up for local polls

FROM PAGE 12
the field. Identifying nominees in advance is helpful."
"SECOND BATTLE"

Jamaat Ameer and Leader of the Opposition Shafiqur Rahman has described the local government polls as the party's "second battle".

Addressing a programme in Sylhet on February 27, he said the party did not want to leave any local positions vacant and aimed to bring forward capable individuals, including those who had taken risks to stand by the party during the parliamentary election.

Preparations for local polls were also discussed at a meeting of Jamaat's central executive council at its Maghbazar headquarters the following day.

Party leaders say preparations for city corporation elections will be prioritised. Local units have been asked to send three-member panels of potential nominees for city corporation polls, with the central executive council set to make the final decisions.

For other local polls, Jamaat's 14 regional directors are expected to consult district and upazila ameer, secretaries, and key organisers to confirm candidates.

As per the law, elections to city corporations must be held within the 180 days preceding the expiry of their tenure. However, the five-year

term of Dhaka north and south city corporations ended in early June 2025.

At a programme at the Nirbachan Bhaban on March 1, Election Commissioner Abdur Rahmnel Masud said local government elections would begin after Eid-ul-Fitr.

Following the fall of the Awami League government amid the 2024 mass uprising, the interim government removed elected representatives from district councils, city corporations, upazila parishads, and municipalities. These bodies have since been run by government officials on additional charge for around one and a half years, while administrators were also appointed to city corporations.

After assuming power, the BNP appointed new administrators to six city corporations in the first phase and to five more in the second phase. All appointees are BNP leaders.

At a press briefing on Saturday, Jamaat Assistant Secretary General Hamidur Rahman Azad criticised the move, saying that appointing administrators could delay elections and create "a new trap of conspiracy for election engineering", raising questions among the public.

A senior Jamaat leader said party figures who could not contest the parliamentary polls due to the alliance arrangement may get priority in the local government elections.

NON-PARTY SYMBOLS

In 2015, the AL government amended five laws to introduce polls with party identities and symbols at five tiers of local government.

After taking office, the interim government scrapped this provision for city corporation, district council, upazila parishad, municipality, and union parishad polls. An ordinance to this effect is expected to be placed in parliament, and if passed, local elections will no longer be held under party symbols.

Jamaat leaders support the change, arguing that local and national elections differ in nature and that the absence of party symbols would allow voters greater freedom in choosing candidates.

JU student

FROM PAGE 2
"Initially, we suspect that she was murdered. An autopsy will be conducted, and we have already started an investigation," added the OC.

Meanwhile, police have taken Fahim into custody as the main suspect in the incident, Saidul Islam, OC of the Detective Branch (North) of Dhaka district police, told The Daily Star around 10:00pm.

"We are certain that Sharmin Jahan has been killed. At this moment, her husband is our main suspect. He is being interrogated in police custody."

Govt asks banks to write them off

FROM PAGE 12
owned banks.

The directive further states that once the government takes responsibility for the waived amounts, banks must immediately withdraw cases filed against the farmers and ensure that they do not face any harassment.

Banks will also have to report information on case withdrawals every month to the Financial Institutions Division through BB.

According to the directive, uncharged interest for the period after interest was imposed will be waived by banks subject to approval from their respective boards of directors.

The central bank will complete

audits of the relevant information in phases following due procedures. The final audited accounts will then be sent to the government in stages, based on which the government will pay the verified portion of the liabilities to the respective banks, the directive said.

It added that if, after payment, it is discovered that any bank has received more money from the government than its actual liability, the bank will be required to immediately refund the excess amount, along with interest if imposed by the government.

Around 12 lakh farmers are expected to benefit from the waiver.

In its first formal cabinet meeting in February, the government approved a proposal to waive agricultural

loans of up to Tk 10,000, including interest, as part of the ruling BNP's election pledge.

The waiver will apply to loans taken in the grain, crop, fisheries, and livestock sectors, in line with the government's election manifesto. Cabinet Secretary Nasimul Ghani told reporters after the meeting.

According to the BNP manifesto, the government will also pay one year's instalments of microloans taken by farmers from NGOs registered with the Microcredit Regulatory Authority.

The main objective of the initiative is to ensure social security for poor and marginal farmers and strengthen the backbone of the country's agricultural sector, Ghani said.

PM launches nationwide drive today

FROM PAGE 12
to the Balrampur Sahapara area to launch the programme.

In its manifesto, the BNP has plans to excavate and restore around 20,000 kilometres of rivers and canals across the country.

Ministry officials said the programme is expected to significantly improve irrigation facilities by making better use of stored surface water, increasing agricultural productivity and creating employment opportunities for rural communities.

They also said the project will help

reduce reliance on groundwater, which is depleting in many parts of the country.

Improved water management through canal restoration is also expected to help mitigate drought, flooding and waterlogging in different regions, officials added.

Meanwhile, Tarique's visit has created considerable enthusiasm among BNP leaders, activists, farmers and local residents in Dinajpur.

Soon after inaugurating the canal excavation programme, the prime minister will distribute Black Bengal

goats to five beneficiaries selected from a group of 25 recipients at the same event, said Dinajpur Deputy Commissioner Rafiqul Islam.

Later in the day, Tarique Rahman will visit the Faridpur graveyard in the Dinajpur district town, where he will pay respects at the graves of his grandfather, Md Iskander Majumder; grandmother, Taiba Majumder; aunt, Khurshid Jahan Haque; and other family members.

[Our correspondent from Thakurgaon contributed to this report.]

Govt appoints BNP leaders

FROM PAGE 12
appointees are BNP leaders from central and district committees.

Of the total appointments, 11 administrators are central-level BNP leaders, while 31 are district-level party leaders.

A review of the political background of the appointees shows that around 19 percent had lost the Feb 12 election to Jamaat-e-Islami alliance candidates, while around 2 percent lost to rebel candidates from their own party.

Another 2 percent had withdrawn their nominations in favour of allied candidates, according to party sources.

BNP sources familiar with the process said loyalty to the party and participation in previous elections were important factors in preparing the final list.

The newly appointed administrators are: Mohammad Touhidul Islam in Panchagarh, Mofazzal Hossain Dulal in Dinajpur, Mohammad Saiful Islam in Rangpur, Md Sohel Hosnain Kaykobad in Kurigram, Prof Dr Syed Moimul Hasan Sadiq in Gaibandha, Md Masud Rana Pradhan in Joypurhat, AKM Ahasanul Tayyeb Zakir in Bogura, Md Harunur Rashid in Chapainawabganj, Md Abu Bakkar Siddique in Naogaon, Md Ershad Ali in Rajshahi, Md Rahim Newaz in Natore, Md Javed Masud in Meherpur, Sohrab Uddin in Kushtia, Md Abul Majid in Jhenaidah, Delwar Hossain Khan Khokon in Jashore, Ali Ahmed in Magura, Sheikh Mohammad Zakir Hossain in Bagerhat, SM Monirul Hasan (Bappi) in Khulna, Snehangshu Sarkar in Patuakhali, Golam Nabi Alamgir in Bhola, Akon Kuddusur Rahman

in Barishal, Md Shahadat Hossain in Jhalakathi, Alamgir Hossain in Pirojpur, SM Obaidul Haque in Tangail, ABM Mamunur Rashid in Sherpur, Syed Emran Saleh in Mymensingh, Adv Md Nuruzzaman in Netrokona, Khaled Saifullah Sohel Khan in Kishoreganj, AKM Iradat in Munshiganj, Md Mamun Mahmud in Narayanganj, Abdus Salam Mia in Rajbari, Sharif Rafiq Uzzaman in Gopalganj, Khondkar Mashukur Rahman in Madaripur, Sardar AKM Nasir Uddin in Shariatpur, Md Mizanur Rahman Chowdhury in Sunamganj, Abul Kaber Chowdhury in Sylhet, Mizanur Rahman in Moulvibazar, Sirajul Islam in Brahmanbaria, Md Moshtak Mia in Cumilla, Md Harunur Rashid Azad in Noakhali, Sahab Uddin in Lakshmipur and ATM Nurul Bashar Chowdhury in Cox's Bazar.

Police to probe

FROM PAGE 3
(reserve office inspector). They have been tasked with examining several allegations related to the recruitment process.

One issue under investigation is whether candidates from other districts secured jobs by using false addresses and were treated as permanent residents based solely on land purchases in the recruiting district.

The committees will also examine allegations that some candidates were allowed to sit recruitment examinations in separate rooms under the supervision of special police members in exchange for unethical benefits.

Another matter under review is whether candidates were declared eligible or ineligible for recruitment based on their own or their family members' political affiliations.

Investigators will also scrutinise irregularities

between written and oral examination scores, including cases where candidates who scored low in written tests allegedly secured jobs after receiving unusually high marks in oral examinations.

They will further investigate allegations of question paper leaks and assess whether authorities took action against dishonest police personnel, broker networks, fraud rings, or others who may have disrupted the examination process.

The directive was sent to superintendents of police in all districts, according to the order forwarded for implementation by Additional DIG (Recruitment and Career Planning-1) Md Abu Hasan at PHQ.

Another PHQ official said the decision followed various allegations of irregularities in recruitment during the tenure of the Awami League government.

Largely ceremonial

couldn't buy many books," she said. "But if I hadn't come at all, it would have felt like missing out on something important."

According to information collected from 269 participating publishers, total sales during the 17-day fair stood at around Tk 8 crore.

The fair hosted 584 participating institutions, including 570 publishing houses. Based on the available data, the fair management committee estimated that total sales across all publishers would reach about Tk 17 crore.

Selim Reza, member secretary of the fair management committee, said in many cases publishers with fewer stall units recorded higher sales than those with larger stalls.

Mahrukh Mohiuddin, managing director of The University Press Limited,

said the overall sales situation was alarming.

"Compared with normal years, book sales this year were about 70 percent lower," he said. "Nearly 90 percent of participating publishers could not even recover the basic cost of building their stalls. Around 30 percent sold books worth less than Tk 5,000."

He said the decline is part of an ongoing trend. "Political and economic instability already reduced sales at the 2025 fair by about 60 percent compared to 2024," he said. "This year, the situation worsened further. In fact, the business environment was worse than during the pandemic-era fair of 2021."

According to the fair's information centre, 2,007 new books were submitted during the event, though the actual number may be higher as not all publishers deposit copies of their books with the centre.

'Coordinated campaign' against unarmed

FROM PAGE 4
It said the involvement of senior officials and police officers — entrusted with protecting lives — amounted to a profound betrayal of public trust and aggravated the crimes to the highest degree.

Seven senior officials — including former deputy inspector general Syed Nurul Islam and former superintendent of police Md Asaduzzaman Ripon — were sentenced to life imprisonment under the doctrine of command responsibility for failing to prevent or punish

crimes committed by their subordinates.

Two others received prison terms, while former police sub-inspector Sheikh Abzalul Haque was acquitted after testifying as an approver.

According to the judgment, the violence occurred in Ashulia and Bypail on August 4-5, 2024.

On August 4, armed cadres led by Saiful Islam and local police allegedly opened fire on around 800 students, killing protester Md Shahabul Islam.

The violence escalated the next day after the fall of the

Awami League government.

As a victory procession approached Ashulia Police Station, police and Awami League men opened indiscriminate fire, leaving at least 29 people dead.

Witnesses said police later collected blood-soaked bodies, loaded them onto a pedal van and moved them to a police pickup truck, where they were doused with petrol and set on fire.

The tribunal found that at least one victim was still alive when the fire was ignited.

A one-minute-14-second viral video showing officers dragging bodies and piling

them into a van beside the police station wall was presented as key evidence.

Forensic experts confirmed the footage had not been manipulated using artificial intelligence.

DNA tests by the Criminal Investigation Department identified several victims, including Md Omar Faruk and Abul Hossain.

The tribunal also ordered the government to confiscate the convicts' assets and create a compensation fund for victims' families and protesters who suffered permanent disabilities.

One dies, another goes missing in storm

OUR CORRESPONDENT,
Lalmohirhat

A boatman died and another person went missing after being caught in a storm and hailstorm in Chilmari upazila of Kurigram on Saturday night.

The deceased — Mintu Mia, 41 — was from Gazirpara village.

Farid Uddin, 43, of the same area, remained missing in the incident that took place at Gazirpara boat ghat in Chilmari.

Locals said shortly after the Taraweeh prayers on Saturday night, a sudden strong storm began. At that time, Mintu Mia went to the Gazirpara boat ghat to tie his boat safely.

There he was caught in the storm and went missing. Later his body was recovered from a sandbar in the Brahmaputra River.

Everyone at the ghat managed to move quickly to safer places, but Farid Uddin, who was present there, did not return.

No trace of Farid Uddin had been found until yesterday afternoon.

In Charge of Chilmari River Police Outpost, Golam Mawla Shah, said the river police are assisting locals in the rescue efforts.

"It's (title race) not over. Who said that? We didn't lose. We will continue. Nine points is a lot against Arsenal but it happened. We have the game at home (vs Arsenal) so we have to try until the end. When it's not possible then we congratulate the champion but we have to try."

Man City manager **Pep Guardiola** after his side lost points in a 1-1 draw at West Ham

Miraz relieved after tense win

SPORTS REPORTER

Bangladesh skipper Mehidy Hasan Miraz admitted he felt the pressure but praised his players for keeping their composure as the Tigers edged Pakistan by 11 runs in a thrilling third and final ODI at the Sher-e-Bangla National Cricket Stadium yesterday to seal a 2-1 series victory.

Bangladesh appeared well on course after posting 290 for five and reducing Pakistan to 209 for seven in the 40th over. However, Salman Agha struck a superb 106 off 98 balls and shared a 52-run stand with Shaheen Shah Afridi for the eighth wicket to drag the visitors back into the contest.

Pacer Taskin Ahmed, Bangladesh's standout bowler with figures of 4-49, eventually removed Agha to ease the pressure. Afridi then launched a late assault, reducing the equation to 14 runs from the final over.

Leg spinner Rishad Hossain, who had conceded 54 runs in his first six overs, delivered a nerveless final over, giving away just two runs before dismissing Afridi. Pakistan were bundled out for 279 on the last ball of the innings, with Afridi stumped by Litton Das after scoring 37 off 38 balls.

The victory also lifted Bangladesh to ninth in the ODI rankings, leapfrogging the West Indies cricket team and strengthening their hopes of direct qualification for the ICC Cricket World Cup 2027.

Miraz admitted the tense finish tested the team's nerves but credited his players for holding firm.

"It was an excellent match. At times even I was a bit afraid, but the boys handled the pressure really well in the last over when they needed 14 runs," Miraz said during the post-match presentation.

He also praised opener Tanzid Hasan Tamim, whose maiden ODI century – a run-a-ball 107 – laid the platform for the total.

"I think it was an excellent wicket. If we could have got 300 it would have been even better, but 290 was still a good score. The way Tamim batted was excellent," he said.

PHOTO: FIROZ AHMED

Pakistan's Shaheen Shah Afridi gets stumped by Bangladesh wicketkeeper Litton Das during the tense series decider of the three-match ODI series at the Sher-e-Bangla National Cricket Stadium yesterday. Shaheen had sparked another scare for the hosts after Salman Agha kept Pakistan in the hunt with a 98-ball 106. Following Agha's dismissal in the 48th over, Shaheen smashed Mustafizur Rahman for 14 runs in the penultimate over, including two sixes, leaving Pakistan needing 14 more to clinch the series. With momentum on the left-hander's side, the contest hung in the balance. But leg-spinner Rishad Hossain held his nerve, conceding just two runs off the first five balls of the final over and dismissing Shaheen (37 off 28) with the last delivery.

Tanzid dispels personal demons in first ODI ton

SPORTS REPORTER

A six over long off saw Tanzid Hasan Tamim reach the magic number, his first-ever ODI ton in his 31st appearance, and the look on his face said it all.

As the ball sailed over the fence, he celebrated with outstretched hands, relieved over finally making a start, and that too in a crucial series decider, third ODI against Pakistan yesterday at the Sher-e-Bangla National Cricket Stadium.

The 23-year-old has been under the scanner for almost his entire ODI career. Debuting in August 2023 in the Asia Cup, Tanzid's first few innings did not merit a chance at that year's ICC ODI World Cup but when Tamim Iqbal stepped aside, his stars aligned.

That World Cup turned into a baptism of fire for the youngster, who played all nine games, but contributed just 145 runs at an average of 16.11 with one fifty.

His talent was evident, but so was his

inconsistency. A few flashy boundaries and a lapse of concentration resulting in dismissal – that's how most of his knocks panned out.

There are also signs that he is more suited to the T20 format. In 45 T20Is, Tanzid has 11 fifties and quite a few times he helped the team get off to a flying start. Yet, in ODIs, questions of temperament remained. He had five fifties before yesterday, and had never delivered a big score that set the tempo, especially when his team batted first.

Ahead of the Pakistan series, a 92 in the Bangladesh Cricket League (BCL) and a ton in the practice match saw him make the playing XI in the first ODI, where he hit a rapid 67.

However, that knock did little to dispel the doubts as it came in a paltry chase of 115. Tanzid did not help his case when he got out cheaply in the second ODI, chasing Pakistan's 274.

In the series-deciding third ODI, Tanzid showed his flair and sustained it long enough to reach a career milestone.

A confident flick off Haris Rauf got him off the mark in the second over. In that very over, he dispatched Rauf for an effortless six over deep mid-wicket to set the tone.

Bangladesh moved smoothly with Tanzid scoring the bulk of the runs in a 105-run opening stand with Saif Hassan. A 53-run stand with Najmul Hossain Shanto followed, yet there was always the fear that Tanzid might lose his concentration.

After reaching his 80s, Tanzid bunkered down a bit and played risk-free shots to close in on the ton. However, after reaching 94, his natural instincts took over, as he lofted Salman Agha for a six to get his first international ton.

His innings ended on a run-a-ball 107 and it has handed Tanzid the blueprint on how to go about scoring tons in ODIs.

BRIEF SCORES

Bangladesh: 290 for five in 50 overs (Tanzid 107, Hriday 48 not out; Haris 3-52, Abrar 1-49)

Pakistan: 279 all out in 50 overs (Agha 106, Masood 38; Taskin 4-49, Mustafizur Rahman 3-54)

Result: Bangladesh won by 11 runs

Bangladesh won series 2-1

Player of the series: Tanzid Tamim and Nahid Rana

'Finalissima' cancelled

AFP, BARCELONA

The 'Finalissima' clash between Euro 2024 winners Spain and world champions Argentina set to take place on March 27 in Qatar has been cancelled, UEFA said on Sunday.

The European football governing body said in a statement that it was "not possible to reach agreement with Argentina" over an alternative date and location, required because of the Middle East war affecting the region.

"It is a source of great disappointment to UEFA and the organisers that circumstances and timing have denied the teams of the chance to compete for this prestigious prize in Qatar," said UEFA in a statement.

The Finalissima pits the latest Copa America winners against the European championship winners, with Argentina winning the inaugural edition by beating Italy in 2022 at Wembley in London.

Argentina captain Lionel Messi lifted the World Cup with his country in Qatar later that year.

UEFA said they had investigated several alternative options to playing in Qatar "but each ultimately proved unacceptable to the Argentinian Football Association".

The first option was to play at the Santiago Bernabeu stadium in Madrid, which Argentina rejected.

UEFA then suggested a two-legged event, with the first match in the Spanish capital on March 27 and a second leg in Buenos Aires at some point before the 2028 Euros and Copa America, which was also turned down.

They then proposed playing a one-off match at another neutral venue in Europe on March 27 or March 30 but Argentina said they were only available on March 31.

Conen's record before Pele

Germany's Edmund Conen completed a hat-trick by scoring in the 66th, 70th and 87th minutes against Belgium at the 1934 World Cup. He was only 19 years, 198 days old at the time. His record as the youngest player to score a World Cup hat-trick stood for 24 years. It was broken at the 1958 World Cup when Brazil legend Pele netted a hat-trick against France at the age of 17 years and 244 days.

Zico ignored as Ishaque gets first call-up

SPORTS REPORTER

Bangladesh coach Javier Cabrera has included inexperienced goalkeeper Ishaque Ali Akondo in the 28-member preliminary squad for the upcoming two international matches, overlooking experienced custodian Anisur Rahman Zico.

Bangladesh will play a FIFA friendly against Vietnam on March 26 as part of preparation for the away AFC Asian Cup qualifying match against Singapore on March 31.

Among the 28 players named, Brothers Union goalkeeper Akondo is the only fresh inclusion. The 41-year-old coach has dropped England-based midfielder Cuba Mitchell defenders Taj Uddin and Topu Barman, and forward Rakib Hossain from the squad that faced India in Dhaka last November. The latter two are unavailable due to suspension.

Akondo, who previously represented the Bangladesh U-20 team in AFC competitions, expressed satisfaction after receiving his maiden national team call-up and vowed to fight for a place in the final 23-member squad. The Sirajganj-born keeper kept three clean sheets in nine Bangladesh Football League matches, conceding 11 goals.

PRELIMINARY SQUAD

Goalkeepers: Mitul Marma, Sujon Hossain, Mehedi Hasan Srabon, Ishaque Akondo

Defenders: Tariq Raihan Kazi, Rahmat Mia, Shakil Ahad Topu, Abdullah Omar, Shakil Hossain, Zayyan Ahmed, Bishwanath Ghosh, Saad Uddin, Monjurur Rahman Manik, Isa Faysal.

Midfielders: Shah Quazem Kirmane, Sheikh Marsalin, Jamal Bhuyan, Sohel Rana, Md Sohel Rana, Mohammad Ridoy, Shamit Shome

Forwards: Arman Faysal Akash, Emon Shahriar, Faisal Ahmed Fahim, Fahamedul Islam, Mirajul Islam Rafiqul Islam, Sumon Reza.

"I will try my best to secure a place in the final 23-member squad, although it will be a challenge to compete with the other goalkeepers – Mitul Marma, Mehedi Hasan Srabon and Sujon Hossain,"

Akondo said in a video message shared by the Bangladesh Football Federation.

Mitul and Sujon have been regular starters for their respective clubs, Abahani and Mohammedan. Mitul has conceded 11 goals and kept five clean sheets in 11 league matches, while Sujon has kept two clean sheets in nine appearances, conceding 11 goals.

Srabon has featured in only one league match, conceding once, as experienced Zico has been preferred ahead of him at Bashundhara Kings. Zico kept four clean sheets in 10 matches, conceding 12 goals.

There were strong speculations within the football fraternity that Zico would return to the preliminary squad after missing the last nine internationals over a 15-month period, however, he was once again overlooked by the Spanish coach.

Apart from the four goalkeepers, Cabrera has recalled fit-again defenders Bishwanath Ghosh, Monjurur Rahman Manik and Isa Faysal, along with young striker Mirajul Islam, experienced winger Rafiqul Islam, and forwards Sumon Reza and Fahamedul Islam, who missed the India match due to suspension.

Meanwhile, Leicester City midfielder Hamza Choudhury, who was not named in the 28, is set to join the team in Vietnam on March 22.

YOUNGEST PL SCORERS

- Max Dowman (Ars) - 16 years 73 days
- James Vaughan (Eve) - 16 years 270 days
- James Milner (Leeds) - 16 years 356 days
- Wayne Rooney (Eve) - 16 years 360 days
- Rio Ngunzaha (Liv) - 16 years 361 days

Dowman PL's youngest scorer

English midfielder Max Dowman became the youngest-ever goalscorer in the Premier League as the 16-year-old inspired Arsenal's late surge to beat Everton 2-0 on Saturday and close in on a first Premier League title for 22 years. Arsenal then rested easy as Manchester City faltered again, dropping points in a 1-1 draw at relegation-threatened West Ham United. The Gunners have 70 points after 31 games, nine ahead of City, who have a game in hand.

42 ZILLA PARISHADS Govt appoints BNP leaders as administrators

STAFF CORRESPONDENT

The government has appointed administrators to 42 zilla parishads (district councils) across the country, all of whom are BNP leaders.

The new administrators will serve until further notice, according to a gazette issued by the Ministry of Local Government, Rural Development and Cooperatives yesterday.

PMO officials said the appointments were made to strengthen local governance and accelerate development activities at the district level via the zilla parishads, many of which had been operating without elected representatives since the political changeover in August 2024.

Until now, deputy commissioners had been serving as administrators of the zilla parishads.

Government and party sources said the

A long line of vehicles outside the Trust Filling Station (not in frame) near the Bijoy Sarani intersection in the capital yesterday. Since the US-Israel war on Iran, queues have been long at the pumps. Fuel rationing was imposed, but yesterday all restrictions were withdrawn.

PHOTO: PALASH KHAN

Queues still snake from filling stations

Govt withdraws fuel rationing

ASIFUR RAHMAN

Filling stations in Dhaka, Chattogram, and Gazipur saw long queues yesterday even though the government has lifted the restrictions on fuel distribution.

Many people rushed to pumps with drums and bottles to collect fuel, as sales without vehicles had been prohibited for more than a week.

With power cuts already taking place in parts of the capital, small businesses such as mills and workshops, as well as offices and buildings that run generators, flocked to petrol pumps.

Up to 300 megawatts (MW) of load-shedding was recorded yesterday, and in the previous two days, it reached as high as 500MW during daytime peak hours, showed data from the Power Grid Company of Bangladesh.

The authorities yesterday met petrol pump owners, business leaders, and district administrations across the country and instructed them to keep track of whether scarcity re-emerges in the market.

It will take some time for the situation to fully ease, according to officials.

The authorities have taken a fair decision ahead of the Eid rush, said Mohammad Nazmul Haque, president of the Bangladesh Petroleum Dealers, Distributors, Agents and Petrol Pump Owners Association, following a meeting with Anindya Islam Amit, the state minister for power, energy, and mineral resources.

SEE PAGE 4 COL 4

Local govt polls not BNP's priority yet

SAJJAD HOSSAIN

The ruling BNP has yet to begin preparations for the local government elections, as its central leadership is occupied with government duties, leaving them with little time to reorganise its grassroots structure for the next electoral contest.

"The government has more urgent matters to deal with right now," said a BNP standing committee member asking not to be named to speak candidly on the issue.

After winning the national election and forming the government, the BNP has had little time to organise itself, according to multiple standing committee members.

Many of its senior leaders now hold positions in the government and their days are filled with cabinet meetings, parliamentary duties, responding to global developments and implementing the party's election pledges.

"If we do not give time to organise the party properly, the other parties may gain an advantage," the leader said.

From the central leadership in Dhaka to district and upazila organisers, many leaders are currently involved in state responsibilities.

"That means the party itself has not yet returned to its normal activities," said a Dhaka north unit BNP leader seeking anonymity.

However, seven district level leaders said that the delay is already becoming noticeable.

Rivals have already begun informal campaigning in some areas. Local meetings are being held, activists are visiting communities and party supporters are beginning to prepare for the next elections.

"Our preparations have not started properly yet. If we delay it too long, it could affect us politically," said an

Jamaat gears up for local polls

MAMUNUR RASHID

After contesting the February 12 national election as part of an alliance, Jamaat-e-Islami has begun preparations to take part in the local government polls independently.

The party is working to identify potential candidates for mayoral posts in city corporations and municipalities, as well as chairman posts in district, upazila, and union parishads. District and metropolitan units have already been instructed to prepare preliminary lists of prospective nominees.

Central leaders say some of the lists have reached the party headquarters, while others are expected after Eid. Once the process is completed, Jamaat plans to finalise candidates initially for 12 city corporations, including the two in Dhaka. Nominees for district, municipality, upazila, and union parishad polls will later be selected locally, with emphasis on grassroots opinion and locally acceptable figures.

Ahsanul Mahboob Zubair, Jamaat assistant secretary general and head of its central publicity department, told The Daily Star that the party was moving ahead with the idea of contesting local government polls independently and without party symbols. He said district and upazila units were informed of the decision immediately after the parliamentary polls.

"The government will decide the election schedule, but prospective candidates also need to remain active in

FARMERS' TK 10,000 LOANS Govt asks banks to write them off, withdraw cases

STAFF CORRESPONDENT

The government has decided to pay the loans and interest owed to banks for farmers whose debts have been waived, on the condition that all cases filed against those farmers are withdrawn.

The conditions were outlined in a directive sent by the finance ministry to Bangladesh Bank yesterday. The move is part of the BNP's election pledge to waive agricultural loans of up to Tk 10,000, including interest.

According to the directive, the government will settle liabilities arising from the write-off of loans and interest up to Tk 10,000 through budget allocations. For this purpose, Tk 1,568 crore has been earmarked in the revised budget for the current fiscal year.

Of the total amount, about 54 percent will be paid by Rajshahi Krishi Unnayan Bank and Bangladesh Krishi Bank, while the remaining amount will be distributed among other state

CANAL RESTORATION PM launches nationwide drive today

STAFF CORRESPONDENT

Prime Minister Tarique Rahman is scheduled to visit Dinajpur today to inaugurate a nationwide canal excavation and re-excavation programme aimed at improving irrigation, restoring water flow, and strengthening rural water management.

The initiative revives a programme originally introduced by BNP founder and late president Ziaur Rahman, who launched canal excavation across the country. The ruling BNP government is restarting the programme in line with its election manifesto.

The prime minister will formally inaugurate the nationwide programme through the re-excavation of a 12-kilometre canal in the Balrampur Sahapara area of Kaharol upazila in Dinajpur. The inauguration ceremony will be held virtually while excavation work begins at the site.

In the first phase, the programme will be implemented in 54 districts across the country. On the same day, ministers, state ministers, whips and members of parliament will inaugurate similar excavation programmes in other districts.

According to the schedule released by the Prime Minister's Office (PMO), Tarique will fly from Dhaka to Saidpur Airport this morning. From there, he will travel by road

Three workers electrocuted to death

Two others also injured when a crane hit a power line

STAFF CORRESPONDENT

Three workers were electrocuted to death and two others injured after a crane came into contact with an overhead power line in the Kharapa area of Khilkhet in the capital yesterday.

The deceased are Rajib Hossain, 25, of Fuljhuri village in Barguna Sadar; Razzak Miya, 57, of Basuki village in Barguna Sadar; and Farid Jaman, 64, of Battachor village in Jamalpur's Bakshiganj upazila, said police.

Khilkhet Police Station Sub-Inspector Reazul Jabbar said the incident took place around 4:00pm when Dhaka Electric Supply Company (Desco) was installing underground power lines in the area.

Around 20-25 workers were on site when five were electrocuted and taken to Kurmitola General Hospital, where doctors declared three dead, he added.

Desco Chief Engineer Manjurul Haque said workers from a subcontracting company hired by Desco have been laying underground electric wires over the past month.

"Today, around 4:30pm, workers were unloading cables from a truck using a crane. When the crane touched an overhead power line, five of them got electrocuted. Later, three of them died," he added.

Police are investigating the incident, the SI said.
